

# Why Suffer?

Cardul "Did Wonders for Me," Declares This Lady.

"I suffered for a long time with womanly weakness," says Mrs. J. R. Simpson, of 57 Spruce St., Asheville, N. C. "I finally got to the place where it was an effort for me to go. I would have bearing-down pains in my side and back — especially severe across my back, and down in my side there was a great deal of soreness. I was nervous and easily upset.

TAKE

# CARDUL

The Woman's Tonic

"I heard of Cardul and decided to use it," continues Mrs. Simpson. "I saw shortly it was benefiting me, so I kept it up and it did wonders for me. And since then I have been glad to praise Cardul. It is the best woman's tonic made." Weak women need a tonic. Thousands and thousands, like Mrs. Simpson, have found Cardul of benefit to them. Try Cardul for your trouble.

ALL DRUGGISTS

The Congressional Record could be worse. Let's give the Congressmen credit. They could print their pictures in it.

The printers of Germany's paper marks threatened to strike. Proving that some men will strike no matter how much money they're making.

Couldn't the boys of the stock exchange let crops alone and have as much fun with craps?

## Miners Return To Old Country

Hassell, Pa., April 21.—Bunch of alien anthracite miners to their native homes in Europe, either to stay permanently or to visit the scenes of their childhood, is now the heaviest since the suspension began, according to steamship agents. From twenty to twenty-five leave here every day, many of them being naturalized American citizens who expect to come back after an agreement is reached with the operators. They figure that work will be resumed about the middle of May.

Well supplied with United States currency, which commands a high rate abroad as a result of the exchange, they say they can live more cheaply in Europe than in their adopted country while the collieries are closed. Those intending to remain across the water are taking all their household goods, even their mine picks with them.

The exodus is also in full swing in other hard coal regions.

## Mrs. Bickett Heard in Charlotte

Charlotte, April 22.—Mrs. T. W. Bickett spoke three times in Charlotte today along the lines of infant and maternity work under her direction, as representative of the state board of health. Her first appearance was at 1 o'clock, when she spoke at a luncheon given by the Mecklenburg chapter of the National League of Women Voters. This afternoon she addressed the colored people at Grace A. M. E. Zion church under the auspices of the Phyllis Wheatley branch of the Y. W. C. A., this branch having been organized by Mrs. Elizabeth Preston Allan, one of Charlotte's most beloved women, her interest having always been keen in the work among the colored people.

Mrs. Bickett's last talk was this evening at the windup meeting of the Y. W. C. A. campaign for \$15,000, the final dinner being served at the Y. W. C. A.

Large audiences heard Mrs. Bickett at each address. She was at her best and spoke with enthusiasm and inspirational effect.

## Ants Solve Problems

It has been found that the population of an ant hill has solved many complicated mining problems. Thousand of ants working instinctively perform miraculous engineering feats with amazing efficiency and without profiting.

Each ant finds its own work, and the teamwork when big problems must be solved is surprisingly efficient. When one shift of workers tire or must stop for food or rest, its place is taken by other workmen equally skillful, so not a moment is lost.

When an ant becomes covered with dirt, others immediately clean it by washing and brushing. During their mining operations in digging holes and removing stones an ant is often injured, whereupon others rush to its assistance and carry it to a quiet gallery where first aid may be administered.

The resourcefulness of these little engineers has been found to anticipate many of our recent efficiency methods.

People who differ in political or religious matters must learn that such things are matters of degree of intelligence or perception, even, frequently, of heredity or of environment, and are causes for personal enmity only to mean minds.

Peace cannot come through the typewriter or the quill pen. It must come through mankind itself. Little sectional hatreds must cease in all practice.

## For Hogs — to Sweeten Swill

—dissolve 1 tablespoonful of Red Devil Lye in a pint of water, then add this solution to the slop or soft feed for 10 hogs. Or dissolve ¼ of a can in a quart of water, and add to a barrel of slop. Stir thoroughly and feed to hogs night and morning.

Always get the genuine

Sure is Strong

## "SAVE THE BABY; SWAT THE FLY"

### The Fifth of Ten "Home Town Commandments" Especially Important At This Time.

A recent issue of the North Carolina University News-Letter has an article on "Home Town Commandments" written by F. Eastman, of Sanford, Fla. The fifth commandment is:

"Thou shalt defend the health of thy home town from the death that lurks in marshes, swamps, and heaps of filth. Thou shalt exterminate the fly and mosquito, for they carry typhoid and malaria. The tubercle bacillus shalt thou drive before thee with the sun and fresh air as thy allies."

Dr. Carlton, city health officer, is calling attention to the fact that the best time to swat the flies is in the early spring, when there are very few of them. Then is the time when swatting is a highly profitable industry. But later in the season when they swarm in millions, it becomes a hopeless sort of job. The big important thing to do then is to swat the manure piles. In other words clean up and keep clean.

Flies multiply with incredible rapidity. Ten days after a fly deposits a batch of 150 eggs in a pile of stable refuse, there will be 150 additional full fledged flies ready for their work of increasing their kind and carrying the germs of disease wherever they go. If only one-half of these 150 flies are females and they start laying, in about fifteen days more there would be a much larger crop. If you have nothing else to do figure it out for yourself, how many flies would come into existence during a season from that first batch of 150 eggs?

All this only serves to emphasize the importance of killing the early fly. Stable manure should be kept in tightly covered receptacles so flies cannot have access to it for breeding purposes. Stables and barns must be screened and premises kept clean. We need not have flies if we fight hard enough and along the right lines to prevent them.

"This should be our every day cry. Save the baby, swat the fly. Save the baby, swat the fly."

## ANOTHER TRAGEDY DUE TO WHISKEY

### Judge Connor Sentences Man to Penitentiary for Killing Neighbor.

Raeford, April 22.—Judge G. W. Connor, presiding at the April term of Superior court in Hoke, passed sentence on Frank Averitt, on trial here for the killing of B. M. Pittman last autumn. As the defendant's attorneys entered a plea of murder in the second degree, and it being accepted by the State, the sentence was made indeterminate, according to the statutory provision, which leaves Averitt's sentence a term of not less than two years in the penitentiary nor over five.

The facts developed at the trial a tragic story of two young men with families, the wife of one now a widow with several little ones, the wife of the other with a suckling babe whose father will bear the stigma of stripes without the stars and labor without glory. All has a setting of debauchery and bootlegging. The two operated, it is said, separate blind tigers not far apart; and both lost them the same day when Deputy Sheriff Neill Watson captured them together with much fresh brew; whereupon, so the convicted Averitt testified after his submission to second degree murder, the deceased Pittman and he got together, each under the influence of their own make of the hooch, and had an altercation resulting in what Averitt termed a killing in self defense. Roy Averitt, brother of Frank, arrested under warrant for being accessory before the fact, was acquitted.

Judge Connor was wont to moralize much upon the circumstances in the case. Pittman's widow and little children were there on the one side; Averitt's haggard and weary-eyed wife and tiny first born were there on the other hand, each and all looking for even-handed justice. The cause of the tragedy, spell it in large letters—Booze; and the result, spell that in blazing type—One young man lying in his grave; another headed for a State penitentiary; the children of each, and the widow and wife, although innocent, the greater sufferers.

## Maryland-Virginia Fruit Suffered Little Damage

Wash., April 24.—Commercial orchards in Maryland and Virginia apparently suffered but little real damage from recent frosts which affected these two states, crop experts of the department of agriculture said today. Their opinion was based, they said, upon the absence of returns from crop reporters, who are required to communicate immediately any damage done to crops by storms or temperature changes.

## Valuable Cows Lost

When Big Barn Burns  
Monroe, April 26.—J. C. Austin's big dairy and feed barn, together with contents, sixty-three fine cows and ten shoats were destroyed by fire one mile west of Marshville Friday afternoon about 2:30 o'clock. The total loss is around \$50,000 with fifteen to twenty thousand insurance.

Mr. Austin is the pioneer Guernsey breeder of this section of the State. He is a member of the National Guernsey Breeders' Association and is official registrar of Guernsey cattle in this section. He had in his herd six Guernseys for which he paid one thousand each. Fifty-five registered Guernseys and eight grades went up in the flames that destroyed Mr. Austin's big barn Friday. In addition to the Guernsey cows, ten fine registered O. I. C. shoats were so badly burned that three have already died and the others are not expected to survive. Mr. Austin estimates that the shoats were worth something like \$25 each. The large barn, 170x120 feet, was filled with feed stuff and the silo had a quantity in it, the total loss of the feed being about \$7,000. The barn was worth about \$15,000, being modern in every respect including cement floors in the dairy department.

The total estimated loss on cows is \$30,000, on shoats \$200, on barn \$15,000, feed \$7,000, farming implements and lime \$1,000, making a grand total loss of \$53,200, with only about \$20,000 insurance.

## Resolutions of Respect

Whereas the Supreme Architect of the universe has seen fit in His infinite wisdom on March 8th, 1922 to remove brother T. J. White a member of Zephyr lodge No. 553 A. F. and A. M. to the celestial lodge above.

Resolved: That the lodge has lost one of its jewels and the church a faithful member, the county a good citizen, the community a kind neighbor and the family a faithful father.

Resolved: May the family look upon these resolutions and try to live up to the mark of their father and more especially the boys to fill their father's place in the lodge and church.

Resolved: That a copy of these resolutions be spread on the lodge record and a copy be sent the family of the deceased and to the Mount Airy News and to the Renfro Record for publication.

J. F. Haymore, Committee.

Don't bother about others; be yourself; there will always be some to approve and some to disapprove no matter what you do or don't do.—Anon.

## NOTICE OF TRUSTEE'S SALE OF LAND

By virtue of authority vested in me in a certain deed of trust executed the 10th day of Nov. 1920, by C. F. Martin and G. M. Bruner to the undersigned trustee for C. C. Hutchens to secure an indebtedness of \$4,560.00 and recorded in the office of the Register of deeds of Surry county, N. C., in trust book 75 page 17, default having been made in the payment of the interest therein secured, and at the request of the holder of the bonds therein secured, I will sell for cash, to the highest bidder, in front of the Bank of Mount Airy, Mt. Airy, N. C. on

Saturday May 27th, 1922 at 1 o'clock p. m.

Lying and being in Eldora township and beginning at the mouth of the Gunter spring branch and runs with said branch N. 84 degrees W. 2.24 chains; thence N. 5 degrees E. 3 chains; thence N. 18 degrees W. 1 chain; thence N. 5.10 chains to J. L. Elloit's corner; thence with his old line 18.50 chains to J. L. Elloit's old corner; thence on West line to a stake, Stultz's line; thence S. 43 degrees E. with Stultz's line and creek to a hickory tree; thence S. 76 degrees E. 3.13 chains to a large rock in the creek; thence up said creek N. 14 degrees E. 3.8 chains; thence N. 17 degrees W. 8.74 chains to the beginning. Containing 30 1-2 acres more or less. The above premises are situated on the waters of the Bull Run creek and is the place known as the Lee Elloit mill on which is situated the mill dam, flour mill, chop mill, saw mill and buildings.

Sale made to satisfy a debt of \$4,560.00 principal, interest and cost of sale to add. This the 25th day of April, 1922.

Edw. M. Linville, Trustee.
