Mlovertiteless these two acte have tended to atate unigmel, for where wealth has centralised, the people have heen able to provide for
lopeor tern, hut in the poorer dis
tricts, they have had to content them arictis, they have had to shonths term, ex-
solver perience has shown.
At this rate of progros, and if the pregent method of. increasing the sehooi
nt
nt least nine
is followed, it will take at 'least nine years to reach an av-
erage rural achool term of eight months, and even so many of these mehools will atill be many oension for only six monthe in the year. In 1926, 35 per cent of the rural
white children and 81.7 per cent white children and 81.7 per cent of
the rural colored ehildren
vided with as minimum sehool tereof 8 months. No eity white ehild and only a 2.1 per cent of eity colored ehildren attended school for only a six months term, statistics show.
New New Hanover county has the dis-
tinetion of being the only tinetion of being the only county In
the state which gives all its ehildren, white and colored, rural and eity, an opportunity to attend achool eight months in the year. Seven
counties, Now Hanowe, y. counties, New Hanover, Edreeombe, Currituck, Cates, Pamlios, Vance
and Wilson have an eleht months and wison have an elight montre 29 counties provide as much as 75 per cent of their white pupils with a minimum torm of eleght months. In 1923, there were only 16 counties in this group. In 49 counties, no colored children had opportunity to at-
tend achool for an eleght monthrs term.
These facts indicate that while there is a very definite tendency for the people of the state to extend the school term beyond the required sis months, this method also tends to
make more unequal the opportunities of the childres to secure an eduties of the chidrea to secure an edu-
eation. It gives to the child born in the community where wealth is centralized a greater opportunity than the one living in the less vealthy seetionit of the state. To those who have been following closely the trend
of the education situation in the state, it is the answer to the question of the unpreparedness of many children to enter higher institutions. A six numth's term will not give a child the necessary thorough founda--
tion upon which to base any higher tion upon which to base any higher
learning or study he may undertake

How to read Percentages
Were Dodge Brothers to sell 100 motor cars one year and 200 motor cars the next, they could $100 \%$ in a single y aar. Yct they would only have

In other words, PERCENTAGE of annual gain is not conclusive. The NUMBER of cars sold is the true test.
That Dodge Brothers sales in 1926 showed an
increase of $27.6 \%$ over 1925 is not the MAJOR fact to consider-striking as it is.
But that Dodge Brothers sold 259,967 cars in 71,797 gole in in 1926 soid 332, , 190 a gain of grow th that atinda out hike a tower on the sky. line of the industry.
