WEDNESDAY FEBRUARY 1, 1911

The Massachusetts legislature is working on a bill to tax bachelors \$5 per year. The North Carolina lawmakers should pass such a law.

Tennessee has a new sensation. A Republican Governor has not only been elected, but will be permitted to hold the office.—Exchange.

The many friends of Hon. W. A. Bailey will be glad to learn that he is very much improved in health, although he will not be able to take his seat in the present session of the legislature.

A lady asks "if the school teachers are tardy, do they have to make speeches?" Can't say. It takes all our time looking after the skating rink, without getting tangled up with the schools.

If there is another Democrat in the State who wants to be appointed a justice of the peace he should hurry up and say so. The Legislature has already appointed them as far as its acquaintanceship runs.—Caucasian.

With regard to the row over the Mocksville skating rink, the Lexington Leader declares that for purposes of amusement it would rather mix up with a buzz saw than butt into this discussion. We are inclined to believe that the Leader's discretion is fully warranted.—Charlotte Observer.

Persons reading The Record are left under the impression that Mocksville has but three stores and no hotels, one bank and no barber shops, one harness shop and no drug store, one dentist and no doctors, one restaurant and no livery stables, no factories, or shops. A sad commentary on our town. Every business house, factory, and professional man should use a little printer's ink to let those at home and in other sections know that this town does some business.

Representative S. E. Marshall has introduced a bill for free text books for Public Schools. An effort will be made to sidetrack the bill so as to make it apply to counties as may desire it. The reason is plain. It is a plank of the last Republican State platform and Democrats will handle it gingerly. It would mean much for the public schools and Representative Marshall will do his best to have it enacted into a State-wide law, as it should be, for really it is not a political question.—Union Republican.

A Salisbury item says that a movement has been started looking to the building of a trolley line from Salisbury to Coolemees, Mocksville and perhaps Yadkinville and other points north of Rowan county. The proposed line would traverse a rich section of country and link together a number of thriving towns. It is believed that such a line would prove profitable from the start and a number of substantial business men are pushing the proposition. The Record would be glad to see an electric line built from Salisbury through Mocksville. It would put Rowan and Davie in closer touch with each other and would mean much to both counties. We say let her come.

We have more respect for the four-footed hogs who have to root for their living than for the two-legged swine who will take a paper three or four years and then when asked to settle, will mark it "refused," and have it returned to the office. The grave-robbing, the highwayman, the pickpocket and the purse-snatcher are not worse than the paper thief. Of course, if a man notifies the editor to stop his paper when the time expires and the editor keeps sending it on after being notified, then it is not the fault of the subscriber. But there are a certain class of people who think it their duty to rob the editor. They take a special delight in doing so. Such people may manage to live and get along all right in this world, but they will get their just deserts in the world to come. A man who would steal from an editor will steal meat out of the hand of a blind pauper. We are glad there are but few, if any, such people in Davie county.

With Our Lawmakers.

Judiciary Committee No. 1 returned to the House the bill to prohibit the sale of near-beer and beer in North Carolina with approval as to its legality and it was referred to the committee on liquor traffic.

The bill to permit divorce after ten years of insanity of either party was reported unfavorably by the judiciary committee.

A bill by Williams, of Buncombe, requires railroad companies to employ conductors with two years training as brakemen and requiring "full crews" on all trains.

The Senate, after voting down an amendment by Graham, of Orange, to the governor's salary bill to make it \$5,000, passed the Gardner bill for \$6,000 instead of \$4,000. There were two votes against it.

Advertising Pays.

It pays to advertise. But it's hard to get some people to believe it. It pays whether they have competition or not. Advertising not only tells people where to buy, but induces them to buy. Keep your business before the folks. In the papers they read, is the surest and cheapest medium.

If you have what the folks want, advertise it and they will see it. Especially if put so they see a bargain in it. We advertised some land. It showed there was a bargain in it. Letters of inquiry poured in. Men came to inquire about it.

The people didn't buy all they wanted before Christmas and during the holidays. They are now buying what they must have, or be induced to buy. They have the money. It should be put into circulation. Those who are seeking it, are entitled to it, and will get it, that's all.—Ex.

New Governor of Tennessee is Inaugurated.

By Associated Press.

Nashville, Jan. 25.—Benjamin W. Hooper was inaugurated today as governor of Tennessee. He is the first Republican elected to this office since 1881. His election followed two years of bitter strife.

Governor Hooper opened his inaugural address with the plea that in the future the people settle their political difficulties within legal and constitutional limitations.

Tendency to Extremes.

Prohibition has practically wiped out the sale of spirituous and malt liquors in this State. The Legislature is being urged to pass a general law restricting the sale of near beer. Would it not be well for the General Assembly to include wine, an unrestricted industry and thus make a clean sweep? Then soda fountain drinks should next receive attention. They do no physical good and some are said to be impregnated with dope. Cigarettes are also receiving a "black eye" and tobacco in other forms may come in next for attention, as a luxury, pure and simple. It is an age of extremes and when the limit is reached the pendulum swings back and then comes the reaction. This is history and history repeats itself.—Union Republican.

An Immense Hog.
