We Can Make It.

THE FREE PRESS was the recipient today of a well made plug of tobacco, the product of a Lenoir county boy's ingenuity.

The following letter explains itself:

MR. EDITOR:—Kinston is the king of all towns, while she is the first to protect the interest of the farmer, let her still hold the banner, let her business men get together and organize a stock company to manufacture snuff and plug tobacco.

We have the raw material, the labor, the consumers. The machinery and experience is all we like, let us have that and get down to business at once. Inclosed you find a plug of tobacco made by a Lenoir county boy who has not entered his teens and has never been 30 miles from home. You see from what others have done, we can do also.

As above stated let the business men get together, organize, get machinery put it in some of those warehouses and send out agents to canvass the county and adjoining counties and let the farmers take stock by putting in their leaf tobacco (as they have no money). It would be much better to do this than to give it to a trust company that would not even appreciate it.

LENOIR COUNTY CLOD HOPPER.

Takes Two.

Durham Herald.

It takes two to make a bargain, and if the farmers will not sell their tobacco at a price which the farmers demand if it will not even appreciate it.

SMALLPOX IN PROSPECT.

Raleigh, Aug. 4.—In the course of a talk today about smallpox Dr. Lewis took occasion to say that he expected to see an even more extensive outbreak of it in the State when cold weather comes.

By the carelessness of the general public it really appears that they do not care whether they have this disease or not; this in face of the official statement that in the past four years there have been thousands of cases and nearly two hundred deaths in the State.
