Not Enough In Circulation Now.

The Wilmington Star says the U. S. Treasury report issued Tuesday, showing the condition of the gold reserve March 1st contains two notable statements, one that since January 6th, \$36,681,528 in gold had been withdrawn from the Treasury, \$9,921,133 of which was for export and \$26,757,528 for "domertic use," which means that this amount was withdrawn to pay for the new bonds. And the draining process goes on. The other is even the circulation decreased in the month of February \$60,978,559. This means that this much greenbacks and; gold were withdrawn from circulation, the greenbacks to be used in drawing gold from the Treasury to purchase bonds. This is one of the evil consequences fol lowing the issuing of bonds. Every traction of the currency, causing a greater scarcity of money, the el an insufficiency of money.
