Marion, O., July 22.-Immediate fort to form an "Association of All Nations," based on justice rather than force, was promised by Warren G. Harding in formally accepting the Republican presidential nomination here today.

Scoring the League of Nations covenant as the "supreme blunder," he lauded the senators who opposed its ratification as "sentinels on the towers of constitutional government." The nominee said he welcomed a referendum.

Harding opened his address with a broadside at "personal, dictatorial and autocratic government." He said "no man is big enough to run this great republic.'

"Our first committal," he continued, "is the restoration of reprecentative popular government under the constitution through the of the Republican Party."

The speech, delivered at Garfield Park here, dealt with a multitude of justice the men who failed to answer Republican Policy. questions. Preserved nationality with America retaining her independence although not holding aloof from the rest of the world should be prepared. the guiding policy, Harding declared.

The candidate stressed the necessity of a return to party government and pledged himself to cooperate cordially with Congress and to select a cabinet of "highest capacity" in which the vice-president should sit.

Prohibition.

As to prohibition, there is divided opinion and the recourse to repeal or modification is open but "we cannot nullify because of divided opinion," he said. And the law must be enforced.

"We have a 'plain and neighborly' understanding with Mexico, regarding American rights but our relations should be 'friendly and sympathetic'," he said.

Touching on unrest, he said the remedy does not lie in repression, and assembly must be preserved.

High wages should continue, but with them full value for the wage received, he said. Collective bargain-

ing was endorsed. Harding pledged a sincere effort

to stamp out profiteering.

He endorsed the budget plan, a merchant marine, ample naval preparedness and a small army, abundant aid for ex-service men and womon suffrage.

As to formal peace, Harding said: "I promise you formal and effective peace so quickly as a Republican Congress can pass its declaration for a Republican executive to sign."

Another Name for "Evil Combination" Attempted 100 Years Ago by "Holy Alliance," Says Notifying Harding

(By the United Press) Marion, Ohio, July 22.-Henry Cabot Lodge today in his speech notifying Senator Warren G. Harding of his nomination for president denounced the League of Nations covenant submitted by the President as "another name for the evil combination which was attempted a hundred years ago by the ill-omened Holy Alliance.

"It is not for us to enumerate and it is to you that we look to set forth the proper policies to be pursued by ponsibility of administration and legislation."

None of Our Business.

Lodge spoke at length on the league juestion and praised Harding for his onspicuous part in the defeat of the eague as written.

Sweet Potatoes

Growing the Main Crop From Vine Cuttings.

(Special to The Free Press.) Raleigh, July 22 .- In sweet potato regions south of Virginia the main crop is very often grown from vine cuttings. The method or practice in these regions, North Carolina included, does not vary considerably. First, an area equivalent to about one-sixth of the land allotted to the crop is set to slips or draws. When hese plants' begin to "vine" or are take nto set the remainder of the

Some reputable growers heel-in their cuttings for a few days before planting in a trench, keeping them cheltered and watered. This encourages the roots to make a quick growth and consequently the cuttings start off more rapidly and vigorously when planted in the field. However, if cuttings are fully protected from wilting, the planting may be made directly with little probability of failure.

Plant cuttings four to five inches leep, leaving two joints out of the ground; firm the soil around the cuttings to insure good contact with the soil particles and consequently quicker absorption of soil moisture. Begin cultivation at once.

The advantages realized from planting vine-cuttings are: 1. Seed saving. Less seed need be

bedded than if the crop were planted entirely from draws. 2. A disease-free seed stock for

bedding the following season is practically assured, provided; no cuttinge showing discoloration of the stem when out, or that may be suspected of being unsound in any way, are planted. The only disadvantage from this

practice is that the yield from draws or slips, which are cut severely to supply vine cuttings for planting the main crop, is very materially lower-
