ZEB VANCE'S REMAINS RETURNED TO THEIR FIRST GRAVE IN THE ASSEVILLE CEMETERY.

Chas. N. Vance Has Them Removed from the Lot to Which Mrs. Vance Had Them Transferred Last Week.

ASHEVILLE, N. C .- All that is mortal of Zeb Vance, the body that on the 18th of April was buried in Riverside Cemetery, overlooking the beautful French Broad rists, about which he wrote poetic words in life, has become the object of the most unfortunate wrangle in the immediate family of the beloved dead. Last Wednesday, seven weeks after the interment, it will be remembered. Mrs. Vance came to Asheville and very quietly had the remains of the Senator removed from the grave in the old Vance lot in Riverside Cemetery to the spot that she had chosen and purchased for the purpose. This is the highest and most beautiful part of the cemetery, and it was planned that the monument to Vance's memory should be erected over this spot.

But the body was not destined to remain in its new grave long. Chas. N. Vance learned of the removal and came here Saturday evening. Some time Saturday night or before day Sunday morning the remains were again disinterred and placed in the family plat where they were first buried, be-side the grave of his first wife, young Vance's mother, where, it is under-stood, Charlie Vance is determined they shall remain if there be any possible way of enforcing his wishes. The sible way of enforcing his wishes. The grave has been guarded by a special officer since Sunday morning. It is said he agreed to the removal of his father's body provided Mrs. Vance would allow the re-interment of the Senator's first wife by his side, but this Mrs. Vance would not do.

This wrangle as to the permanent resting place of the beloved dead is

Three Hundred Miles in a Row Boat.

(Danville Register.) The Norfolk Yirginian of Wednes

day contained the following: The ec centric passenger who came up with Captain Jones on the steamer Lucy, from Plymonth, N. C., yesterday, was evidently determined to get to Norfolk without paying railroad fare. In company with his valet he accomplished, in a small, open row boat, the 300 miles distance between Danville and Plymouth, passing down the Dan river to the Roanoke, and thence to the North Carolina sounds. He left Dan-ville on the 13th of March and arrived at Plymouth on Saturday, June 6th, lacking only four days of being three months on his strange journey. At Plymouth he took passage on the Lucy, the sounds being too rough for him even after his passage of the rapids in the Dan and Roanoke. He carried his provisions and an old stove with him in his beat. He has often before made trips in strange ways, tramping through the mountains in winter, and once coming to Norfolk on a bicycle. What his next venture will be is not known, but it is unlikely that he will return by the same route he came. Who is he?

COLUMBIA, S. C .- The court of in quiry appointed by Governor Tiliman to inquire into the conduct of the mil-itary companies which refused to go to Darlington during the dispensary troubles, made a voluminous report as to the three Columbia companies and four others. As to the Governor's four others. As to the court says Guards, of Columbia, the court says Captain Bateman was guilty of diso-beying orders, but in doing so he was influenced by a belief that to attempt to carry the company out of the armo ry would precipitate a riot. No other officer or member was guilty of any disobedience of orders. Those members who threw down their arms in the presence of the governor at his man sion were guilty of unbecoming con duct, but were laboring under great

excitement. The court found that Captain Alston. of the Richland Volunteers, a Colum bia company, disobeyed no orders nor was guilty of any conduct unbecoming an officer. Work on the largeannex to the New berry (S. C.) Cotton Mills is moving right along, and the walls will soon be ready for the second floor. The build ing is being creeted according to th latest approved plans in mill engineer ing. Stephen Greene & Co., mill en gineers of Providence, R. I., are th architects who furnished the plans and they certainly know their business and they certainly know their business.

The very latest improved machinery
has been purchased for the annex to
the mill, and when completed the factory will be second to none of similar

capacity in the State.

The work of building the mill is be ing done by W. T. Davis & Co., of Newberry. The brick is made by J. Newberry. The brick is made by . P. & T. C. Pool, of Newberry, and might say here what perhaps cannot be said to the same extent by many mills, that its management is wholly in charge of Newberrians, who have made it a success. Its capital stock is made it a success. Its capital stock is more largely held by home people than that of other mills in the State, and the stockholders possessed at the begin-ning so great faith in the ultimate success of the enterprise that they have held on to their investment, and there has been less changing and buying up of stock among them than the croakers predicted at the organization of the company eleven years ago. Newberry is proud of the splendid record the Newberry Cotton Millshas schieved in the financial and commercial work, and when its 25,000 spindles are "hum ming on the hill" we will only be quickened to do still greater things.

\$1,250,000 a Year for Fruit and Early

Along the route of the Louisville Nashville Railroad, between Paris and Memphis, Tenn., a distance of 131 milas, a rapidly enlarging traffic is being developed by the increase of the fruit-growing industry. During the month of May over 100,000 cases of perishable goods were handled. Among these were 92,000 crates of berries. The balance of the shipments were made up of peas, beans and other ear-ly vegetables. The potato and tomato crops also promise large tonnage. It is estimated that in this territory over \$1,250,000 are annually distributed among the truck farmers. The strawberry crop in this section amounts to over \$250,000. The Louisville & Nash-ville runs fruit trains through this district, making the trip from Memphis to Chicago in forty hours.

ANOTHER BIG COTTON MILL.

The Pelzer Company to Build Again and In crease its Investment by Half a Million Dollars.

The Pelzer (S. C.) Mfg. Co., has decided to again increese its capital stock and add to the capacity of its mills on the Saluda River, 16 mills

million.

The addition will make the Pelzer one of the largest cotton manufacturing companies in the South and one of the companies in the South and one of the largest in the country. The company began work in 1883 with 10,000 spindles. It has grown steadily and is now operating 52,000. Cotton Crop Report.

The condition of the crop is report ed as nearly up to the average and more advanced as a whole than that of more advanced as a whole than that o last year. The cultivation has been timely and thorough, and it is reported that there has rarely been a season ed that there has rarely been a season when grass and weeds have given so little trouble, due largely to the fact that the rainfall has nowhere been excessive. Taking the entire condition of the plant, it is on the whole very promising—much better than either last year or the year before at this time—and this is particularly true of Texas and Mississippi, two of the larg-est producing States.
