Hupp	11,811	13,117
Paige	5,978	13,892
Nash	Not Available	
Packard	Not Available	
Pearless	Not Available	

## YOU CAN'T DISPUTE THESE FACTS

And the facts prove that Buick and Chevrolet are Nationally favored by Production Records

In the first three months of 1927 General Motors sold 329,310 cars to dealers. This is 34.7% of the entire output of motor vehicles of United States and Canada, 151.8% of the Ford production for the period, and about 109% of the first quarter output of Hudson, Studebaker, Willys-Overland, Nash, Chrysler, Dodge Brothers, and Hupp Motor Car combined. It represents a gain of 46% over

the corporation's sales to dealers in the corresponding quarter of 1926 while the total business of Studebaker, Dodge Brothers, Ford, Hupp, Paige and practically all the smaller makers (except Auburn) dropped off. For the first time General Motors sold more Chevrolets (267,393) than Ford sold Fords (216,900). Buick sales were slightly in excess of those of Studebaker and Nash combined.
