The death of Ex-Senator Carillustration of lawlessness. There is good reason for saying that here in our own section there are is in the schools and churches of | proceedings. the land. There must be a general uplifting of society and a higher sense of moral obligation implanted in the mind of the general public before this lawless spirit is suppressed. The churches.

tist church in this city this week. and indications now are that the meeting will do much good. Mr. Bradshaw is one of the best county commissioners tells us known and loved ministers in the | that the county is not liable for state. He is not only a scholar and a gentleman but he is a speaker and orator of no mean ability and never fails to draw large congregations to hear him.

President Roosevelt has a commission down here investigating age. the conditions of our people as to health, etc. They claim that they are finding conditions such that it will open the eyes of all thinking men when the reports cil of State went out to-day to are made public. The truth wont | the Agricultural and Mechanical hurt and if conditions are bad College to meet President Roose-

days the average is higher. All sent, two other members of the indications now point to continued good prices and if the farm, and yet another, Gifford Pinchot, ers will not rush their tobacco having returned to Washington, on the market in such quantities D. C. that the buyers cannot handle it they will put money in their own pockets.

It could do no harm and would be no reflection on anyone for the town authorities to investigate the cause of the death of two children the same night and when they were supposed to be in good health. To say the least it is a remarkable case.

The day is not far distance when you will be thought of as a criminal for not sending that little boy or girl to school. You have no moral right to neglect the development of its little mind,

Rev. D. Vance Price, who left here last Tuesday for Asheville to attend the Annual session of Conference, has closed an unus-ually successful year as pastor of Central Methodist church this city from a financial point of view. He left here with every dollar paid up which means a great deal considering that the conference collections have been increased three hundred dollars in the past year. The collections amounted to more than nine dollars per capita on the member-ship of the church and it is ex-ceedingly doubtful if there is another church in the conference which has done so well. Mr. Price, by hard work and close application to church affairs, is largely responsible for these conditions and the entire population of the city, regardless of denomination, earnestly desire his re-

Governor Glenn and the coun-

nry Wallnes, a well known Tobacco is selling for about 10 newspaper man and editor of cts, average in this town-some an agricultural paper, were precommission being at Athens Ga.

> There were more than 150 persons present at the hearing by the commission, of which Mr. Walker Page acted as chairman. With him and Mr. Wallace was Dr. Stiles, an eminent authority in the bacteriological world, and what he had to say was brim full of human interest. There were a number of speakers during the six hours of the meeting or rather conference, and expression was very full and free, among the speakers being Dr. George T. Winston, James Y. Joyner. Ashley Horne, William A. Graham, W. A. Withers, James H. Graham, W. A. Withers, James H. Pou, Mrs. W- T. Hollowell, Fred A. Woodward, Clarence H. Poe, Dr. J. M. Templeton, John W. Atwater, Fred A. Olds, Dr. Venable, president of the State University; Charles F. Meserve, Dr. Tait Butler and others. Dr. Butler was a very important speaker, and Dr. Stiles referred to him many of the matters which he had investigated.

The investigation by Dr. Stiles showed a great degree of care and that an astonishing large number of persons in the country and in the mill settlement have the hook worm disease, and in general their blood vitality is very low. In a great many cases this could be told by merely looking at them, but everything was verified by two experts. Dr. Stiles has been in great number of farm homes in North Carolina and finds that the inattention to sanitation, great enough among the whites, is simply apalling among the blacks, much more than 80 per cent, of the homes of the blacks being without any sanitation whatever. This leads him to make a very positive statement the prime promoters of disease, and that, left as they

The regular fall term of court | this important matter, they are will commence at Dobson next a menace to the whole people of third of the population. He put Butler, a very thoughtful man. Dr. Stiles went on to speak of days ago. This case will prob- the great prevalence of typhoid in North Carolina, this State list in this respect. It is found and Dr. Butler confirmed this statement, that this disease, worst in the mountain districts. where the natural conditions favor the most perfect health. In that region the people use spring water, which too often is polluted. Dr. Templeton who is of Cary, this county, and a very observant man, made some interesting statements, supporting quite strongly much of what Dr. Stiles had said, and he says that typhoid fever. Another thing constant use of greasy foods, fat meat and soda biscuit. Dr. Stiles said that the United States had in Porto Rica practically stamped out of the hook worm disease, and that it did seem to him that what the government had done there, it could do in the United States · proper, and it

> Mr. Clarence H. Poe, who was especially called on by Chairman Page to give his views, did so in an excellent way. He spoke about the great necessity of teaching the laws of health in the rural schools; the need of postal savings banks, and the parcels post, and the necessity for the general government, which appropriated money for the licely highways, to do the same thing for the solid ones, in other words that the government should pay one-third of the cost of building the main roads, the State a third. and the community the remaining third. He said that one of the things to be combated as a menace to information, proper life in the country homes and higher ideals, is isolation, now so prevalent. Mr. Poe said that unprofitable work on the farm and isolation had been two of the great drawbacks. Too much emphasis cannot be laid upon the direct statement made, that the conclusion not to be avoided is that the death rate in the South to-day and in the certainly recent past is largely due to unsanitary conditions among the negroes. These are facts for every North Carolinian to think

#### HIGH PRICES CONTINUE At Christian's..

We do not claim to do as well for you as any other house. We do better than any other house.

The reason we do better is because we have the best lighted house in Mt. Airy, the best auctioneer, and because we work harder for you than any men in Mt. Airy. These are the reasons we are leading the markets in high prices. Come to see us with your crop and let us prove it to you. When you sell at Piedmont you have the satisfaction of knowing you always get the top of the market.

Your friends, Christian Bros.

There is more Catarrh in this sec-tion of the country than all other di-seases put together, and until the last few years was supposed to be incura-ble. For a great many years doctors pronounced it a local disease and pre-scribed local remedies, and by constant-ly failing to cure with local treatment ronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co. Toledo Ohio, is the only constitutional cure on the market. It is national cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directon the blood and muc the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address; F. J. Cheny & Co.. Toled

# S.M. Hale's Picnic For You
