 Beginning at a stake and pointers R. E. Bunker's corner, thence N. 58 deg. W. 5.10 chs. to a post oak, thence N. 45 deg. W. 3.50 chs. to a stake near a maple on East bank of creek, thence N. 68 deg. W. 6 chs. to a maple on the branch, thence N. 42 deg. W. 2 chs. to a spring, thence S. 70 deg. W. 16.70 chs. to a white oak, R. E. Bunker's corner, thence S. 30 deg. W. 4.90 chs. to a sourwood, then N. 14 chs. to a hickory, Herring's corner, then E. 26.70 chs. to a red oak, then N. 17.50 chs. to a stake, then E. down a ditch 6 chs. to a stake, thence N. 3.50 chs. to the river on west bank, then down the center of Stuarts Creek to a birch corner of lot No. 7, then N. 75 deg. W. 14.50 chs. to the beginning, also a perpetual right of way across Stuarts Creek at the old ford and runs N. 19 deg. E. 2 chs. thence N. 75 deg. E. to the Dobson road taking 7 ft. from lot No. 4 and 5 each making a road 14 ft. wide to the Dobson road.
 Sale made to satisfy an indebtedness of \$2100.00 principal, interest and cost of sale to add.
 This March 1, 1927.
 EDW. M. LINVILLE, Trustee.

Pola Negri
 Pola Negri's real name is Apollonia Chalapuz. She chose the surname because of her great love for the Polish translations of the Italian verses of Ada Negri. Pola was born in Sramberg, Poland. She graduated from a dramatic school. She wrote and directed her first picture; also played the leading role, "Love and Passion," she called it. Her many successes are well known. She will soon be seen in her latest picture, "Hotel Imperial."

WHEN I WAS TWENTY-ONE
 BY JOSEPH KAYE

At twenty-one Francis Wilson sang and danced in the varieties.
AT THIS time, my partner, Macklin, and I originated a new type of song and dance, combining, we believed, the lightness of execution of two celebrated vaudevillians of the period, Dilehanty and Hengler, and the clever acrobatics of a dancer named Charles Walters, who was with a company headed by Tony Pastor.
 "We two boys practiced acrobatics on the outskirts of Indianapolis, laboring diligently to acquire the 'flip flops' and 'neck springs' essential for our performance. We may not have been as skillful acrobats as Kean and Forrest were in their early days, but what we learned was enough. It served.
 "For many years Macklin and I were able to command a salary of a hundred and fifty dollars a week each, a princely sum for those days.—Francis Wilson."
TODAY—Francis Wilson, at the age of seventy-one, is one of the most celebrated actors in America. He has retired from the stage, but he has left behind him the record of a brilliant career. He was first famous as a player in light opera and then became equally popular as a dramatic artist.
 A few years ago he was president of the Actors' Equity association, and his guidance helped to make it the powerful organization it now is.

 The people of Azzizia, a desert village in Tripoli, North Africa, are forced to live in underground dwellings, reached by tunnels through the rock, in order to withstand the temperature of 136 degrees Fahrenheit.
 The oldest institution of learning in the New World is the University of San Marcos at Lima, Peru, founded under Pizarro in 1551.

Credulous Queen Got Loan With Charlatan
 Elizabeth, though so severely conscious of her charms that she was nothing incongruous in the idea of a husband young enough to be her son, none the less alighted at the prospect of old age, and clutched at any project likely to avert it. A wily Dutchman, having knowledge of the queen's vanity and love of money, lured her with promises of a wonderful elixir which not only would insure perpetual youth, but also transmute base metal into gold. Elizabeth, lending a credulously hopeful ear to these attractive suggestions, provided the magician with a laboratory at Somerset house and bade him proceed with all possible speed. The alchemist set up his crucibles; made a prodigious amount of noise; improvised divers unpleasant smells, but produced nothing of material value.
 Elizabeth became impatient; unwillingly she saw the crow's feet forming round her eyes and the glory departing from her red-gold hair; urgently she wanted the elixir.
 The Dutchman made more noise and worse smells, but no elixir. Elizabeth lost her temper. The magician received an ultimatum—the elixir or the Tower—noise and smells no longer availed him, and to the Tower forthwith he departed.—From "Queen Elizabeth's Maids of Honor," by Violet A. Wilson.

Mankind's Heavy Debt to the Humble Burro
 The burro is a plodder, but he has done much toward development of America, especially in western states, asserts a writer in the Kansas City Times. He has carried timber, plaster and nails into the desert for houses, packed gold and silver and saved men's lives.
 Virtually every important ore deposit between Denver on the north and Guanajuato on the south, the Missouri river on the east and California on the west owes its discovery to the assistance given to man by the burro.
 He has several characteristics that qualify him for a hard life. He can be driven, but not led. He knows a straight line is the shortest distance between two water holes, and he can find and follow that line in country he has never seen before. He can live on vegetation that a horse or mule or camel would not attempt to eat. He knows more about man than man knows about him; any prospector will admit this, declaring his own pet burro has more sense than any human partner he ever had.

Gems Rarely Seen
 Many of the most famous collections of gems in the United States have not seen the light of social function, nor even the less romantic light of day for 20 years. They belong to old families, the members of which have lost their taste for expensive adornment, but do not wish to dispose of their possessions. It is only occasionally upon the settlement of such an estate that a really rare collection is thrown on the market. Owing to a peculiarity of the market value of these stones, most of them are sold to European purchasers, says the Saturday Evening Post, for the old-time gems were cut with as small waste as possible with little regard to shape, and Americans demand regularity of facet and brilliancy.

Hang Pictures Carefully
 Pictures carefully chosen and correctly hung do much to bring interest and charm to the home. If one has a particularly beautiful painting or etching, it should receive the place of prominence. Its hanging should be invisible, as cords and fasteners detract from the artistic value of the picture itself. Small pictures may be grouped successfully, but always should be placed against a wall space where they will not appear to be overcrowded. If a picture has strong color appeal, hang it where there will be nothing to contrast unfavorably with the color emphasized.

First Motor Cycle
 The earliest known attempt at a two-wheeled vehicle which would proceed under its own power is said to have been made by W. W. Austin of Winthrop, Mass., in 1868. It was propelled by a coal-burning steam engine. Other more or less similar affairs followed in 1894 and 1895. In 1895 a cycle propelled by a combustion engine using gasoline was exhibited at Madison Square garden, in New York city. This has been called, the first appearance of the motor cycle in the form in which it is known today.

Climate and Colds
 While every one has his own belief or superstition about common colds, recent investigations have shown that these beliefs are without scientific basis, says Hygeia Magazine. Over-exercise, cold baths, loss of sleep, drafts, kinds of underwear worn, kinds of shoes worn in wet weather, mouth breathing, sweating after exercise, coal stoves, steam heat, lack of heat, ventilation and climate did not seem to influence in any way the number of colds caught by the subjects.

Keep the Mind Open
 It is well always to be open-minded. Necessary is it, however, to distinguish between what is good and what is bad. Too many people fall so to do, opening their minds to let in the wrong kind of stuff. Such people retrograde instead of progress.—Grit.

How It Started
 By JEAN NEWTON
"THE CHAFF FROM THE WHEAT"

TO SEPARATE the chaff from the wheat" is a phrase that is frequently heard in modern speech to express distinguishing between the false and the true, the worthy and the worthless.
 Chaff is the straw and other waste in wheat and grains which by threshing and winnowing are sifted down and removed to purify and prepare the harvest for the process by which it becomes the "staff of life," the bread on our table. The first step is "separating the chaff from the wheat," the refuse from the food kernel.
 From the parlance of the farm the term found its way into general speech where the mediator is an argument, in an effort to sift the matter to useless talk and get down to fundamental facts, will sometimes say: "We must separate the chaff from the wheat."

BAD SPELLS
 Of Backache and Weakness Helped by Cardui.
 Because she wants other women to know about Cardui, Mrs. Ina Mae Jarright, Route No. 2, Troy, Ala., says this:
 "Mostly, I was afflicted with bad spells of backache. At times I felt as if my back would break. I would drag one foot after another, in a helpless sort of a way, and once I got down in bed.
 "My husband told me about Cardui and got me a bottle. I soon found out what a fine medicine it was. Ever since my first experiences with it, I have continued taking it for many troubles and, after a few bottles, I have always been well."

Who Will Settle Your Estate—And How?
 What more vitally important matter can claim your attention than the conservation, management, and distribution of your estate?
 Why not enjoy the satisfaction and peace of mind you cannot feel until this matter is settled?
 Settle it now—as you want it settled—by expressing your plans and desires in a will, and naming this bank executor of the will to carry out your purposes.
 You know the risk involved by delay. Why needlessly run that risk?
 Discuss the subject now, in confidence and without obligation, with us.

House Wiring Campaign Will End on March 21st
 Liberal Financing Plan of Southern Public Utilities Company To Be Withdrawn : : : : :
 The liberal financing plan which we have been offering to customers and prospective customers on our lines will extend through March 21st. It will be withdrawn at the close of business on that day.
 Under this offer more than 200 families in Mount Airy and its suburbs who have not heretofore enjoyed the advantages and comforts of electric service have been enabled to wire their homes and are today enjoying this service. The plan itself is very simple. The owner of the home selects the electrical contractor whom he desires to do his work. The contractor makes an estimate of the cost of the wiring and submits his bid. This bid must be accepted by the home owner and approved by our manager. The work is done and the Southern Public Utilities Company advances the amount of the contract so that the contractor gets his money immediately and the customer gets the advantage of a cash price. The cost of the installation is then divided into 12 parts and one-twelfth is repaid to the utilities company each month by the customer along with the electric light bill.
 There are quite a number of families on existing lines in Mount Airy still who are using disagreeable, dangerous and inefficient oil lamps and are depriving themselves not only of electric light but of the other incidentals of electric service. Electric service is more than mere electric light. Many customers would prefer to do without electric light even than to be deprived of the comfort and satisfaction that comes through the use of electric irons and other electrical appliances.
 For the benefit of those who have not yet had their homes wired and who desire to give their wives and families the advantages of electric service we are holding our house-wiring offer open until Monday, March 21st. Several days are required to secure estimates and make contracts. We would therefore urge those who are interested to act immediately in order that all steps necessary may be taken before this offer is withdrawn.
