TODAY IS THE DAY TO GET SEASON TICKETS

The Guarantors Can Only Be Supported by the Purchase of Season Tickets. Meeting Tonight for Reports Committees

The following are the ticket committee for the Chautauqua: E. Y. Speed, chairman; W. E. Parrott, T. V. Moseley, R. E. Mewborn, J. C. Hood, W. D. Hood, Miss Leah Oettinger, Miss Susie Perry, Miss Margaret Goodson, Miss Ann Hyman Harvey.

The guarantors for the 1916 Chautauqua will hold a short meeting tonight in the directors' room of the First National Bank to hear reports from the ticket and steering committees. A full attendance is urged.

A meeting was held last night and the reports showed that a good number of tickets had been sold since the meeting Saturday night. The fund for sale of season tickets, which is applied on the guarantee fund of \$1,100, is yet several hundred dollars short, and unless the people of Kinston come to the support of the guarantors today there will unquestionably be a deficit, which the guarantors will have to make good.

Some of the ticket selling committee reported that they had been told by many people that they expected to take in one or more of the attractions, but did not feel disposed to buy a season ticket. In this connection it should be borne in mind that the purchase of single admission tickets will not be of assistance to the guarantors at all. The season tickets are transferable. Where there are several members of a family or friends who do not desire to take in all the attractions, a season ticket or two can be procured and used by the different ones. In this way not only will the cost of the single admissions be less but the guarantee fund will be boosted.

Now is the time! Today is the day!

These are the guarantors: William Hayes, W. H. O'Berry, N. B. Evans, O. M. Rutledge, E. G. Barrett, C. W. Hartfield, R. L. Patrick, J. F. LaRoque, D. E. Wood, W. B. Douglas, J. F. Taylor, T. V. AGRICULTURAL

Fodder Pulling Out of Date.

The farm demonstration force has set itself to the task of stopping fodder pulling in North Carolina by getting so much other forage grown that it will not be necessary. State Agent Hudson makes the following comparison of the two methods of saving forage. "One method is to pull one blade of fodder by hand at a time. This is not only slow and therefore expensive, but it comes usually in the hottest part of the year. The other way is to grow clover, cowpeas and other leguminous crops and harvest them by horse-power, cutting a swath three or four feet wide, with the blade running almost at lightning speed. Certainly any business farmer will admit, even without testing it, that the latter plan is more economical. It is a question, in other words, of the farmer increasing his work power, and therefore his earning capacity."

Most farmers who pull fodder every year do so not because they are compelled to, but because they are in the habit of doing so. It is now time to get ready to obviate the necessity of having to pull fodder this year.

The best thing to do is to grow some of the splendid crops—cowpeas, soy beans, velvet beans, millet, etc.—that are so well adapted to that purpose. A farmer who does this, a few times will not have to resort to the antiquated method of stripping his corn leaves. It is not only expensive, but very often a few rains will destroy the fodder after it has been pulled, and therefore the farmer loses his forage, his labor, and has also reduced his corn yield. For the heaviest yield of corn leaves of the plant should be left on the stalk until the corn is well matured, say experts of the North Carolina Experiment Station.

The campaign plans will probably be made at today's conference with W. Murray Crane. Hughes disclaims the titles of "justice" and "governor." He requests that he be called plain "Mr." "Undiluted Americanism" will be Hughes' campaign slogan.

RESOURCES NATIONAL BANKS INCREASE FAST

(By the United Press) Washington, June 12.—Resources of National banks in the United States continue to increase rapidly. Their growth in the period between March 7 and May 1, Comptroller Williams announced tonight, was \$256,000,000 pushing the total up to more than fourteen billion dollars.

EXAMINE AND REPAIR YOUR FLUES.

Municipal officials, fire department heads, fire prevention societies, and all others interested in reducing the criminal fire waste, are making minute inspections of flues in accordance with the rules of ordinary prudence and business sagacity.

To be of the most benefit, the inspection should be made before fires are started for warmth and comfort. The need is greater here in the South than in cold climates, because using the flues less, they are usually constructed at less cost and therefore with less care, with consequently more danger.

About 15 per cent of all known causes of fires are traceable to defective flues. Probably the same ratio of "unknown causes" would apply to defective flues. Therefore it is easy to see what this one item alone does towards making a large and needless fire waste.—Mutual Insurance Journal.

SMOKING AND MATCH PRECAUTIONS.

Every one readily admits that to smoke in garages, in bed, or around stables and other places where inflammable material is present, is to deliberately invite disaster. Yet just these practices are ever so frequent, as evidenced by the almost daily reports of fires from this cause in such places.

By the same token it is universally admitted that safety matches can but be the greatest sort of protection from those heavy fire losses so frequently reported from 'the strike anywhere' sort of matches. Experience teaches to use only safety matches and keep them from children and have metal receptacles for burned matches.

REGULATION OF USE OF THE SIDEWALKS BY TEAMSTERS, ETC.

Where Used Necessary Extra Paving Expense Will Be Stood by Property-Owners Without Help From City

City Council at a meeting Monday night principally for the purpose of getting unfinished routine business out of the way, took up the matter of the use of sidewalks by teamsters. Individuals directly interested, as tobacconists, merchants and others, were present and were permitted to address Mayor Pro Tem. Douglass and the aldermen.

Council decided to pass an ordinance, which is to be put through next week as an emergency measure, imposing the following regulations:

Property-owners shall stand the entire expense incurred from extra paving when sidewalks in front of buildings are used for draying. The walks so used shall extend to the curb no matter what the standard width on the street happens to be, and in front of places of business shall be six inches through instead of four. The city will stand its proportionate part of the expense of the paving for only such a width as is the standard for the street.

Drays extending vertically across sidewalks shall be required to load or unload, as the case may be, and move in ten minutes. Parallel with the walk its owner or driver may leave it for 30 minutes. It is not likely that a sidewalk anywhere in the city can be blocked by a dray standing parallel.

A paving petition presented Monday night was tabled until the 19th, when, Council has intimated, the present extra paving program will be wound up so far as passing on petitions and granting new paving are concerned. An ordinance was passed imposing a penalty of \$5 for linemen using spikes in climbing trees.
