> Effingham B. Wilson, of Brooklyn, has discovered somewhere on Long Island a perfect mine of In lian arrow heads. He keeps the secret of the location to himself, and, a cording to the New York Mail and Express, is obliged to keep a sharp lookout for inquisitive spectators, who would like to follow him when he starts out to make a collection. Mr. Wilson has been offered a large sum for the arrow heads he has already in haul, but the offer was refused. When the collection reaches 3000 heals it will be the most extensive in the country.

W. B. Mutter, of Omaha, says the eight hour day "would bring about increased consumption, a vaster display of productive activity, a higher intellectual and moral development of the toiler and a wider deman I for the more artistic products of our factories and workshops. It would stimulate taventive genus, develop better an l COMPANY, grander civilization and bring about an almost fabulous increase of national property and wealth. The general struggle for a reduction of the hours of labor is a struggle for a better GAROLINA civilization, a struggle for work for willing hands who should be employed."

Rev. Christopher Dowidst, pastor of a Lutheran church at Oshkosh, Wis., has expelled a printer from his church for being a union man, declares the New York Press. He says unionism is against the commandments of God. To strike is taking a lyantage of the expitalist, and this is against the comto Live? mandment Thou shall not steal. "Is it not nearly time that some re striction was put upon the disposition CAROLINA IMPROVEMENT of surgeons in this town to slice open their fellow-creatures in the interes of the complaint called appendicitis? asks New York Life. "That late alsurd and lamentable operations have cost the lives of useful citizens, will to be pretty generally current that appendicitis is epidemic in the minds of the metropolitan surgeons, and that human life would be safer in New York if the operation was forbidden except by order of a court. The public knows altogether too much about ap pendicitis, and the doctors altogether too little. Two-fifths of the genuine cases result from scare in the patients, and one or two more fifths of all the cases exist only in the imaginations of the surgeons. The cure of such legitthate cases as are left is not worth what it costs. Appendicitis is played out. The invention of the operation for it has changed a very rare malady into a common and dangerous diseasa."

### A Valuable Textile Plant.

Interest in the cultivation of the amie plant in this country has been sed by the statement that an English concern known as the Textile syndicate has secured 25,000 acres of and in Mexico and intends devoting it to the raising of these plants. Mr Felix Fremerey, who has given much time and labor to their growth, writes to the Manufacturers' Record from Arcadia, Texas, as follows regarding the English people:

"They are negotiating for a big ha-ienda in the State of Vera Cruz, where ramie is already grown to a cer tain extent. Those gentlemen wrote me several weeks ago: "We shall be led to know if any ramic ribbons can obtained from the United States, as e are buyers of all that can be hipped in good condition. We would arrange bankers' credit for the shipneuts, to be drawn against, accommaied by shipping documents and solicy of insurance.

"This company has its textile works Carpentor's Road, Stratford E, Lendon, where the ribbons are degummed and bleached ready for comb and card.

"There are two A No. I houses in apital stock of the new bank will be take not less than thirty or forty tons \$50,000 divided into shares of \$100 of blenched ramie fibres per month at each. Col. The latter named Jurnished the United States Depart ment of Agriculture with that fine col lection of self-manufactured ramie fab cies which were exhibited at the World's Fair. Ramie ribbons or fibres can be seld in New York city and the New England States in any quantity at the highest figures known, but seem ingly there are no means to induce our clanters to undertake this culture, of which one acre after the first year of planting yields better profits than fifty

acres of cotton at actual prices. Experts in textiles consider the ramie product to be as fine as cotton, almost as glossy as silk, while it is cheaper than linea and stronger than hemp. From two to three crops of stalks can be raised from one plant in a season, and it is said to be hardy enough to withstand extreme montare and drought, though hable to suffer from heavy frosts. The roots will like from fifteen to twenty years, and as high as \$4.00 per pound has been paid for the seed in America. China es ports over 500,000,000 pounds of it

Among the widely diversified products made of ramic are ropes and cables that exceed the strength of manilla emp, tablecloths that excel the glass I Irish liver, lace that equals the delicacy of cotton and surpasses its durability; also plushes, velvets, damaska and brocades. Bamie is combiged with cotton, linen wool and silk. and it always able to the mixed texture an element of greater usefulness or hos'ery, in cambries, camlets and shawls, in alpacas, carpets and draperies, it is considered, with the possible with which it is interwoven.
