FRIDAY, JANUARY 14, 1898.

THE ISSUE OF 1896 IS THE ISSUE OF 1898 AND 1900.

During the campaign of 1896 the hue and cry of the Republican party and its monopolistic leeches was. "Kill the silver craze forever and bury with it the revolutionary tendencies of the party which supports it." To this end more "boodle" than was needed was made available to carry the election. But when the returns came in the Republican party expressed considerable surprise at the show ing its opponents had made. Even then this single-standard party did not grasp the truth-that the free coinage of silver was not dead and that the Democratic party was not wiped off the face of the earth. There are a few Republicans who yet pretend that the silver question | twenty-eight great dailies would form amounts to nothing. Such an one is Senator Gallinger, of top of their heads, they could see New Hampshire, who recently stated:

I do not expect to see any cur rency legislation whatever during the present session. International bimetallism is a myth, a will o the wisp, amusing to those who are chasing it, but utterly without substance. The failure of the recent commission was foredoomed, and the sooner it goes out of exist ence the better. Silver has become a commodity, and a rather cheap one at that. It will continue to be used for the purposes of subsidiary coinage, but it is utterly idle to expect that it will ever be remone tized in this country, or dignified as a standard of value by the great nations of the world. That idea, along with that of independent coinage by the United States, should at once be relegated to the tomb of forgotton things.

Now, this is all very well for a part, but the "signs of the times" do not entirely bear out his statement. It is quite likely there will be little or no legislation on the currency question, unless the goldstandard can be so fastened upon the country that no matter what happens it cannot slip its cable and be wafted into the silver sea. But can it be so fastened? We believe if it is attempted in the administration with the rope in way proposed that it will only more surely and inevitably defeat the Republican party, not only in the election of 1898, but in 1900, and the Republican party seeing York City, formerly of North this will only bluster about the Carolina, in a recent sermon said currency question during this session of Congress.

his recent message to gradually the climax of our contemptible retire the greenbacks and Treasury notes-the siphon that sucks the gold from the Treasury-to solemnly pledge in law that all bonds by the government be paid in gold, and to authorize national banks alone to issue notes and more than their security in bonds-in fact, simply to perpetuate the gold standard, for it is perfectly plain that the powers given the banks would then become the "siphon" on the gold reserve instead of the present greenbacks and Treasury

These measures are advocated in the hope to crush silver foreverand the Republican Congress is and will be timid about making laws of them, for they now see that the Chicago platform has more advocates and followers than it had in 1896. Its party has really been strengthened by defeat, and more closely united by even the failure of the "golden" promises of the present administration.

In fact everything goes to show that the skirmish this year and the battle of 1900 will be on the currency question and nothing else. Some few gold Democrats probathe tariff, labor, or social problems, but there is no sign that the "Anarchists" want to change. They have made up their mindsand those "Anarchists" number more than half the voting population of the United States-that the platform as laid down at Chleagshall be tried by one administration at least, and only by being proven fallacious by experiment or the utter rout of the Democratic party in 1900 will it be dropped.

monopolies, will yet rule this country.

Governor Russell returned from Washington last week bedecked with a new white hat, but he does not state that he bought it to talk through, which is not unlikely the

The vote in the Ohio Legislature on joint ballot gave Hanna 73, which elected him U. S. Senator.

CURREST COMMENT

If any one will take the trouble to look fato and think about the important" measures being into fuced in both beauches of Con-

gress, he will discover that nearly every one is a blind lode-on its face appearing to be a good measure of value and record ure or even a harmless one, but of me the "wheels within wheels" which it is meant to turn are only to more firmly entrench the party in other legitimate usefulness for power and its monopolistic satellites regardless of the welfare of the country and people as a whole Study these bills.

It will be remembered that it President McKinley's message in advised increasing the number national backs. In keeping with of officers for the emergency he continues to grant pardons to defaulting bank cashiers and predents, the latest immunity in the line being extended to W. E. Barr, the defaulting cashier of a St. Louis bank, Barr's sentence was five years, and as he has received an unconditional pardon he will probably "bob up serenely" somewhere and loot another bank. Next!

Of the thirty-seven great dailies in the North advocating pension reform, only nine are opposed to the Republican party. It these as laid down in the Chicago plat- put their spectacles over their noses instead of carrying them on many other things in which the Republican party should mend the errors of its abuses of power. But, alas! how can it help all the peaple when it has promised to help only the few, taking for its guid ance that "to him that hath shall be given and to him that hath not shall be taken away, even that which he seemeth to have."

The President virtually endursed the financial plan of Senator Wol cott and that of Secretary Gage. As these plans are entirely differ ent, the President finds himself sitting with a leg on each side of the fence, and it hurts. It is said that Secretary Gage has offered his resignation, and the best in formed public men of Washington think that its acceptance will be bold front on Senator Gallinger's the only way for the President to get a more comfortable seat on the fence. But in reality if the President doesn't quit straddling everything that comes along in his endeavor at this early day to corral a renomination, he will be compelled to rent a few more pairs of legs and lease several more rods of fence. Anyway, at this stage of the game it appears that the present already has will get itself well hung before the next national campaign.

CHAPTER VI. Legal Functions of Legal Money, and the Unlawful Usury.

tten for The Mensenger. in our last chapter we found the only legitimate uses of money to be

easured value. I challenge anyone of successfully dispraye these two uses of oney or to show that there is any

Great good has resulted from the law creating money, but let us see whether there is any evil in it. That part of it which provides that a fixed amount of gold or siver shall receive the stamp of the unit of value is certainly a wise

provision, provided it is not changed occasionally. It is also a necessary provision to limit the amount of money stamped, provided the amount is kept at an equitable ratio with 1860. rade and commerce. If the supply of money is far below demand, the effect is to lower prices; it above the demand, the effect is to inflate prices. Still this is not all that

influences prices of products. Just now the supply of money is far less than its demand for use by the people, and prices are low and debts are hard to pay. It is "Hard Times.

Our lawmakers have enacted two ways to limit the amount of adjourned until the April term of

First, The government had no limited coinage of gold and silver and a certain amount of paper received the stamp of legal tender. Now, practically, the amount of gold to be had alone shall receive free coinage and be the only legal the purpose being to supplement or support the gold by a certain amount of coined silver and paperromises to pay dollars.

By reason of this great country's progress in improved machinery manufacturing and in trans portation, the commercial transac tions of the people have increased enormously. Their exchange busiess has doubled up on the gold supply more than ten-fold in the

last fifty years. The quantity of gold, or both gold and silver, is by no means commensurate with the increased demand for the use of money. To prove this we have only to look at the amount of silver that has been coined - nearly \$500,000,000 - to applement the use of gold, not with the old understanding and law that made silver equal with gold as primary money at a ratio of 16 to 1, but only as a "belper." The promises to pay paper money amounts to about \$700,000,000 supplementary to gold. So that gold money must be supplemented by twice its value in promises-to-pay money to meet the demand of the

cople for the use of money, Why this supplementary prop ing and bolstering up of gold to nake it do ten times the amount is able to do? It has not been et on foot by industrial people to atisfy their wants, but it is heme adroitly established mainly bankers and those who rent out

Remember we had good times with gold, silver and paper all as egal tender. But the bankers and ioney loaners were not getting ich fast enough. Everybody knows hat the pressure to establish the old standard through the b ox was from capitalists, bankers and other usurers. Does their pol cy give us "easy times" or "Hard

limes!" it is to the interest of the credit lass, bondholders, etc., to have noney scarce and dear, so they sill get more of the products of abor for it. It is to the interest of he borrowing and working class to have money plenty and its renetter price for industrial products

To reverse the present order of hings it will be necessary to repeal the part of the money law which wakes the money stamp on silver and paper of any less legal tender value than the same money stamp has on gold and increase the money ssue of all three to an amount ommensurate with the commercial emand of the people for the transaction of their business.

The financial law now in force i favorable to usury. The people acts mildly on the stomach and should abolish that law and enact one favorable to industry.

It is a well-known fact that for of blood; but when the power o' locally regulating the supply o plood in the brain is impaired because of insufficient nerve power the tired brain grinds the same old grist over and over till nervous prostiation, paralysis or hysteria

The cause of sleeplessness is so clear that the cure is equally apparent. The nerves must re cover their grip. The health wrecking laxity of the blood vessels must be corrected. answer to how this is to be done is: Feed the exhausted nerve tissues with Paine's celery compound.

By thus acting on the nerves Paine's celery compound is able to regulate the blood supply and per-manently banish sleeplessness that shortens so many lives, especially among those beyond middle age. In addition to this indirect control over the circulation, Paine's celery compound directly increases the amount of blood in the arteries and arouses the purifiying organs to drive out impurities that often lurk in it undeveloped for years till age or a "run-down" condition allow them to get the upper hand. A pale, languid woman is not more of a lady than a rosy, robust

one.

Women leading lives of imper fect health, with pains and aches running riot through their "run down" bodies, are often ignorant of the fact that it is not a specific for nervousness or rheumatism or stomach trouble that they need but fundamental building up of every tissue of their bodies and a thorough cleansing of their blood. The strengthening of the constitution and the eradication of latent disease that Paine's celery compound achieves leaves no fear of that treacherous partial recovery that keeps one always afraid of relapse and sudden break down.

Paine's celery compound rests the best medical thought that the remedy that invigorates the entire system and purifies it, is the only safe cure for such localized diseases as rheumatism, neuralgia, sleeplessness, eczema, headaches and blood diseases.

It is a common harmful idea that health keeps pace with strength. People seem to think that one can determine the health of persons by measuring their arms. Health means absence of pain and the presence of more cr less nerve intensity and enjoyment in the mere fact of living.

All this implies abundantly nourished organs and blood un hampered by diseased humors. Paine's celery compound is espe

cially valuable for recruiting the strength and spent energies of men and women advanced in years. It is the one preparation con sidered worthy the name of a true nerve food and blood remedy by physicians throughout the country It is prescribed by them in every state in the Union to tone up the system, regulate the nerves and estore health and strength.
