FRIDAY, JULY 14, 1922.

THE SIMPLICITY OF GREATNESS

Perhaps there is not an American who does not have full and proper respect for Mr. Taft, Chief Justice of the United States Supreme Court, and ex-President of the United States. Yet he is not rated as a great man as that word is used in history's perspective. Yet he is great enough to be simple and amiable. The news reports say that he has charmed the English, but withal, amazed them, by the simplicity of his manner and his unaffected bearing. We could wish nothing better than that all Americans should so appeal to other peoples. The American, who is properly conscious of the greatness of his own country, does not feel the need of putting up a bluff when out of it, any more than he feels the need of adopting a braggadoocio attitude. And isn't that about true in all the relations of life?

When you look at some pieces of machinery, their intricacies amaze you—and you wonder how the brain of man ever conceived them.

Yet practically all mechanical movements are merely combinations of three basic principles—wheel, wedge and lever. Individually, these are simple. Grouped together they look complicated.

So with all problems. No matter how involved and difficult they seem, a little analysis and common sense will disclose that they are built up out of very simple things, easily adjusted.

Get rid of fear and procrastination. Then no problem is insurmountably difficult.

The great man has a knack of reducing the complications to fundamental principles, which are always simple. Both mechanical, social, religious and political evolution is towards simplicity. If people would but remember this they would loose many of their causes for distress about the tendencies of things. People who are most puzzled about the complications are usually the ones who talk loudest and longest and most dogmatically, especially about details. Lacking the discernment to see through the com-

plications to the simplicity below, they try to make up the deficiency by further complicating the incidents, the details, and the isolated facts.

Mr. W. Z. Faulkner, manager of the Southern Cotton Oil Company, was in the Journal office a day or two ago with a number of cotton bolls that had been punctured by boll weevils and also a shuck that had two blooms in it. Mr. Faulkner said this was unusual and that he had never seen one like it before. He was on one of their demonstration farms on the Fowler and Lee place several miles up the Secrest Shortcut, looking for boll weevils when he found this shuck. Mr. Faulkner has several weevils in the different stages of development and several "grubs." This field is one of a number that are being used for demonstration purposes. It has about 6 per cent of infestation and in about a week it will be necessary to dust it with calcium arsenate which is recommended by the government for the destruction of weevils. Mr. Faulkner is hatching several weevils which he will watch with interest.

The noted dog case, in which Rafe Williams and Frank Ingram, both colored, were claiming a couple of hound pups, was tried before Esq. M. L. Flow Tuesday. It will be remembered that Rafe borrowed two dollars from Ingram with which to pay for the pups and that Ingram was allowed to hold the dogs as security until Rafe had paid for them. When Williams offered Ingram the money he refused to take it, preferring rather to keep the "purps," whereupon Rafe took out claim and delivery papers for the recovery of his blooded animals. Judge Flow decided that Rafe should have the pups and Ingram's attorneys served notice of appeal to the superior court. But later the two negroes got together and compromised the matter. Ingram gets the dogs by paying Rafe for them and also the court costs, which together with the pups amounts to \$14.80. A coggone bad case settled.

No Demand.
"Can any man in this audience hurt his business?" challenged the educator. "I can," answered a small man in the rear row. "And might I ask what your business is?" asked the educator. "Certainly answered the other. "I used to make a good living peddling the book 'What Every Girl Should Know,' but there's no demand for it any longer."

Mrs. Belle Richmond, now the leading fur merchant of Tocoma, began work as a furrier when she was a little girl in Scotland.

A brass band has been added to an English asylum's equipment as a therapeutic agency in the treatment of the insane.

The largest gold nugget ever found weighed 2217 ounces, and was sold for \$52,500.
