**CRANKS CONVENTION
 IS OPENED IN CITY
 BY PACIFIC TODAY**

Sunland, Cal., Sept. 4.—The queer-
 est people in the world gathered here
 today to indulge in the first Cranks
 Convention ever held.

Delegates were called to order by
 Dr. LeRoy H. Fry of Los Angeles,
 who organized the convlave. Every
 crank will be given a chance to ad-
 dress the assemblage of "queer" de-
 legates on that particular theory or
 subject that has made a crank of
 him.

Scores of automobile parties motored
 out from Los Angeles and Pas-
 adena to sit back as spectators, and
 hear the funny people talk.

The convention will last several
 days. No limit has been set. Accom-
 modations were furnished by good
 people of Sunland and Little Land-
 ers, two communities founded on
 idealistic principles.

Beneath the deep blue heavens and
 stars on a generous shock of yellow
 hay the delegates will pass the night.
 The hay has been arranged in spaced
 intervals. The delegates will fur-
 nish their own fare, and for those
 who failed to bring along provender,
 inhabitants of this narrow mountain
 valley will furnish nuts harvested
 from the wild iron nut tree which
 abounds in the valley. The floor of
 the valley is studded with millions
 of round boulders washed down from
 rocky ravines which, viewed from a
 distance, gives the fantastic impres-
 sion of a huge basket of nuts having
 been spilled over the whole region.

Some of the more blase of the spec-
 tators even went so far as to refer to
 this place as "Sunny Ntaland."

One of the surprises of the gather-
 ings was that cranks when they get
 together find they are not cranks at
 all.

Idealists, fatalists, religionists and
 infidels attended in goodly number.
 Several models and blue prints of
 perpetual motion mechanisms were
 exhibited. Many physical culturists
 and sociologists were here to say
 nothing of "unappreciated authors,"
 "professors," and prelates of peace

and preparedness.

There were no women cranks al-
 though feminine delegates were in-
 vited.

**ADDITIONAL TERRITORY
 FREE FROM FEVER TICK**

(Special to The Free Press)

Washington, D. C., Sept. 4.—Ap-
 proximately 9,493 square miles of
 territory in six States is released
 from quarantine on account of the
 Texas-fever cattle tick by an order
 signed by the Secretary of Agricul-
 ture to become effective September
 15. The order releases the last area
 under quarantine in California, adding
 this State to the tick-free list. The
 other territory released consists of
 ten counties in Georgia, 3 in South
 Carolina, 2 in Alabama, 2 whole coun-
 ties and 2 fractional parts of coun-
 ties in Oklahoma, and a portion of 1
 county in Mississippi.

Greater interest in tick eradication
 is being taken throughout the South
 than at any time since the beginning
 of the work co-operatively by the U.
 S. Department of Agriculture and
 the States in 1906.

**ACUTE APPREHENSION
 IN THE COTTON TRADE**

(Special to The Free Press)

New York, Sept. 4.—A great deal
 has happened since our last letter of
 two weeks ago. The drought in the
 western belt has remained practical-
 ly unbroken, thus bringing about the
 situation that was most to be feared,
 namely, acute apprehension on the
 part of the trade over the question of
 supplies for the coming season. In
 order to fully appreciate the situa-
 tion as it exists today it is necessary
 to go back over the July and August
 weather. The most sensational rain-
 fall in the history of the Eastern
 States occurred in July, cutting down
 the crop prospects in those sections,
 but leaving Arkansas, Oklahoma and
 Texas with an excellent outlook the
 first of the month. Rains began to
 be needed, and one of the worst
 droughts in the history of Oklahoma
 and sections of the other two States
 started, which is still under way.
 Two such serious developments have
 seldom, if ever, happened to the
 growing crop. It will be recalled
 that we have pointed out from the
 beginning of the season that the real
 question of fertilizers could not be
 decided until the fruiting of the
 plant was actually witnessed in Au-
 gust.

The government report of the 31st,
 showing a condition of 61.2 per cent,
 or 2.5 below the lowest previous con-
 dition in the history of the Depart-
 ment, that of 1909, can be definitely
 attributed to this question of fertil-
 izers. Neither rains of an excessive
 character, nor dry weather, could fully
 explain these low figures. It is
 not surprising that the market itself
 was thrown into a turmoil, with one
 of the most sensational advances in
 years. Spinners are now thoroughly
 alarmed, and as it is still too early to
 obtain any large amount of actual
 cotton, the trade is rushing to the
 future markets for protection. As
 long as this continues, a period of
 wild fluctuations is inevitable.

It is still too early to even guess
 at the size of the growing crop. A
 good September and October, with a
 late frost, would make all the differ-
 ence in the world. On the other
 hand, there is an old adage in the
 cotton business that seasons are uni-
 form. This season has been unique
 in so many particulars that instead
 of a late frost we might have an ear-
 ly one, but all that rests in the fu-
 ture, and has yet to be determined.
 With the inflation that is a peculiarity
 of conditions in this country, as
 well as abroad, growing out of the
 progress of the war, and the fact
 that cotton in large quantities is ab-
 solutely necessary as a war material,
 it is easy to see that very sensational
 developments are possible if we are
 to have a crop very much below world
 requirements the coming season.

Coffee—The market has reacted
 from the recent advance, but should
 advance again. Believe in purchase
 on the recessions.

Cotton Seed Oil—The oil market
 has been active and irregular on va-
 rying reports as to the situation in
 the Balkans, together with the un-
 certainty over labor questions in this
 country. We rather expect wide
 fluctuations from present prices—both
 up and down.

PARISIAN SAGE
 Puts Hair On Your Head and Helps to
 Keep It There.

What's the use of being bald?
 What sense is there in deliberately
 allowing your hair to turn gray?
 Do you want to look old before
 your time? Give up the thought; old
 age will come all too soon.

Look after your hair. Parisian
 Sage is a scientific preparation that
 supplies hair needs—is just what you
 want. It aims to prevent grayness
 and baldness by putting life and
 nourishment into the hair roots.

Man or woman, no matter how old
 you are, Parisian Sage will help you
 to look younger and more attractive.

Why not go to J. E. Hood & Co.'s
 and get a large bottle today, it will
 not cost more than 50 cents, and your
 money back if it does not cure dan-
 druff, stop falling hair, or itching of
 the scalp. It will make your hair
 luxuriant, bright and beautiful. It
 is a most refreshing, pleasant and
 invigorating hair dressing and ab-
 solutely harmless to the hair and
 scalp.
