## See What Your LAND NEEDS

Buy What You Need

Do you buy fertilizer under a brand name like a patent medicine, or do you buy what your land needs? There are no magic qualities possessed by certain brands. It is only a question of how many pounds of plant food do they contain.

By mixing your fertilizer yourself, you can suit the proportion of quick acting and gradually available Phosphoric Acid and Ammonia to your soil, and you

### Know What You Buy

#### Death of Mr. J. A. Jerome.

(Correspondence of The Journal)

Many friends throughout the county learned with regret of the sudden death of Mr. James A. Jerome October 26th, about seven o'clock in the afternoon, at his home at Unionville. He was outside the house when he fell unconscious to the ground and died within about half an hour.

His death was caused by cerebral hemorrhage.

Mr. Jerome was well known throughout this county and also in Mecklenburg, where he formerly lived. He was a good man and will be greatly missed in the community. He was 74 years and 16 days old.

Mr. Jerome was one of the men who erected the Unionville Methodist church, and had been a member since its organization.

His wife and four sons and five daughters survive.

Funeral services were conducted at the home Saturday afternoon about one o'clock by his pastor, Rev. C. R. Allison, and the remains were interred in the Presson graveyard.

#### President Witnesses Big Naval Review.

New York, Nov. 2.—Fresh from his cross-continent tour of 13,000 miles, during which he received senatorial pledges which seem to indicate the early ratification of the treaties of peace and arbitration with Great Britain and France, President Taft today, standing on the wind-swept bridge of the little cruiser-ship the Mayflower, reviewed the mightiest line of fighting craft ever assembled under the American flag.

The President had indicated in all his speeches in advocacy of the treaties of peace that he entertained no fond delusion that war, by convention, could immediately be a thing of the past.

Today Mr. Taft let it be known that he would urge Congress the necessity of building two great superdreadnoughts a year until the Panama canal is in actual operation. The canal, he declared, would double the efficiency of the navy and from that time on, one battleship a year might suffice to keep the American navy in the forefront of the world's military powers.

Countless thousands of people joined with the President in paying tribute to the five score vessels which lay at anchor in the Hudson. Twenty-four first class battleships were in the line, surrounded by armored cruisers, torpedo boats, submarines and the rank and file of auxiliary vessels that serve as tenders to the fleet. There are ninety-nine in all.

Twenty-one of the battleships toward the close of the day picked up their anchors, turned in the teeth of the gale and swept out to sea proudly. The President watched the passing pageant in impressed silence. As the big fighting ships steamed by with foam crested waves spreading from their armored bows and with clouds of black smoke swirling from their funnels, the sun was near its setting and they spoke with crashing guns the last of a long series of salutes which had begun with the early morning and had been all but incessant throughout the day.

#### Cabarrus Farmers' Warehouse Burned.

The Cabarrus county cotton warehouse at Harrisburg, containing one hundred and twenty bales of cotton, was destroyed by fire Thursday morning. The blaze was discovered by Mrs. Fate McChartney, who lives only a short distance from the warehouse. The alarm was given and practically the entire citizenship of the little village responded, but without the assistance of fire-fighting apparatus, they were unable to do anything with the flames.

The building was not insured. It was erected in 1907 and cost \$800. There was \$5,500 insurance on the cotton, which fully covers the loss. The staple was owned by farmers in various sections of the county.

#### A Father's Vengeance

would have fallen on any one who attacked the son of Peter Bondy, of South Rockwood, Mich., but he was powerless before attacks of kidney trouble. "Doctors could not help him," he wrote, "so at last we gave him Electric Bitters and he improved wonderfully from taking six bottles. It's the best kidney medicine I ever saw." Backache, tired feeling, nervousness, loss of appetite, warn of kidney trouble that may end in dropsy, diabetes or Bright's disease. Beware: take Electric Bitters and be safe. Every bottle guaranteed. 50 cents at The English Drug Co's.

Low Rates  
Short Form Policies  
Everything Guaranteed  
Nothing Left to the Imagination

Chartered in and doing business under the strict laws and supervision of the State of Massachusetts

### Why Not Get All the Life Insurance You Possibly Can For Your Money?

When a man buys life insurance he should purchase it on the non-participating plan, as on this plan he knows from the beginning the exact yearly cost of his policy. The usual difference in premium between a participating and non-participating policy is over 20 per cent, which difference can be advantageously used in purchasing that much more insurance. Think a moment how much more satisfactory to the policyholder it is to have from 20 to 25 per cent more insurance for the premium paid than to have a dividend of uncertain amount once a year. To illustrate by actual figures: at age 35, \$27.00 per thousand or \$270.00 annually will pay for a \$10,000.00 ordinary life policy in a participating company. The Columbian National Life's non-participating policy would cost \$216.50. If this difference between \$270.00 gross premium in the participating company and \$216.50 fixed premium in the Columbian National is applied to purchase additional insurance at \$21.65 per thousand, the policy holder could carry \$12,500.00 insurance in the Columbian National for the gross cost of \$10,000.00 in the participating company.

Isn't it better for the \$270.00 you pay down when you take the policy to get \$12,500.00 protection for your family instead of \$10,000.00, particularly as the \$12,500.00 policy has larger cash values than the other?

In one case you get more in the beginning, always know what the cost will be, and what you are going to get for it. In the other you get less insurance protection and an uncertain dividend.

Isn't it better to know than to guess?
