"ASK MOTHER"

This has a familiar sound in every home. When we want to know

where anything may be found, with one accord we cry, "ASK MOTHER."

MOTHER is supposed to be a walking encyclopedia, knowing everything.

But there is one very important matter concerning which MOTHER'S knowl-

edge fails. If the home should burn down does MOTHER know where the

money is to come from with which to build a new one? She does not, because she leaves this matter to FATHER. He is supposed to know all about

that. But does he? Ask him if he knows the name of the company in which

the home is insured. The chances are ten to one that he does not. If he

anows the name of the company, ask him what he knows about its strength

and reputation. Ask him if he has ever read the policy. Ask him-but per-

haps you will have asked enough. Sometimes FATHERS get impatient when you ask too many questions about business matters which a woman is

home and the lives of the family can be safeguarded from fire if he will read

and heed the suggestions contained in a book published by the Hartford Fire

Insurance Company called "Fire Prevention & Fire Insurance." This book

is full of valuable information. It has seperate chapters for the Householder,

the Merchant and the Manufacturer. It tells how to prevent fires. How inmrance should be written. It ought to be in every home in America. It is
