Makes Discovery Digging Ditch

Owner of Land Made Rich—Man Digging Ditch Cured of Tenacious Diseases.

STORY A ROMANCE.

People With Stomach, Kidney, Blood, Rheumatic or Skin Affections Relieved.

Acid Iron Mineral (non-alcoholic, natural iron) is taken from a great deposit found upon a poor farmer's place near Hickory, Mississippi and the story of this great gift of nature's, which made the farmer rich and the medical world richer, and makes it possible for people to quickly treat stomach, digestion, kidney, blood and rheumatic complaints at home, makes interesting reading.

An old man while digging a mill race on the Horn Farm, ran across it. He was afflicted with an old fever sore and blood troubles which were considered incurable. During the several weeks digging his feet and legs were wet each day as water gathered and he noticed that this water turned a reddish color caused by mixing of water with the vein of peculiar looking mineral, almost like powder, which had apparently laid

for centuries encased in a marble-like casing of rock and clay.

The sore on his leg began to heal and by the time his work was completed his leg was sound and well. This was considered so very remarkable that an investigation was made and it was found to be like radium, gold, platinum and other wondrous secrets of nature—a natural compound containing inimitable properties in proportions no chemist has attempted to duplicate though a large sum was offered if he could accomplish this.

Today, like radium, which is used in curing cancers, x-ray work, and illuminating watch dials, so Acid Iron Mineral has its many uses being a remarkable remedy used externally or internally and anyone troubled with blood diseases, eruptions, rheumatism, kidney, bladder or stomach disorders of any sort may wisely visit the nearest store and procure a bottle. A twelve ounce bottle sent prepaid on receipt of \$1 by the Ferrodine Chemical Corp., Roanoke, Va., or send stamped envelope with letter telling what your trouble is for folder telling more about this great iron preparation, Acid Iron Mineral. adv.
