"Thou Shalt Not Kill"

is the most gruesome commandment handed down to mankind.

A man may lie steal or break any other law and the public will eventually forgive and forget. But let him commit murder and the cry of everybody is to give him the full penalty—Death! And what is the common excuse of the murdered? INSANITY! Sure he's crazy.

Any man must be crazy to commit murder. But how about the fellow who slowly but surely kills his own body by neglect? He's the craziest one of all.

Stop! Think this over! What are you doing with your own body? Surely you don't want to be put in this class.

But if you are not doing everything possible to prolong your life and keep your body just as clean and healthy as your Maker intended, you are inviting disease and death, you are slowly but surely killing yourself.

Have you ever enjoyed the pleasures of perfect health? If not, you have nature's biggest gift awaiting you.

Chiropractic will do for you what other methods have failed in.

It isn't your fault that you aren't well, just the fault of the methods you've used.

Think it over!

You have the right to keep on killing yourself or you can get well.
