

How to Stop That Weakening Cough

Why let a heavy, stubborn cough wear you down when you can get speedy relief and often break it up completely in 24 hours through a remarkable new method based on the famous Dr. King's New Discovery for Coughs?

Here is the method: You simply take one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. It has a double action. It not only soothes and heals irritation, but also removes the phlegm and congestion which are the real cause of the coughing. So with the cause removed the worst cough soon disappears.

Dr. King's New Discovery is for coughs, chest colds, bronchitis, spasmodic croup, etc. Fine for children, too—no harmful drugs. Very economical, as the dose is only one teaspoonful. At all good druggists. Ask for

There's just one way to know its good quality and flavor—drink a bottle of PEPSI-COLA.

LIVER TROUBLE

Louisiana Man Tells How He Keeps "Up and Going."

"It doesn't matter how strong and healthy we think we are," says Mr. W. S. Reynolds, of Arcadia, La., "every once in a while, in order to keep up and going, we have to cleanse the system and take a little something for the liver."

"My old standby is Black-Draught. I have used it off and on for 20 years."

"I get bilious and have a bad taste in my mouth. My head feels dull. I just don't feel like getting around and doing my work. I know it isn't laziness, but biliousness, so I take a few doses of Black-Draught and, when it acts, I get up feeling like new, full of pep and ready for any kind of work. I can certainly recommend it."

Black-Draught liver medicine is made from pure, medicinal roots and herbs and contains no harmful, habit-forming mineral drugs. In an easy, natural way it helps cleanse the system of poisonous impurities and tends to leave the organs in a normal, healthy condition.

J. M. Sharp Out For The Solicitorship

Reidsville, Feb. 19.—J. M. Sharp, senator of the seventeenth district, and for many years a member of the Reidsville bar, has definitely confirmed the rumor that he would be a candidate for solicitor of the eleventh judicial district.

It will be recalled that Mr. Sharp entered the primary against Solicitor S. Porter Graves four years ago and made an aggressive campaign. He was defeated in that campaign, but polled a splendid vote.

Unable to do Housework!

Gastonia, N. C.—"After motherhood my strength was so slow in coming back that I could not get around to do my housework for three months. I was not only weak but I also had nervous spells and my back ached all the time. Dr. Pierce's Golden Medical Discovery was recommended to me as a tonic and builder and I only had to take one bottle of this medicine to be restored to good health. I gained in weight so that my friends scarcely knew me."—Mrs. Ella Haynes, 106 S. Liberty St. All druggists. Tablets or liquid.

Write Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for free advice.

Tobacco Crop First in Value

The amount of tobacco produced in North Carolina in 1925 was exceeded only twice in the history of the industry: 1923 and 1920. The value of the crop, based on the December 1st price, was \$82,934,600, and as usual ranks North Carolina as first in the value of this crop, Kentucky's crop being approximately \$62,000,000. The 1925 crop was worth about 12 million dollars more than the 1924 crop.

The value of the State's 1925 tobacco crop represented 26 per cent of the value of all crops produced in 1925. However, the tobacco acreage was less than 8 per cent of the total cultivated area.

The tobacco crop was worth 86 per cent as much as the 1925 cotton crop. The combined value of tobacco and cotton was over \$182,000,000 in 1925, representing 56 per cent of the value of all crops.

Although Kentucky produced about 32 million pounds of tobacco more than North Carolina, this State's crop was worth 20 million dollars more than Kentucky's.

North Carolina's tobacco acreage was considerably larger than that of any other state and represented over 31 per cent of the National tobacco acreage.

The pounds yield per acre of North Carolina's bright leaf tobacco is less than any other state except Virginia and Louisiana.

About 55 per cent of the tobacco acreage is located in the "New Bright Belt" or the Coastal counties, while the remaining 45 per cent is in the upper Piedmont or "Old Bright Belt."

The per acre value of the tobacco produced in North Carolina in 1925 averaged \$151.80, which was considerably more than that of any other crop grown.—Farm Forecaster.

Preparing For Easter Service

Winston-Salem, Feb. 17.—Although Easter is nearly two months off, arrangements are already being made for the Easter services at the Home Moravian church and the old Salem graveyard. Last year more than 30,000 attended the service and visitors came to Winston-Salem not only from all parts of North Carolina but also from other states.

Each year the number of ushers necessary to look after the crowd has increased. Walter J. Hege has served in the capacity of chief usher for the past 15 years and when he first entered upon the task less than 50 assistants were required. Last year he had 400 assistants and this year an even larger crowd is expected than ever before and an effort is going to be made to draft at least 500 members of the Moravian church to aid in looking after the crowd.

The first rehearsal of the church bands for the Easter service will take place next Sunday and from then until Easter the various bands will have frequent practice for the occasion. Last Eastern the total bands participating had 500 pieces and it is expected that the number this spring will be at least as large or possibly larger.

WILL HONOR EDISON, 70 YEARS OLD

Pioneers of Menlo Park to Have Annual Luncheon, With Inventor Absent

New York, Feb. 11.—The seventy-ninth anniversary of Thomas A. Edison's birth will be celebrated today at the annual luncheon of the Edison Pioneers at the Hotel Astor, without the inventor's presence. Mr. Edison is at his winter home in Fort Myers, Fla.

The Pioneers, composed of Mr. Edison's associates in his early years at Menlo Park, N. J., and their descendants, meet every year on his birthday. This is the second consecutive year that the luncheon will be held with the guest of honor absent.

Robert A. Carter, of 316 West Forty-third Street, an associate of Mr. Edison more than forty years ago, recalled yesterday a number of Edison's early inventions.

"Ever since 1870, Mr. Edison has kept a record of his work on sheets of paper about five inches by eight," Mr. Carter said. "Each night two of his men and he would sign it."

In discussing the invention of the telephone, Mr. Carter quoted this from one of these sheets written in 1871:

"I know now that I can record sound, but I am not sure that I can read it. I have two bars, and between them a piece of paraffined paper, a diaphragm with a long needle passing through one of the bars. When I speak against the diaphragm and pull the paper it is perforated by the needle."

"This is the great-granddaddy of all recording instruments," Mr. Carter said, "including the phonograph, telephone and microphones."

"Edison's first invention was the voting machine. It was fifty years too early. The next was the duplex and quadruple telegraph, which made telegraphing practicable. Before these inventions telegraphing was little more than a railway signal."

Mr. Carter recalled that Edison invented a typewriter more than fifty years ago.

"It was years too early," he said. "He never got a cent out of it. He was too early with radio, discovering the spark or wave in 1875. In the same year he built a set and published it in The Scientific American, 12 years before Hertz and twenty-two years before Marconi. In 1883 it was taken to Paris and shown in the exhibition by Charles Batchelor, one of Mr. Edison's best assistants."

Mr. Carter asserted that Edison had the telephone "long before the fight Mr. Bell and Mr. Gray had over it," but had never applied for a patent.

"The Bell telephone was purely a magnetic instrument," Mr. Carter said. "In his patent drawings he shows a horseshoe magnet on each end. He shows a soft iron core to support the bobbins of copper wire. There was no place to make an electrical connection. On this patent the Bell Telephone Company was formed. It was only practicable to send messages fifty to seventy miles. Here Mr. Edison was called in, and he worked in the Bell Telephone Building, laid out the system and added the electric current, the induction coil and his carbon transmitter, which made the telephone practicable."

Vaccination of Dogs is Ordered in Dunn

Dunn, Feb. 20.—An ordinance which would prohibit any dog which has not been vaccinated against hydrophobia from running at large in the town of Dunn after March 1, 1926, was passed at a recent meeting of the mayor and board of town commissioners.

The ordinance, passed "in the interest of the public health and safety," provides that any person convicted for its violation shall pay a fine of \$50 for each offense, and that each day such dog is allowed to run at large shall be a separate offense.

Notice Trustee's Sale of Land

By virtue of authority vested in me in a certain deed of trust executed the 24th day of Dec. 1923, by C. F. McCreary and wife Myrtle McCreary to the undersigned trustee for the Foy Lumber and Mfg. Co., to secure an indebtedness of \$804.50, and recorded in the Register of Deeds office of Surry County, N. C., in book 88 page 14, default having been made in the payment of the note therein secured, and at the request of the holder I will sell for cash to the highest bidder at public auction, in front of the Bank of Mount Airy, Mount Airy, N. C., on

Tuesday March 16th 1926 at 1:30 o'clock P. M.

the following described real estate: Beginning on the west side of branch Early Ashburn's N. W. corner and running with his line S. 57 deg. 45 min. East two hundred and ten feet to Early Ashburn's N. E. corner on West side of an 18 ft. road between Tom Ashburn's land and T. E. McCargo's, thence with said road N. 19 deg. W. 150 feet, thence S. 57 deg. 15 min. W. 255 ft. to west side of branch, thence down the branch 150 ft. to the beginning. Mt. Airy township. Sale made to satisfy an indebtedness of \$804.50 principal, interest and cost of sale to add. This the 12th day of Feb. 1926.

M. H. Sparger, Trustee.

Amazing Power of Mexican Mustang Lintiment

Stops Rheumatism—Penetrates through the Skin to the Bone

If you suffer from Rheumatic pains and aches or have a lame back or feel stiff and sore, don't wait a minute longer. Apply a small quantity of Mexican Mustang Lintiment right opposite the sore or aching spot—in almost a jiffy it will penetrate through the skin and soothe and calm the pain. Your sense of comfort and relief will be great.

The remarkable penetrating power of Mexican Mustang Lintiment is the reason why it quiets and soothes pain even in obstinate cases of long standing and where other applications have failed. This wonderful liniment also heals cuts, burns and wounds and so makes a valuable remedy to have in the house at all times. All druggists and wholesalers sell Mustang Lintiment or can get it for you.

How Doctors Treat Colds and the Flu

To break up a cold overnight or to cut short an attack of grippe, influenza, sore throat or tonsillitis, physicians and druggists are now recommending Calotabs, the purified and refined calomel compound tablet that gives you the effects of calomel and salts combined, without the unpleasant effects of either.

One or two Calotabs at bed-time with a swallow of water,—that's all. No salts, no nausea nor the slightest interference with your eating, work or pleasure. Next morning your cold has vanished, your system is thoroughly purified and you are feeling fine with a hearty appetite for breakfast. Eat what you please,—no danger.

Get a family package, containing full directions, only 35 cents. At any drug store. (adv)

You get that rich mellow flavor only in PEPSI-COLA.

Price and Quality!

These are two very important factors in the plans of the farmer for the coming season. Points that must be decided in the proper manner or a loss will be sustained. The ordinary person, in order to save a few dollars at the present, is likely to buy according to price and let quality be a second consideration. This is as true in buying fertilizers as in any commodity, yet the risk is greater in this one article than in any other thing the farmer buys.

EVERYTHING for the farmer's future really depends on the quality of fertilizer he buys. His crops depend on the fertilizer and the farmers depends on the money he receives from his crops to live. There is only one way to buy such an important article as fertilizer and THAT IS TO BUY QUALITY.

is known for its quality. It produces a larger crop per acre with the use of less fertilizer than any other brand. This has been tested. It is a fact. With the use of the same amount per acre as any other brand JOSEY'S will produce a crop in proportion to the amount used—but always larger than any other brand. That is why JOSEY'S should be bought this year in preference to some other brand which costs less at the time of purchase, but costs more when results are considered.
