

THE GREENSBORO REUNION.

The Greensboro reunion will be a notable event in the history of North Carolina. Many of the North State's wandering sons and grandsons will on that occasion return and find a warm welcome from their old mother.

There will be an interchange of ideas and a quickening that comes only from personal contact. The State is not what it was even five years ago, but improvement is manifested along many lines. Our people as a whole, have become richer, more contented, and our citizenship has become better.

All North Carolinians should, if possible, take advantage of this great event.

The following is the official program:

SUNDAY, OCT. 11TH.
Reunion sermons by Rev. A. C. Dixon, D. D., of Boston (Cleveland county); and Rev. Walter W. Moore, D. D., of Richmond (Mecklenburg county).

MONDAY, OCT. 12TH.
Hon. M. W. Ransom will preside over the session of the reunion.

Address of welcome by his excellency, Gov. Charles B. Aycock.

Responses to addresses of welcome by representatives of North Carolina societies in New York, Philadelphia, Baltimore, Richmond, Atlanta and elsewhere.

Receptions at various headquarters, including headquarters of the University, Agricultural and Mechanical college, Wake Forest, Trinity, Guilford and other colleges.

TUESDAY, OCT. 13TH. AT GULFORD BATTLE GROUND.

Addresses by Hon. Hoke Smith (Lincoln), Georgia.

Mr. Walter H. Page (Wake), New York.

Hon. Joseph M. Dixon (Alamance), Montana.

Hon. L. R. Tyson, (Pitt), Tennessee.

Dr. Paul Barringer, Virginia.

Dr. E. A. Alderman, Louisiana.

Hon. Hannis Taylor, Alabama.

Tuesday night general reception.

MURPHY WAS AWAKE.

That was a fine piece of politics executed by Charlie Murphy, leader of Tammany, when he robbed the fusion ticket of two of its strongest members. He deliberately took Comptroller Grout and President of the Board of Aldermen Fornes and made them shining lights on the Tammany ticket after they had been duly renominated by the fusionists.

Tammany knew that fusion was composed of about a dozen separate elements, and the principle of which are Republicans, Independents and anti-Tammany Democrats. To a man up a tree it would appear to be an easy thing to create dissension in such a composite body.

Murphy saw his opportunity and took advantage of it.

Grout and Fornes are both good Democrats, and being on the fusion ticket during the last campaign were ardently supported by the Republicans. This year fusion renominated them. But Tammany nominated them too, and that was more than Platt and his followers could stand.

Consequently there is turmoil in the Republican camp. They are afraid to throw Grout and Fornes overboard, because that would "seem like politics," and they promised the Citizens' Union not to play politics. The comptroller and president are too heavy on the Republican stomach to be easily digested.

So that is the way things stand in the metropolis. Murphy may not win, but he is not asleep.

Last spring when President Roosevelt went out to St. Louis to take part in the dedication ceremonies he met Cleveland out there on the same mission. The reception given the ex-president was too much for Teddy, and he said some naughty things about the exposition management.

The other day the college of the city of New York inaugurated a new president. Grover was put down on the program to "speechify" and Teddy was also invited to participate. But nothing could induce the rough rider to attend.

As the Gastonia Gazette says, in the presence of as big a man as Cleveland, it is no wonder that Roosevelt feels small.

The prohibition election called to be held in Salisbury November 3rd, has been postponed until November 12th. This order was issued at a called meeting of the board of aldermen in order that a new registration may be had.

Chamberlain's Cough Remedy.

No one who is acquainted with its good qualities can be surprised at the great popularity of Chamberlain's Cough Remedy. It not only cures colds and grip effectually and permanently, but prevents these diseases from resulting in pneumonia. It is also a certain cure for croup. Whooping cough is not dangerous when this remedy is given. It contains no opium or other harmful substance and may be given as confidently to a baby as to an adult. It is also pleasant to take. When all of these facts are taken into consideration it is not surprising that people in foreign lands, as well as at home, esteem this remedy very highly and very few are willing to take any other after having once used it. For sale by J. E. Hood & Co.

THE USE AND ABUSE OF SALT

By HORACE BIANCHON of the Hospital of the City of Paris

HERE is a widespread belief that salt is a most important food; that it is indispensable to the development and free play of the intellectual faculties. This belief is strengthened by the fact that in those regions of the earth where salt is not to be found it is imported from other places at great expense. Its use is universal. While in certain diseases there is an excessive secretion of salt, in others the same element is retained by the tissues in an abnormal degree. If persons so affected are given salt in excess it will be found that the cells instead of throwing the salt off again as waste matter retain it and it accumulates in the tissues. Such is the case with those whose kidneys do not perform their function properly.

This is what happens under these conditions: The tissues, becoming saturated with salt, absorb water from the blood, and this infiltration causes what doctors term "edema."

Formerly doctors prescribed milk as a remedy for edema and put their patients on an exclusive milk diet. But a milk diet, in many instances at least, is a cruel punishment.

At this juncture Dr. Vidal comes before the medical world and shows by a series of experiments as precise as they are ingenious that milk is beneficial to the heart and kidneys subject to edema, for the reason that it is a food deficient in salt. For instance, if a person suffering from Bright's disease is given milk to which a quantity of salt has been added it will be found that the inflammation and swelling increase and the patient shows all the symptoms of auto intoxication. Now give him bread and meat prepared so as to be most easily digested, but without salt, the swelling and inflammation will disappear, the kidneys will perform their function and the general condition of the patient will improve in a short while.

These experiments are based on the best theoretical knowledge and practical experiments. In the future the great problem in therapeutics and hygiene will be, as it already is, just how far to restrict the use of salt in the case of sufferers from rheumatism, dyspepsia, nervousness, gout, heart disease and kidney troubles. The abuse of the use of salt has as much to do with causing the aging of our tissues as has the abusive use of alcoholic stimulants.

FAITHFUL EMPLOYEES SHOULD BE MADE PARTNERS

By ANDREW CARNEGIE

THE great secret of success in business of all kinds, and especially in manufacturing, where a small saving in each process means fortune, is a LIBERAL DIVISION OF PROFITS among the men who help to make them, and the wider distribution the better. There lie latent unsuspected powers in willing men around us which only need appreciation and development to produce surprising results. Money rewards alone will not, however, insure these, for to the most sensitive and ambitious natures there must be the note of sympathy, appreciation, friendship. Genius is sensitive in all its forms, and it is unusual, not ordinary, ability that tells even in practical affairs.

YOU MUST CAPTURE AND KEEP THE HEART OF THE ORIGINAL AND SUPREME ABLE MAN BEFORE HIS BRAIN CAN DO ITS BEST.

Indeed this law has no limits. Even the mere laborer becomes more efficient as regard for his employer grows. Hand service or head service, it is the heart service that counts.

One of the chief sources of whatever success may have attended the Carnegie Steel company was undoubtedly its policy of MAKING NUMEROUS PARTNERS FROM AMONG THE ABLEST OF ITS MEN and interesting so many others of ability in results. I strongly recommend this plan to the members of the institute engaged in business, believing that in these days of threatened exhausting competition it will be the concerns which adopt this plan, other things being equal, which will survive and flourish.

HOW THE WORLD CAN BE SAVED

By E. BENJAMIN ANDREWS, Chancellor of the University of Nebraska.

IN compulsory education lies the only hope for the uplifting of the race. Only through it can we hope that humanity can resist the retrograde tendency which keeps it at a standstill in spite of the efforts of the philanthropists.

SUCH A SYSTEM OF PUBLIC SCHOOLS AS OUR OWN RAISED TO A HIGH DEGREE OF PERFECTION WILL CREATE A CONTEMPT AMONG THE POVERTY STRICKEN INHABITANTS OF THE SLUMS FOR THEIR LOW, GROVELING CANINE CONDITIONS OF LIFE.

Of course other reforms will have to be effected in the schools first. By means of a stringent truant system compulsory education up to the age of fifteen can be enforced. A kindergarten system for children of the poor should be established. The wages of the grade teachers should be raised. The average salary of the teacher in the public schools is inadequate.

The grade teaching should not all be done by women. There should be more men in the lower schools and more women in the colleges. The theory that men are the best teachers in universities and women the best in the grade schools is a fallacy. A careful system of moral education during all the fourteen years of the school period should be established.

SUCH REFORMS AS THESE WILL MAKE THE UNITED STATES A BEACON LIGHT AMONG THE NATIONS. LITTLE BY LITTLE SLUM LIFE WILL BE ERADICATED, AND LITTLE BY LITTLE THE WORLD WILL BE SAVED.

GOOD BLOOD SPEAKS FOR ITSELF

You know when rich, red blood is coursing through the veins, for it shows in the brightness of the eye, the beauty and clearness of the complexion, the smooth, fair skin, and robust, healthy constitution. It is good blood that imparts strength and energy to the body and keeps it in a state of healthfulness and vigor. Good blood is the foundation of good health, and to be physically and mentally sound it must be kept pure and untainted. People with good blood possess strong, steady nerves and are blest with good appetites and digestion, and enjoy sound, refreshing sleep. If we could always maintain the purity of the blood then we might enjoy perpetual health, but it becomes infected and poisoned and most of the ills that afflict humanity and undermine the constitution are caused by an impoverished or polluted condition of this vital fluid.

When the blood is diseased the skin loses its healthy appearance, and the complexion, its freshness and beauty and becomes red and rough and full of pimples and spots. Itching, scaly eruptions, blackheads, boils and rashes break out upon the body when the blood is too poor or too thin and acid, and is not supplying proper nourishment to the system. Debility, poor appetite, bad digestion, restless sleep and nervousness more often come from sluggish, impure blood than any other cause. To build up the blood, restore its lost properties and make it rich and nutritious again is the only rational treatment, and the proper way to get rid of skin troubles. There is no remedy like S. S. S. to accomplish this and it does it promptly and thoroughly. S. S. S. antidotes and removes from the blood all poisons and humors, and restores it to a normal, healthy condition, and invigorates and tones up the general health. When rich, red blood is again flowing through your veins all skin eruptions disappear, the appetite improves, the complexion clears and you get rid of those miserable depressing feelings and nervousness, and enjoy once more the blessings of good health. S. S. S. is nature's remedy for all blood and skin diseases. It contains no minerals whatever, but is guaranteed purely vegetable. Write for free book. No charge for medical advice or other information desired.

I was in wretched health; my blood was in bad order, my gums being very much ulcerated. I began the use of S. S. S., and in a remarkably short time was sound and well. My appetite increased wonderfully and my food agreed with me. I think it is a fine family medicine.

MRS. M. E. DAVIDSON, Rockmart, Ga.

For three years I had Tetter on my hands. Part of the time the disease was in the form of running sores, very painful and causing me much discomfort. Your doctors said the Tetter had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S., and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble.

MRS. L. B. JACKSON, 837 St. Paul St., Kansas City, Kas.
