

Learn All About The NEW FORD CAR

FRIDAY, Dec. 2nd, At

GRANITE CITY MOTOR CO.

The minute you learn about it you will realize that it is not a mere refinement of the former Model T Ford, but—

The NEW FORD is A NEW Car

From the Radiator Cap to the Rear Axle

Many features of it are exclusive Ford developments. Some are wholly new in automobile practice. There is nothing like it in quality and price.

And It Will Sell At A Surprisingly Low Price

Some of the Features of the NEW FORD:

Unusual beauty of line and color, with six body types to select from.

Has a 40 horse power engine.

Will do 55 and 60 miles an hour with ease, and has made 65 on road tests.

It is quiet and smooth running and quick on the get-away.

Has specially designed mechanical 4-wheel brakes.

It has hydraulic shock absorbers.

It has standard, selective gear shift.

Runs 20 to 30 miles on a gallon of gasoline, depending on your speed.

Has new pump, splash and gravity oil system.

Has multiple dry-disc clutch.

Cooling is by pump and thermo-syphon.

Has new battery, coil and distributor ignition.

Has irreversible steering gear.

Torque tube is all steel and seamless.

Has one-piece, welded, steel spoke wheels.

Has three-quarters-floating rear axle in a forged-steel housing.

Has theft-proof combination steering gear and ignition lock.

Steel forgings are used throughout except, of course, for the engine castings. More steel forgings, in fact, are used in the new Ford than in almost any other car, regardless of price.
