RE-ROOF OVER THE OLD ROOF

The 5 POINTS of an Edgwood Home

NOTE THE DIFFERENCE IN THE GRAIN OF THE WOOD. EDGWOOD RED CEDAR SHINGLE. FLAT GRAIN RED CEDAR SHINGLE. The EDGWOOD Red Cedar Shingle is a 300% perfect shingle... 100% heart wood, 100% clear, 100% edgegrain.

WHEN you build a home, you want the best value for your money... smart modern beauty, of course... comfort which makes home welcome on coldest winter evenings and a cool retreat when the mercury flirts with 90... a home which keeps its neat, trim appearance for years without repairs...

- 1. APPEARANCE: Thick butts give soft highlights and shadow lines. EDGWOODS lend themselves to all forms of home architecture. 2. DURABILITY: Naturally impregnated with rot-resisting oils, EDGWOODS laid with a zinc or copper nail last for fifty years or more. 3. INSULATION: Your EDGWOOD home has from 10 to 47 per cent greater insulation than other standard exterior building materials. 4. ECONOMY: EDGWOOD Shingles are low in first cost. Measured in years of service, you save from 15.5 to 225 per cent. The Bureau of Industrial Research states that EDGWOOD Shingles on roof and sidewalls will save the owner of a moderate sized home \$2,427.60 in fuel expenditures over a 30-year period, as compared with a home with eight-inch brick walls and composition roof. 5. SAFETY: Sawn edgegrain, EDGWOOD Shingles cannot warp. They lie tight and flat to the sheathing always. This prevents lodgment of combustible materials and minimizes the fire hazard.
