THE ICE MAN

Center of British Industry.

Within two or three hours by rail and linked to the River Humber by a network of canals, live 12,000,000 to 15,000,000 people, mostly engaged in manufacturing and mining, and largely exporting their products to foreign lands and receiving from abroad the bulk of their raw material and food supplies. Seed crushing, flour milling, oil refining, and the making of paints and other goods into which these oils enter, are the special industries of Hull, England.

Stale Bread or Fresh Bread.

Most persons don't like stale bread so well as fresh, though many consider it more digestible. As a matter of fact, fresh bread is just as digestible as stale, if it is chewed as much, but its very softness is a temptation to chew it too little; hence it is swallowed without the admixture of enough saliva to digest its starch. Stale bread, on the other hand, is difficult to swallow unless thoroughly chewed. The difference between fresh and stale bread is merely a matter of water. In bread as it comes from the oven the crust is dry and crisp and the crumb is moist and soft, because all the water is in the crumb. As hours or days pass the crust absorbs water from the crumb and becomes soft, while the crumb becomes dry. A loaf can be made fresh again by slightly moistening it and placing it for a few minutes in a hot oven. The heat drives the water from the crust back into the crumb.

Recognized the Burden.

"No wonder them city people complain about bein' all worn out with their social duties," vouchsafed a prominent citizen of Wayoverbehind. "When I was down to New York I duru near un'luted my neck tryin' to bow to everybody I met on the streets."—Magazine of Fun.

Sound Principal

Taken from Judge Caster's announcement of his candidacy for attorney general.

"While we assert a theoretical equality before the law, it is my observation that, as administered in our courts, the criminal law is comparatively impotent as against wealthy and influential offenders, at the same time that it is generally enforced with vigor, and too frequently with ruinous harshness, as against the weak and humble. Upon the one hand we are crowding our chaingangs with wayward youth from the lower ranks of society and thereby, in the name of justice, converting mere delinquents into hardened criminals; whereas, upon the other hand, the influential criminal is too often able to delay, baffle and finally defeat justice."

Who Makes Up the Suicides.

According to Dr. Jacques Bertillon the French statistician, suicide is commonest among liquor sellers, chimney sweeps, butchers, fruiterers and musicians. It is frequent among "came lots," shop assistants, cutlers, hair dressers, servants, costers, lawyers doctors and druggist. It is rare among the clergy, government officials and men leading an active, open-air life.

No. Six-Sixty-Six

This is a prescription prepared especially for **MALARIA or CHILLS & FEVER**. Five or six doses will break any case, and if taken then as a tonic the Fever will not return. It acts on the liver better than Calomel and does not gripe or sicken. 25c

HOW WILL YOU SET YOUR TOBACCO THIS YEAR?

WILL YOU STICK TO THE OLD LABORIOUS, BACK BREAKING METHOD OF SETTING IT BY HAND WHEN THERE IS AN EASIER WAY?

By using a Masters Plant Setter you not only save labor, time and prevent lame backs from stooping but you get your plants nature's way—every plant is rooted by absorption.

One man with a Masters plant setter can set, water and fertilize more plants than three men can set by hand in one day.

Plants are set, watered and fertilized all in one operation.

These setters may be used equally as well for setting out tomatoes, cabbage, cauliflower, sweet potato slips, etc.

If you have never used one of these planters call and let us show you the principle of operation.

The Nature Of The Beast

Not only has the entire issue of one hundred million dollars of twenty-year six per cent, convertible bonds recently offered for sale by the New York Central and Hudson River Railroad, been subscribed, but no sooner were the bonds placed on the market than they sold at advances ranging from two to three and one-half per cent. This is described as "the largest issue of corporate securities ever placed in the United States," and the success with which it was marketed does something more than bear convincing testimony to the soundness and stability of financial conditions in this country. It furnishes concrete and conclusive evidence of the confidence with which capital views the improved and rapidly improving business situation generally. It is idle to expect, however, that it will have any effect in the way of silencing the howling of the republican calamity-shriekers. In proportion as ground for it grows less their howling will gain in volume and vociferousness. It's the nature of the best.—Norfolk Pilot.

"Dickensy" Names.

"Dickensy" names are to be discovered in the most unlikely localities, as those whose travels take them to Burgundy may have discovered. In Macon there is a Rue Dombey, which, apart from its name, is worth exploring for the sake of one or two fifteenth century timber houses with most quaintly carved fronts. And by a strange coincidence, on the banks of the Saone, about seven miles out of Macon, there is a village called Boz.

Builds up the Whole System. 50 cents.

Confidence Slow of Growth.

You cannot open confidence as you do an oyster; it expands gently from within in response to a genial, stimulating influence from without, as a bud becomes a rose.—George Jordan.

Care-charmer Sleep' son of the sable Night.
Brother to Death, in silent darkness born. —Samuel Daniel.

Best Thing for Bilious Attack.

"On account of my confinement in the printing office I have for years been a chronic sufferer from indigestion and liver trouble. A few weeks ago I had an attack that was so severe that I was not able to go to the case for two days. Failing to get any relief from any other treatment, I took three of Chamberlain's Tablets and the next day I felt like a new man," writes H. C. Bailey, Editor Carolina News, Chapin, S. C. For sale by Mebane Drug Company.

The Logic Of It.

The Yale freshman year was proving very expensive to father, so father decided to have a "heart to heart" talk with Johnny, home for the week end according to the New York Evening Post.

"Now, son," said he gravely but affectionately, "your mother and I are spending just as little as we possibly can. I get up in the morning at half past 6 and I work until after 5. But, son, the money just won't go round at the rate that your expenses are running. Now, I ask you, as one man to another, what do you think we had better do?"

For a moment Johnny's head was buried in thought—and then he replied:

"Well, father, I don't see any way out but for you to work nights."

One Purpose of Life.

What do we live for if it is not to make life less difficult for each other? —George Elliot.
