MARION,

A PLUCKY GIRL.

She Goen Down in a Well and Rescues Ho.

[Durham, N. C., Sun.] One day last week Miss Minnie Bla lock, daughter of Wm. Blalock, a well to do farmer of this county, was visit ing her sister, Mrs. Charles Anderson, who lives about four miles from town. Miss Minnie, with several others, among whom was the little four-year old son of Mr. Anderson, Were attracted by a waspe neet at one end of the house. There was also an open well near the corner of the house, and in their excitement, and watching the wasps, the little boy kept backing, unmindful of the well, until he went over backwards.
The well was 28 feet deep, with four feet of water. This turned attention from the wasps to the child. For a moment or two there was consternation. But Miss Blalock, with undaunted courage, took in the situation and she at ouce proceeded to go down in the well and when she reached the water it was just in time to save her little ew, who was about to sink for the third time. She succeeded in pulling him out of the water, and, strengthening herself, she brought him to the top and safely landed him on terra firms.

Lee, an expe-rienced engineer, and a pretty blue print accompanies the plans for the county. The scheme was so thorough-ly ventilated at the last session of the Legislature that nothing need be said of it except that it will be presented before the General Assembly again in

Progress of Southern Methodists.

In an address before the General Conference of the Methodist Church in Canada last month the Rev. Dr. E. E. Hoss, fraternal delegate of the M. E. Church South, delivered an elequent address. He said: "We began with about 500,000 members. When the civil war came in 1861 we had increased to over 700,000, of whom 207,000 were persons of African descent a larger body of converted heathen than could then be found in all the mission stations of the world. In many communities there was a great preponderance of colored over white members. For example, Trinity Church, Charleston, S. C., reported in 1863 only 385 white members and probationers, against 700 colored; and Bethel Church in the same city reported 383 white, against 1,492 colored. * * In the States of South Carolina and Georgia alone we had at the latter date sixty picked and capable men—none other were deemed fit—whose sole occupation it was to minister to the religious wants of the colored people.'

"I travel constantly through Vir-ginia, the Carolinas and Georgia," said P. B. Beard, of Salisbury, N. Poisoned Bullets in Warfare.

International compact, which forbids the use of poisonous and explo-sive bullets, provides against purposely infected shot. Novertheless experiments have been made by Mesener with bullets purposely infected with micro-organisms, and the results are summarized by Knowledge for the present month. The bullets were discharged at tin boxes filled with sterilized pep-stone, and the channels made by the shots were examined. It was found that, in spite of the heat of the discharge and the violence and briefness of the impact, cultivations of bacteria arose in the gelatine. In other cases the boxes had been wrapped in flannel infected with various bacteria, and un-infected bullets were fired through flannel and gelatine. Growths of bac-teria derived from the infected flanuel appeared in the gelatine. Knowledge remarks upon the horrible suggestion conveyed by these experiments.—Chi-cago Record.

NO USE FOR THE BABY COMMITTEE.

The Committee Were Ready and Waiting but the Babies Did Not Cry.

New York. - Obstreperous infant will trouble the devotions of the Eigh-teenth Street Methodial church no more, if the ingenuity of the church management can help it. By the advice of the pastor, the Rev. Dr. J. A. B. Wilson, a new scheme for the disposition of babies during the service position of bables during the services has been adopted. A committee of young women has been appointed whose duty it shall be to occupy a small room near the Sunday school room, and quiet, scothe and otherwise look after any babies that may be committed to their care, the idea being that mothers who cannot or will not leave their babies at home may, if the young-sters become noisy, leave them with the young ladies. This scheme was to have gone into operation Sunday, on the occasion of a children's mass meet-ing in the church, when all the set vices consisted in singing, reading and reciting by the children. There were a number of babies present, but they kept quiet, and the committee waiting below stairs found no employ
