DODSON WOULD STOP SALE OF CALOMEL

Says Calomel is Mercury and Acts Like Dynamite on Your Liver.

Dodson is making a hard fight against calomel in the South. Every druggist has noticed a great falling off in the sale of calomel. They all give the same reason, Dodson's Liver Tone is taking its place. "Calomel is dangerous and people know

it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist. A large bettle costs but a few cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasanttasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it tops hurting, then shortly you lift that withersome corn or callus right off, root and all, without one bit of pain or sorewess. Truly! No humbug!

Sudan Grass for Pasture.

Sudan grass furnishes good pasture for horses, cattle, sheep or hogs. It is best not to pasture a young seeding until it is about a foot high. By this time it will have become firmly rooted and under average conditions will not be injured much from tramping and pulling by animals. A hay crop can be cut about the last of July and an abundance of succulent pasture secured throughout August when other pastures are burned up, or it can be pastured the early part of the summer and a hav crop secured afterward. The crop also may be cut and fed green with good results.

BENEFITS OF RYE AS A WINTER-

Southern soils are much in need of organic matter or humus. An excellent opportunity for providing it is afforded by rye sown in the fall and turned under in the spring. Not only will it increase the organic contents of the soil, but it will conserve plantfood and increase the yields of subsequent crops. It uses nitrogen that would have leached out and would have been lost during the fall and winter. It also utilizes the phosphoric acid and potash that becomes soluble during the winter. All these and ther elements of plant food go into the ground with the spring plowing and will be released for the subsequent crops.

Winter legumes are excellent where they can be grown with success, but it is much easier to get a stand of rye on all kinds of soils and under various climatic conditions. Rye is in fact the most dependable crop for poor soils, and it is the poor soil, of course, which needs a winter-crop

Mistakes are sometimes made in a failure to plow under rye at the right time. If the spring is dry it should be turned under early, no matter what its stage of growth is. The danger. of course, is that rye will pump out too much soil moisture, rendering the soil hard and lumpy when plowed and giving the following crop a poor show.

If the spring is wet or normal, of course, the rye should be allowed to grow as long as possible, since it will be adding benefits to the soil.

Rye being such a good soil helper ought to be given a better show than is usually accorded it. The seed bed should be well prepared and fertilizers should be applied, to both of which it mskes ready response.

NOTICE!

Notice is hereby given that I have sold my interest in the firm of J. M. Gibson & Son, of Old Fort, N. C. All debts due the above firm on or before August 30, 1920, should be paid to me, and all outstanding claims of the old firm will be assumed by the new firm of Gibson & Noblitt. This Sept. 1, 1920. J. M. GIBSON.

The "Black Diamond Express", one of the most famous trains in America, takes passengers out of New York after dinner hour each evening and deposits them safely in Buffalo. 448 miles distant, before breakfast time next morning.

is a vital factor in commercial and industrial life. Without it our vast and varied activities would be impossible. Distant fields and mines supply food and raw

materials to sustain great industrial centers; people travel overnight hundreds of miles to transact business next day in distant citiesbecause these Iron Beasts of Burden provide the means of transporting them.

Master minds in railroad engineering have made this possible just as experts in coffee blending bring to your table

Franco-American Coffee
