**A SHORT TALK TO DEMOCRATS**

It is very important that every Democrat in Union county who will be entitled to vote on November 7th should be registered. This election is one of the most important in the history of the United States. It is important to re-elect Woodrow Wilson to the Presidency of the United States; it is important that we should give T. W. Bickett, a native son of Union county, a great big majority for Governor; it is important that we should give L. D. Robinson, our candidate for Representative in Congress from the 7th district, a great big Democratic majority, because there are several counties in this congressional district that are going to give Republican majorities for Mr. Robinson's opponent. It is very important, too, at every general election that every Democratic voter should go to the polls, because the number of votes cast for the Democratic candidate for Governor fixes the number of votes that the Democracy of Union county shall have in the State Convention. At present we have only about 12 votes in the State Democratic Convention, while if every Democratic voter in the county would cast his vote in the coming election, we would have about 24 votes in the State conventions and the Democracy of Union county would have its proper place and influence in State politics and government; and, of course, we want to give our County Ticket a big majority over the Republican vote.

Registration books will be opened in every precinct on next Saturday, October 7th, at 9 o'clock a. m. and kept open every day (Sundays excepted) from 9 a. m. till sunset, until sunset on Saturday, Oct. 28th.

If you are not registered you can not vote. Let every Democratic voter, not already registered, be sure to get his name on the Registration books. Young men who will become 21 before the last day of registration should get their names on the registration books; but any young man who will become 21 in the period after October 28th until November 5th (the day after election) may register and vote on the day of election.

Remember the registration days: October 7th to October 28th, every day except Sundays.

J. C. M. VANN,

Chm. County Dem. Ex. Com.

**WHY THE WORKMAN IS POOR**

PROGRESS DRIVES HIM DEEPER INTO THE SUBURBS

And Surface Reformers Only Help to Do It—There Is Not Enough Room in the House Because Greed Has Taken It All.

Correspondence of The Journal.

It is said that every sin is a product of law. Whether this statement is overdrawn or not depends upon the view point of the one analyzing it, and if we should decide that there are some exceptions we would still be forced to admit that enough sin is produced by law to justify a rigid arrangement of the present system of unholly statutes with which we are afflicted.

We might look at the law governing the private ownership of land and if we look at it rightly we would be very little, if any, further evidence needed to confirm the whole broad statement.

Mr. Clarence Darrow, the world famed legal defender of the peoples rights as against the oppressions inflicted by monopolistic money lords and land grabbers, said in a speech at Los Angeles some time ago: "The world does not want fundamental reform." Continuing he said, "the theories expressed by the advocates of single tax were too simple, too easy of application, too sane, and too direct for the tricksters of our time." They want laws so complicated, they want laws so jumbled as to put them out of reach of the common people, so they cannot tell just how or where they are being robbed. This statement needs no evidence, more than the assertion, to prove it since we know that lawyers do not themselves understand the law. As proof of this we find supreme court judges often, or nearly always rendering two opinions. A majority and a minority report on questions coming before them for final settlement. If they understood the law why could they not agree?

But, back to the land laws. It is probably not generally thought that the United States needs reform along this line almost as much as does Mexico. Yet it is a fact that she does.

In the May-June number of the Single Tax Review, published in New York, Mr. W. B. Northrop shows that the railroads of this country own no less than two hundred million acres or 312,500 square miles of land. This is about equal in area to all the New England States and enough over to include North and South Carolina. It would make a plantation 553 miles square and would be rather more than one family could use very well. It would provide homes of one hundred acres each for two million families, or ten per cent of the entire population of this country.

But there are other land monopolists than the railroads. One half of the state of Florida is owned by 182 men, whose combined holdings amounts to 16,990,000 acres or 26,547 square miles. This would make another plantation a little more than 163 miles square and would furnish homes for 169,900 families, and give each of them all the land they could cultivate and plenty over for wood-land and pasture.

But why prolong this list of land monopolists? There is more of them of course but they are all alike and are all doing the same iniquitous thing, namely, holding land out of use and causing suffering.

Nature works ages making a coal bed for the use of the earths inhabitants, but just before these inhabitants come to need this provision of nature (coal) some ground hog corners on it and robs the people of its benefits by appropriating said benefit to himself. The result is the rich coal baron and poverty stricken citizens. And this kind of game, mind you, is sanctioned by law, and a said to deserve our hearty endorsement.

No wonder men and women are losing respect for such procedure. The screws are beginning to pinch so severely that all except the hopelessly ignorant are turning their attention to them in a frowning mood and things are looking squally.

Working men have been driven further and further out into the desert until there is no room, even there. And the reason for no room is not because God failed to make the house (world) large enough but because greed has taken all the house to itself.

The working man moves out in the suburbs where the car service is poor, and where living condition are undesirable and pays \$10.00 a month rent for a cottage in which to live—and works. He is poor because he is a working man. If he was not a working man he would not be poor. And if he was not poor he would not be a working man. Every one who works is poor and all, or nearly all, poor persons work. Usually the harder one works the poorer he is. You can't get rich by working for it.

Well this working man, as we said, goes out in the suburbs and rents his cottage and along comes a bunch of practice reformers who lay out a park, improve the car service and the rent goes up to \$20 a month. Then the working man goes still further out, where the car service is poorer, for the right to live and keep on working. He can't afford to pay the speculative rent on the wealth his industry creates, so he must leave it for others to enjoy and go still further out. In other words, progress pushes him further into poverty, and the benefits that should come to him by his thrift are denied him because the monopolist of natural resources must levy tribute on him to support his own extravagances and keep his already corpulent bank account growing. And this is said to be in accordance with moral (?) law. Where did we get the idea?

When we learn that the land belongs to all of us, and to each one of us so much as he can use, then we will be free men—no need for labor unions then; no need to pass laws to keep men and women from working themselves to death; no need to legislate against the white slave traffic. When it pays to behave, men and women will behave. They'll do it because they want to. There will be no class distinction in that time, no awful poverty and no awful wealth.—Novus Homo.
