WEBSTER'S POTATO TALK. One Industrious Little Spectmen Bored One Hundred Feet In Twenty-five Hours, His Offhand Lesture to a Party of Trap. Place the wriggling and restive

One can always spend an interest. Hitle mole upon the ground on a spot ing hour with that fine old gentle- where the ground in not unreasonfair chance for disappearing, and see what he will do. The instant he touches the carth

down goes his nose, feeling nervously here and there for a place to start It was in the year 1849, the year his drill. In about one second ha of the gold fever, that I was on a has found a suitable spot. His nose train returning to Philadolphia from sinks into the soil as if it were a Harrisburg, and Daniel Webster was brad awl, with a half bering and in the same car. Every one on board pushing motion, and in an instant half your mole's head is buried from Now watch sharply, or he will be and speech as well as that grandeur | out of sight before you see how he

of simplicity in the familiar case | does it. Up comes his powerful right | foot, sliding close along the side of his head, straight forward, edgewise, to the end of his nose. His five pointtened to his agreeable talk upon the ed chisel cuts the earth vertically subject of the simple and unambi | until it reaches as far forward as Lis | short reach will let it go. Then,

with a quick motion, he price the earth sidewise from his nose and so had an audience of nearly a car full makes an opening. Instantly the left foot does the

same thing on the other side, and meanwhile the gimlet pointed nose latter saw the gleam of the weapon has gone right on boring. In five seconds by the watch his body is entirely out of sight, and

three minutes he will tunnel a foot avenue and disappeared. -N. Y. if he is at all in a hurry to get on in Times. the world. Desiring to learn just how much

tunneling a mole can do in a known number of hours, we caught a good large specimen and immediately turned it loose in the middle of a five acre field of clover. The grass was so thin and winter

killed that the ground was practically hare, but not loose like the soil of a cultivated field. Five seconds after the mole receiv.

ed its freedom it had barrowed out of sight. This may seem past belief, but the fact is vouched for by the official timekeeper. Sticking a stake at the starting point, we retired and left the digger hard at work.

The start was made at 11 a.m., of the close of the fifteenth century, and the direction taken was eastward. By 6 p. m. the mole had dug 23 feet in a zigzag line, but keeping the same general direction all the time and without digging any side galleries. By 11 a, m, of the following day the tunnel had been driven 31 feet farther, with numerous side galleries, and four feet had been add- lizers used than tobacco. Poted at the end next to the starting ash is its most important re-

point. In another hour 10 feet had been quirement, producing a large added at the extremity, making 68 vield of finest grade leaf. Us branches, or a total of 10416 feet at least 10% actual tunnels dug in 25 hours.

The boitom of the tunnels ran very evenly about four inches below the surface. Sometimes the hole was blessings America ever gave to the elliptical in shape, measuring 1% in form of sulphate. To inworld; how, notwithstanding all

inches in width by two inches in height, and sometimes it was trianthis, they were still used as food for cattle and horses, though in a pinch it was thought they might help gular, measuring two inches each fertilizers containing chlorine.
