Baking Powder

FERTILIZER **FACTS**

There are only three kinds of Plant Food: Phosphoric Acid, Potash and Nitrogen. There is only one source of Phosphoric Acid and only one source of Potash, but Nitrogen is derived from many sourcessome good, some fair, some worthless. Therefore the true test of any Fertilizer is the test of its Nitrogen. :: :: :: ::

The Proven Best Nitrogen is The

Nitrogen of Cotton Seed Meal.

The Best Fertilizers for Corn

That the yield of corn from the average farm can be greatly increased by intelligent and liberal fertilization has been repeatedly demonstrated. Large crops of good corn result from preparing the land well, using the right kind and quantity of fertilizer, good seed

Virginia-Carolina **Fertilizers**

will greatly "increase your yield per acre" of corn or any other crop. In some cases remarkable results have been obtained.

Mr. C. W. Caruthers of Sampter County, Fla., writes: "Words cannot express the value of your fertilizer. It is really so far ahead of other companies' goods, that it would not pay anyone to use other brands, were they given free and put in the field. I can prove what I say to be a fact. I made a test on five acres. I used on one half the land your tertilizer and on the other half another company's fertilizer, same grade: the land received the same cultivation every time. I seek a correct account of the amount of money! I get of each half and I get byon more from the land on which I used Virginia Carolina Fertilizer than I sid off the other half. I got four times as much seem from the land on which I used your fertilizer."

Write today to nearest office of the Virginia Carolina Company for a free copy of the new 1909 Farmers' Year-Book of Almanae, full of the most valuable and unprejudiced information for planters and farmers; or ask your fertilizer dealer for a copy.
