

Look for the Smiling Red Devil
You always know a can of genuine Red Devil Lye by the smiling red devil on the label. It stands for a lye that you can depend upon to do the hard, rough work. For twenty years it has been the standard for good lye. Ask your grocer for the can with the red devil label. Write for Free Booklet.

EXECUTOR'S NOTICE
Having qualified as executor of the last will and testament of Lucy Wilborn late of Forsyth County, and formerly of Elkin, Surry County, North Carolina. This is to notify all persons having claims against the estate of the said Lucy Wilborn deceased, to present them to the undersigned on or before the 6th day of August, 1924 or this notice will plead in bar of receiving, and all persons indebted to the estate will please make immediate payment.
This August 4th, 1923.
James Arthur Cockerham,
No. 1325 Woodland Ave.,
Winston-Salem, N. C.

Cause of Appendicitis
When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up inflammation, which is commonly known as appendicitis. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitis.

EXECUTOR'S SALE
By virtue of the power conferred upon me by the last will and testament of Mrs. Nannie E. Samuels, I will sell to the highest bidder, on the premises, on Saturday, the 31st day of August, 1923, at 2 o'clock, P. M., the following real estate to-wit:
A house and lot in the town of Mount Airy on Pine and Dixie Streets adjoining the lands of R. E. Inman and others. Same being the house and lot originally owned by Dr. C. W. Mebane and was the residence of the late Mrs. Nannie E. Samuels.
As the executor wishes to settle up the estate as quickly as possible the sale will be made for cash.
On the same day, at 3 o'clock P. M. on the premises, I will sell to the highest bidder, for cash, the following lot, to-wit:
Beginning on the North side of Fanc' Gap road and on the stake set for corner of lots 7 and 8, and runs with line between these lots North 22 deg. East 263 feet to the corner between lots 8 and 10; thence, with line between these lots South 64 deg. West 76 feet to corner between lots 8 and 9, thence, with line of lots 8 and 9 South 22 deg. 30 feet West 217 feet to Fanc' Gap road, corner lots 8 and 9; thence with Fanc' Gap road South 31 deg. East 93 feet to the beginning. This 28th day of July, 1923.
M. C. MINISH, Executor.

TRUSTEE'S SALE
By virtue of the power contained in a certain Deed of Trust executed by H. J. Roberts and wife Nancy Roberts recorded in Book of Deeds of Trusts No. 81 page 316, Register of Deeds Office, Surry County, Default having been made in the payment of the note I will sell at public auction for cash to the highest bidder at Court House door in Dobson, N. C., on Wednesday, August 29, 1923, at 12 o'clock P. M. the following Real Estate to-wit:
Beginning in a stake Eugene Cheney and W. E. Norman corner and run east to the branch, thence south with Phillip's line, still with Phillip's line to a stone in Norman and Marlon's line, then west to a stone Normans and Marions corner, thence north to the beginning containing 40 acres more or less.
See book of deeds No. 87 page 323, Register of Deeds Office, Surry County, N. C.

NOTICE
By virtue of an execution issued by the Clerk of the Superior Court of Forsyth County, in favor of the Standard Motor Co. vs. W. I. Chilton, I will sell to the highest bidder for cash at the court house door in Dobson on
Monday, Sept. 3, 1923
at 12 noon

a tract of land lying and being in Westfield township, Surry County, and described and bounded as follows:
A certain tract of land known as the home place and composed of two tracts, one of 23 acres, more or less, conveyed to W. I. Chilton by G. L. Watson; the second tract contains 12 acres, more or less, conveyed to W. I. Chilton by Neal Watson; same being the land conveyed by W. I. Chilton to his wife in a contract of separation recorded Mar. 8, 1923.
Sale made to satisfy a debt of \$2,795.45 with interest and cost to add, due by said W. I. Chilton to the Standard Motor Co.
This July 28, 1923.
C. H. Haynes, Sheriff

A Wish

"I HAVE TAKEN Cardui for run-down, worn-out condition, nervousness and sleeplessness, and I was weak too," says Mrs. Silvie Estes, of Jennings, Okla. "Cardui did me just lots of good—so much that I gave it to my daughter. She complained of a soreness in her sides and back. She took three bottles of Cardui and her condition was much better."
"We have lived here, near Jennings, for 26 years, and now we have our own home in town. I have had to work pretty hard, as this country wasn't built up, and it made it hard on us."
"I WISH I could tell weak women of Cardui—the medicine that helped give me the strength to go on and do my work." This card fulfills her wish.

The Woman's Tonic

Consumption of Milk Shows Big Increase
Nearly 108 Billion Pounds Was Made Use of in 1922.

(Approved by the United States Department of Agriculture.)
Did you consume 645 pounds of whole milk in some form or other last year? According to the United States Department of Agriculture nearly 108 billion pounds of whole milk was used in 1922 in the production of butter, cheese, ice cream, milk chocolate and various other milk products, including 69 billion pounds consumed as milk. The quantity of whole milk used in 1921 was approximately 99 billion pounds, which includes 45 billion pounds consumed as milk.
Consumption of milk for household purposes increased from 40 gallons per capita in 1921 to 50 gallons in 1922, according to the department's figures. Consumption by city folks increased two gallons per capita, but that of any increased consumption in rural communities pulled down the average increase for the country as a whole to one gallon.
A big increase in consumption of milk chocolate is shown, 100 million pounds of whole milk being used for this purpose in 1922 as compared with 49 million pounds in 1921.
The number of milk cows on farms January 1, 1923, is placed at 24,420,000 as compared with 24,082,000 cows on farms January 1, 1922. To the average of these two figures is added 1,200,000 cows in towns, making a total of 25,680,000 milk cows producing approximately 108 billion pounds of whole milk or an average production of 4,200 pounds per cow. Average production per cow in 1921 was 3,946 pounds.

Fertilizers Should Not Be Used as Substitute

"Fertilizers should be employed in addition to and not in place of other good soil-management practices," says Prof. A. T. Wiancko of the Purdue experiment station. "Legumes in the rotation, the use of manure or other organic matter, drainage and liming where needed are all prerequisites to the most satisfactory use of fertilizers."
Results of a long-time experiment on a corn-wheat-clover rotation at the Purdue station illustrates this point. The treatment and results were as follows:
Plot 1—Limed 1912 and 1920, six tons manure on corn crop, 19.2 bushels wheat per acre.
Plot 2—Same as plot 1 with 200 pounds per acre acid phosphate on corn crop, 20.5 bushels wheat per acre.
Plot 3—Same as plot 2 with 200 pounds per acre 2-6-4 on wheat crop, 26.7 bushels wheat per acre.
The significant thing about these results is that in plot 3, the combination of a good rotation, legumes, lime and manure produced conditions resulting in large returns from the use of a suitable complete fertilizer. In other words, as shown by plot 1, the rotation, legumes, lime and manure produced a favorable condition but, compared to the others a small crop. The addition of complete fertilizer on plot 3 was all that was needed to push the crop into a new field of profits.

Extensive Experiments With Apples for Swine

The Washington State college has found that cull apples are worth \$19 a ton as hog feed. Extensive experiments were conducted the past year. Pigs which weighed 94.8 pounds each at the start of the experiment gained in weight 66.1 pounds each, or an average of 1.38 pounds per day. Each pig was fed an average of 4.22 pounds of apples and 4.17 pounds of grain per day. It was found that the apples saved, per every 100 pounds of gain, 4.09 pounds of tankage, 31.7 pounds of millrun and 94.42 pounds of hary. To do this, 296.6 pounds of apples were fed. As the apples are bulky, containing little protein, it is necessary to include a little more tankage in the grain mixture.

Important That Floors in Coops Are Kept Dry

If there are floors to the chicks' coops see that they are kept dry and clean. Take them out occasionally, scrape them and dust with dry earth, ashes or sand. If the coops have no bottom be sure they are moved often enough to always have the ground under them clean.

Properly Fed Pig Gives Grunts of Satisfaction

Don't try to stop a pig from squealing by kicking him in the side. He is hungry and will continue to squeal until you give him something to eat. If you give him plenty of corn, clover and stops, he will turn his unpleasant song of hunger into a grunt of satisfaction.

Silo Is Most Excellent Substitute for Pasture

The silo is the best known substitute for pasture, and where land is valued at more than \$100 per acre very few acres should be devoted to pasture. For this same land put into good corn and that put in the silo would produce six to seven times more food than if it is left to pasture.

A HEAVY BURDEN
A bad Back Makes Life Miserable for Many Mount Airy People

A bad back is a heavy burden. A burden at night when bedtime comes. Just as bothersome in the morning. Ever try Doan's Kidney Pills for it? Know they are for kidney backache—and for other kidney ills? If you don't some Mt. Airy people do.
Read a case of it:
Mrs. C. F. Melton, South and Orchard streets, Mt. Airy, says: "I suffered a great lot with pains in my back that bothered me most all the time. Some mornings my back was so stiff and sore, I could hardly get out of bed. My kidneys were all out of fix and acted much too often. My husband recommended Doan's Kidney Pills and I decided to try them and got a box at Eldridge's Drug Store. Soon my back was all right and my kidneys acted O. K. again. We always have Doan's in our home."

Trust this live experience!

when Water gets in the Crank Case

IN more than a half century's constant study of lubrication we have met and solved many hard problems. To take one for example, why water gets in the crank case and what to do about it.

About a pound of water is formed by the process of burning a pound of gasoline. Most goes out the exhaust—the remainder, always heavier than oil, drops to the crank case. Clean oil and water will not stay mixed. Dirty oil will emulsify and quickly lose its value. Experience therefore teaches us to manufacture Polarine absolutely clean—to urge you to drain your crank case often and always fill with fresh Polarine of the proper consistency.

Economical lubrication demands a single reasonably priced, widely distributed oil of outstanding quality that solves every problem. Polarine is that oil, the built-up result of hundreds of trying experiences. You can safely trust our long, live experience to protect your motor by quality products and sound advice.
