Such land is more than likely plants die. If this does not occur to be cloddy, and a clod in the the farmer is obliged to thin the a few hours on the road adjacent field is of little use to plants. Clod-dy land is hard to work and seldom plants are delicate and are easily gives a good stand. It furnishes injured. Perfect stands of cotton

in the boll-weevil sections, to plant cotton as early as possible, yet there is nothing gained by placing the seed in the ground before the latter is warm enough to cause it for planting. to germinate and grow; or before Use selected seed of known pathe soil is thoroughly prepared rentage and good quality. This was strongly illustrated last year in boll-weevil sections. Where in depth on a firm bed. the land was properly prepared before planting, even though this and use care that the seed drill is ter each section and be sure that preparation caused a delay in put- not in a trench. ting the seed into the ground, the yield was much better than where drained. attention was not given in this detail. A thorough preparation is more than half the cultivation. Do a stand either of cotton or corn this not plant either cotton or corn be- year. These directions are for fore the land is worked into a fine normal conditions and applicable seed bed even if planting is a little with all ordinary seasons and soils. the 26th day of May the people of

Last spring a great amount of trouble was experienced in securing stands, especially of cotton. This was primarily due to a late, wet spring; but there were other contributing factors, including poor preparation of land, improper depth of planting and poor seed. The farmers seem fairly well aroused to the importance of good seed. To be good the seed must not only be from a good variety but must have been carefully selected and so cared for that they have strong vitality. Be sure the seeds planted have not been damaged from any cause. Prepare the land thorough ly and sufficiently in advance of planting so that there is a firm seed bed. Then avoid one of the most common causes of loss of stand-that of planting too deep.

With well prepared land good cotton seed, if properly planted, market are faulty in that it is almost impossible to gauge the depth at which the seeds are placed in the ground. This defect is only S. A. K.

Nursing baby?

nourishment for two.

Further, while the seed may not actually be covered to a great depth, many leave them in a trench with nills of loose dirt on each side. The first good rain washes this dirt into the trench and buries the seed too deep. This should be avoided. A light roller should always follow the planting so as to press the

ground close to the seed. It is best even where it is not routh.

While it is desirable, especially served it should never require more

THE SPLIT LOG DRAG-How It Improves Every Road Used

Deaglist the coads is undoubt phrases to Auglo-Saxons, "are pleasant phrases to Auglo-Saxons," while Dragging the roads is undoubted by the cheapest method of keeping the average country road in good condition. For this purpose the split log drag gives most excellent service and is within the reach of every township, and foreman of road construction. It is simple in its construction and can be built in any township at a very small cost. As an example of the cheapness of the construction of one of these drags, I might mention that recently one was made in a township in Georgia at a cash outlay of only 25 cents besides the cost of labor. The logs of the drag was made from some east-off bridge.

As an old on the 26th of May the people, by their votes, can accept it or reject the reach of every township, and foreman of road construction. It is simple in its construction and can be built in any township at a very small cost. As an example of the cheapness of the construction of one of these drags, I might mention that recently one was made in a township in Georgia at a cash outlay of only 25 cents besides the cost of labor. The logs of the drag where material samples and the race for the Demo-prospect graded school will take place April 10th. Rev. W. E. Abernethy will deliver the address. Mr. Neil Parker of Anson county and Miss Annie Birmingham, daughter of Mr. Joseph M. Birmingham, of New Salem township, were married on the 22nd at the residence of the bride's father.

> To Destroy Humanity Is No Right. To the Editor of The Journa.

The prohibition question is now being widely discussed. It is certainly one of vital importance. On WIDTH OF ROWS AND DISTANCES the State are to decide by their votes whether or not the manufacture and sale of intoxicating liquors shall be allowed in North Carolina.

During the last few years the anti-prohibition workers have been oughly aroused than ever before in favor of State prohibition, and I believe that if the people of North Carolina will do their duty for the

complete victory will be ours. Mr. Watson's article against prohibition certainly has the appearance to me of coming from (I hope the figure is not overdrawn) "a drowning man." He is evidently catching at anything that has the appearance of argument to carry rights and liberties." True; and surrendering to some extent of our rights. And again, our rights cease when they come into conflict with the rights of our fellowmen and in any way cause them to suffer, Statistics prove that more than 100, 000 youths and men fill drunkard's graves every year. Have we any right to engage in an occupation so destructive to humanity! Should we not willingly surrender the right to manufacture and sell liquor if by so doing we could save any part of that vast army of youths who are annually going to destruction! Grand right it is, indeed. If that is a right we want jealously guarded, there is something very wrong with us. "O Liberty! what crimes have been perpetrated in thy name!" How many precious ives are being hurled into an aw ful eternity as a result of our unbridled liberty to sell liquor! Oh voters of North Carolina! is not

their blood upon our hands!

Forbid, Almighty God, that it should be thus any longer. I know not what course others may take, but I, for one, will ever after this wash my hands clean of the blood of my fellowman. After the 26th of May, shall the bloody banner of King Alcohol be raised over our State and shall we march to the drum beat of the rum fiend, or shall

the white flag of Temperance float over a land in which King Alcohol has been dethroned!
