

WONDERFUL BEAUTY.

SURPASSING GRANDEUR OF THE GREAT PAN-AMERICAN EXPOSITION.

Exquisite Court Settings and Garden Arrangement—Electric and Fountain Effects—Sculpture and Color Decorations—The Exhibit Divisions.

Every day brings nearer to completion the great Pan-American Exposition to be held at Buffalo next year. Every one of the score of colossal buildings is under way, and a number of them are under roof. Thousands of men are at work, and the hammers are playing a merry tattoo that thrills with enthusiasm the thoughtful listener who steps within the gates.

Already one may have a foretaste of the image of exquisite beauty which will spread its wings when spring again stirs to life the sleeping earth next year. In horticulture and floral beauty this Exposition will stand peerless and alone. In several other points it will surpass anything the world has ever seen.

Let me first speak of the court settings. By this is meant a symmetrical placing of the principal large buildings with reference to one another so as to form a system of connecting courts, each with its special features yet each a part of one great, beautiful picture. The principal courts are the Court of Fountains and Plaza, which form a north and south perpendicular and connect with a transverse court called the Esplanade. Two minor courts open into the Esplanade, known as the Court of Cypresses and Court of Lilies. These courts, about 33 acres in area, with the magnificent decorations which will complete their beauty, will give to the eye a vista of exceptional grandeur from whatever point they may be seen.

In sculptural and plastic decorations this Exposition will set a new pattern for patrons to contemplate and adore. The exterior of every building will present a richness of design and delicacy of detail unparalleled in the history of expositions. Majestic statues and costly modeled groups, lacking only life to complete the ideal of their purpose, will guard entrances and bridges or send down their blessings upon the enterprise from lofty domes and towers.

Again, from all the buildings will be diffused a radiance of color that will vie with the brilliant gardens in its agreeable effect upon the eye. Such elaborate color decoration upon the exteriors of a great group of buildings is a distinct departure from the custom observed at former expositions. To the prismatic brilliance of the gardens and the rich tints of the buildings will be added water effects extraordinary in conception and of supreme beauty. In all the courts will be large pools rippling and sparkling under the fantastic activity of numberless fountains. Many of these fountains are to be elaborate sculptured works, with jets of water playing from hundreds of openings.

With all its wonderful beauty by day the Exposition will be like the ceres of tropical America, a flower of the night. Then will it blossom in exquisite perfection. With all the fountains playing amid floating lights upon every golden, rippling pool; with the great cascade shooting in veil-like form from its high niche in the tall electric tower; with more than 200,000 electric lights fringing every building and giving to every jet and ripple of water a fantastic iridescence; with music lending the charm of sweet sounds to the harmony of color and sculpture, flowers, foliage and fountains, the evening scenes at this Exposition will be such as no lover of the beautiful will permit to pass without at least one determined effort to witness them.

Surrounding the main group of buildings and bordered with a double row of trees and grassy banks is a broad and stately canal more than a mile in length. At certain points this canal forms a part of the court vistas, but has more to do with the rich embellishment of that portion of the grounds outside the main buildings. Lagoons that lose themselves amid lawns and gardens tap the main waterway at various intervals, and at the southern side of the Esplanade it broadens into lakes where there have been planted a wonderful variety of water plants to be ready for next year's blossoming. In that part of the great Exposition plot known as Delaware Park is a lake half a mile long, surrounded by wooded banks that will contribute much to the beauty of the Exposition.

So much for the unobscured beauty of this great enterprise. Now of the more practical side. The exhibits to be contained in the buildings will include nearly everything of commercial value or industrial utility. The divisions, each of them a considerable exhibition in itself, are as follows: Electricity and electrical appliances; fine Chamberlain's Cough Remedy a Great Favorite.

The soothing and healing properties of this remedy, its pleasant taste and prompt and permanent cures have made it a great favorite with people everywhere. It is especially prized by mothers of small children for colds, croup and whooping cough, as it always affords quick relief, and as it contains no opium or other harmful drug, it may be given as confidently to a baby as to an adult. For sale by J. E. Hood, druggist.

arts—painting, sculpture, decoration; graphic arts—typography, lithography, steel and copperplate printing, photo-mechanical processes, drawing, engraving and bookbinding; liberal arts—education, engineering, public works, constructive architecture, hygiene and sanitation, music and the drama; ethnology, archaeology, progress of labor and invention, isolated and collective exhibits; agriculture, food and its accessories, agricultural machinery and appliances; horticulture, viticulture, floriculture; live stock—horses, cattle, sheep, swine, pet stock; forestry and forest products, fish, fisheries, fish products and apparatus for fishing; mines and metallurgy, machinery, manufactures, transportation exhibits, railroads, vessels, vehicles, ordnance; exhibits from the Hawaiian Islands, Porto Rico, Tutula, Guam, and the Philippine Islands; large exhibits by the National Government from all departments, and special exhibits from Cuba, Mexico, Brazil, Canada and from various states and countries of Central and South America.

To describe properly a single one of the exhibit divisions would require a large space. It is the aim of the superintendents each to have the very latest productions, so that the highest development in the western hemisphere in all lines of effort may be shown to advantage and to the profit of all.

The Exposition will thus offer, through its exhibitors, the western world in the latest aspect of its civilization. Owing to the nearness of Niagara Falls, and having the unlimited power developed there at its disposal, the Exposition will give particular attention to electricity. Of the Niagara power 5,000 horsepower is under contract, and about 4,000 horsepower more will be developed upon the grounds. This large volume of power for the uses of the Exposition is sufficient alone to drive the machinery of a great city.

Buffalo is preparing to receive hospitably millions of visitors next year and the twenty-six railroads that enter the city are making ready to meet the extra requirements of a tremendous business which the next year promises to bring.

MARK BENNETT.

The Senate's Hole in the Wall.
When the nineteenth century was as yet only half grown, senators applied customarily for their toddies at the so-called Hole in the Wall, a small circular room just off the postoffice of the upper house. The latter body, as will be remembered, then occupied what is now the chamber of the supreme court, and the postoffice was across the main corridor of the building on the same floor. When a wearer of the toga found himself in need of a "shifter," he had only to cross over to the mails department and pass through it to the little circular room aforesaid, which was about the size of a pantry.

The Hole in the Wall was the first senate restaurant, and the bill of fare for edibles was short, though to the point. There were ham, guaranteed to have been smoked for six months, a veritable sublimation of the pork product; likewise corned beef and bread and cheese, but very little else. They served, however, as an accompaniment for the fluids, and when the Hole was crowded, as was often the case, senators ate their sandwiches outside, in the postoffice.—Washington Post.

He Obeyed.
Murat Halstead, the great journalist of war times, went to General William T. Sherman's headquarters once for the "latest news from the front." Halstead was armed with many fine introductory letters, but decided to rely mainly on one given him by Thomas Ewing, Sherman's brother-in-law. He found the general and presented Ewing's letter. The general opened it somewhat impatiently, read a few lines, folded it and said:

"Ah, you come from Ewing, and you desire to have 'all the latest news,' the 'next probable move' of our army, eh? Well, there's a train leaving this town for Cincinnati at 2 o'clock. Here, take this ticket, and step over there and get your dinner, and then get on that train."

"Well, but, General Sherman"—began the newspaper man. But Sherman waved him off.

"Go over and get a good dinner; we have plenty and always strive to treat our friends well. But be sure you don't miss that 2 o'clock train!" And Halstead wisely obeyed.

When you want a pleasant physic try the new remedy, Chamberlain's Stomach and Liver Tablets. They are easy to take and pleasant in effect. Price, 25 cents. Samples free at J. E. Hood's drug store.

Undertaker and Embalmer.

Will give competent service to all so unfortunate as to need such service. Just simply give me notice and all details will be attended to.

Caskets of all qualities carried in stock, and by patronizing my establishment you will get competent services at as low prices as from anyone.

I respectfully solicit a continuance of the patronage of the people in this section. Very truly,

GEO. B. WEBB

THE MOUNTAIN LION.
Over bare ridges, through dense thickets gliding,
Steady and sure do I follow my prey!
Along the dark canyons in tangled ferns hiding,
Relentless I trail, and remorseless I slay!
Strong are my sinews and trackless my winding;
Noiseless as dew in the fall of my paw;
Breathed in the folds of their velvety binding
Tougher and sharper than steel are my claws.
Swift as a sword are my eyes in their seeking,
Piercing the day or the blackest of nights;
Steeled is my muzzle, with blood often reeking;
Ready my teeth for the foeman who fights.
I am a king; dost thou ask me to battle?
Gather thy strength, for I give not a sign!
What! Art thou sounding so soon the death rattle?
I drink to thy health in the blood that was thine!
—Alfred I. Townsend in Overland Monthly.

Clean Bread
Can't be made by foul hands and clean, pure blood can't be made by a foul stomach. The blood is made by the stomach and organs of digestion and nutrition. When these are diseased they contaminate every drop of blood made from the food they act upon, and this contamination is carried through the whole body. It may settle in the liver, kidneys, heart or lungs but the root of the disease is in the stomach. Care the stomach and you cure the disease.
Dr. Pierce's Golden Medical Discovery cures diseases of the organs of digestion and nutrition perfectly and permanently. It purifies the blood, and so by curing the cause of disease, cures many forms of disease in organs remote from the stomach.
"For the past sixteen years I have had torpid liver and indigestion and tried many doctors and patent medicines but I could not get a cure," writes Mrs. Simeon Suggs, of Clyde, Sabine Parish, La. "Three months ago I thought I would try Dr. R. V. Pierce's Golden Medical Discovery and his 'Pleasant Pellets.' I got six bottles of each and I received a good result in a week, and to-day I am cured sound and well. The symptoms were coated tongue, specks before the eyes, disposed to be cross and irritable, foul stomach, bad taste in the mouth, tired feeling, a feeling of dread or fear, headache, yellow skin, etc. These symptoms did not all appear at once. If sufferers from such troubles will take Doctor Pierce's Golden Medical Discovery and 'Pleasant Pellets' as directed in pamphlets wrapping bottles, they will bring back the bloom of life as it did with me."
Dr. Pierce's Pleasant Pellets cure biliousness and sick headache.

WINE OF CARDUI
How a Woman Suffers.
HOWELL, IND., Nov. 28.
I will always praise Wine of Cardui. It has done me more good than all the medicines I have ever taken in my life. Please send a book about female diseases to the ladies whose names I enclose.
Mrs. MINNIE STODGHILL
McLREE'S Wine of Cardui
It isn't necessary for a woman to give particulars. When she says she has "female troubles", other women know what that means. It means days and nights of endless suffering. It means headaches which no tongue can describe. It means that terrible bearing and dragging down in the lower abdomen. It means agonizing backache, and shoulder ache, and arm ache, and aches in the lower limbs. It means nerves on edge—the blues—despondency and loss of hope. It means debilitating drains that the doctors call leucorrhoea. It means martyrdom—sometimes even death seems preferable. And still Wine of Cardui will utterly put those diseases and pains to rout. It has cured thousands of cases when nothing else on earth would. To the budding woman, to the bride, to the wife, to the expectant mother, to those going through the Change of Life, this Vegetable Wine is a blessing.
Druggists Sell Large Bottles for \$1.00.
WINE OF CARDUI

YUCATAN CHILL TONIC
For Chills, Fevers
and all MALARIAL DISEASES take
YUCATAN CHILL TONIC (Improved.)
Superior to all Tasteless Tonics.
The people will quickly recognize the Superior Qualities of YUCATAN (Improved) over the many so-called Tasteless Tonics. They are unreliable and the dose is uncertain. Yucatan Chill Tonic (Improved) requires no shaking of the bottle. The medicine is thoroughly dissolved; each dose contains the same proportion of medicine. Formed on each bottle, consisting of QUININE which drives out malarial, IRON which tones up the system and PEPPERS which produces a hearty appetite. Any physician or druggist will tell you there is NO BETTER PRESCRIPTION FOR MALARIA and its kindred diseases. Pleasant to take; does not sicken or nauseate, and is acceptable to the most delicate stomachs. PRICE, 50 CENTS. For sale by all druggists.
