

# PURITY INSURANCE

When Drinking  
Bottled Drinks  
From Our Plant  
You Are Fully  
Protected

## Never Touched By Human Hands

With the installation of the last that can be bought in bottling equipment we are now prepared to insure absolute purity in all our bottled drinks. You won't have to worry about any foreign substance being in our bottles. New machinery takes them from the crates, and the bottles are never touched by human hands until the crown is sealed on top with the drink automatically delivered to the case.

All bottles are thoroughly soaked and brushed both inside and outside with fast revolving brushes, and later rinsed through two high power streams of clear, cold, filtered water and go to the automatic bottler free from contact with any human agency.

Never before has there been such precaution taken to put out a pure and absolutely sanitary drink as with the equipment we have just installed.

## Visit Our New Plant

In our new quarters on Moore Avenue, just opposite the City Hall, we are amply able to supply the public with the leading drinks that are on the market. The public is urgently requested to visit us in our new location and observe for itself the conditions under which all our drinks are bottled. When you once see the precaution and the absolute purity that is adhered to you'll agree with us that no purer product is possible to produce. See the automatic machines, bring the ladies and children, we want all to look over our new plant.
