Department of Agriculture Tells Them to Use More Cholera Serum.

(By United Press.)

Washington, April 11.—"Pig typhoid," "lung plague," "Infective Pneumonia," and other alleged swine diseases are classed as snares and delusions in a letter just issued by the Department of Agriculture, which says that out of every ten sick hogs in the country at least nine have the common variety of cholera. Farmers are urged to "forget" all high sounding diagnoses and go after his herd with cholera serum and to separate the sick porkers from the well ones forthwith.

"It is true that other infections may and frequently do complicate outbreaks of hog cholera," said the Department, "but in such cases the germ of hog cholera is the primary cause of the disease; and if we can take care of the germ of hog cholera take care of the germ of hog cholera is the primary cause of the disease; and if we can take care of the germ of hog cholera.
