Two Wheat Diseases New to the
United States.

**VEGETABLES REQUIRE
PROPER VENTILATION**

Plan Outlined for Securing This
in Storage Room.

Lacking Essential Can Be Overcome
by Providing Air Duct of Wood,
Metal or Terra Cotta, Fitted
in One of the Windows.

It is necessary to have good venti-
lation if food and vegetables are to be
kept safely in storage. In many cel-
lars under dwellings the lack of venti-
lation is the only essential that is
lacking. However, this can usually be
easily overcome by providing an air
duct constructed of wood, metal or
terra cotta, which, fitted in one of the
windows, is desirable, as it permits
the cool air to enter at the bottom of
the room. Two or more joints of 6-
inch stovepipe, one with a damper
and an elbow may be used. A piece
of board with a hole the size of the
pipe is fitted in the window in place
of one of the panes of glass. Another
pane of glass may be removed from

Details of construction for the ven-
tilation of a storage room in a base-
ment. The air duct may be made of
wood, terra cotta, or metal and in-
stalled in place of a pane of glass,
thus avoiding cutting through the cel-
lar wall. A hinged door the size of
another pane of glass may serve as
an outlet for the warm air.

the sash and a small hinged door fitted
in its place, which when open allows
the heated air to escape. In cold
weather both the hinged door and the
damper in the stovepipe must be
closed. The windows in the storage
room should be darkened in order to
protect the vegetables from the light.
Barrels, crates, boxes, or bins may
be used as containers for the various
vegetables, but movable containers are
preferable to built-in bins, as it is
possible to remove them for cleaning.
It is advisable to construct shelves or
a slat floor to keep the crates, boxes,
baskets, and other containers off the
ground. This is highly desirable to in-
sure a free circulation of air and to
prevent the containers from harboring
mice, rats, and other vermin. The
shelves for canned goods along one
side of the room need not be more
than 6 inches wide.

For the first six months of 1920
there were 2,771 suicides in the
United States, as compared with 2,-
063 during the same period last year.

These two sketches are from
photographs of Signor Friscoe's
amazing art, now being billed
over the Keith and Affiliated
vaudeville circuits.
Signor Friscoe comes onto the
stage and plays. Suddenly he
stops playing. His xylophone
performance continues.

Then the curtains of
the back-drop part.
The New Edison is re-
vealed. It has taken
up Signor Friscoe's per-
formance and is RE-
CREATING it alone.

**You can hear it
in our store**

—the phonograph that is fea-
tured in Vaudeville's strangest act

Perhaps you've seen it—Signor
Friscoe's "Magic" Xylophone
Act.

It's the hit of vaudeville's
"Big-Time."

Signor Friscoe's "magic" is an
Official Laboratory Model of
the New Edison. We have one
exactly like it.

Signor Friscoe's instrument is
an exact duplicate of the origi-
nal Official Laboratory Model,
which cost Mr. Edison three

million dollars to perfect. Our
instrument is also an exact
duplicate of this famous three
million dollar original. We
guarantee it to be able to give
the same marvelous RE-
CREATIONS of music, which
Signor Friscoe's Official Labor-
atory Model gives in vaudeville.

Come in and test the astonish-
ing realism of this instrument
for yourself—in Mr. Edison's
Realism Test.

The NEW EDISON

"The Phonograph with a Soul"

You've read how the New Edison has proved
its perfect realism. Four thousand tests have
been given, in which more than 50 different
artists compared their art with its RE-
CREATION by the New Edison. Leading
newspapers conceded that there was no dif-
ference between the two.

Has any one suggested to you that these
comparison tests are "faked"—that the
artist imitates the New Edison?

Signor Friscoe's performance makes such an
assertion positively ridiculous. Every week,
20,000 people see his hammers ripple over
the xylophone keys. Suddenly he holds them
aloft—still.

The rippling music continues.

Slowly, the gorgeous curtains of the back-
drop part. The audience gasps. The New
Edison stands revealed. It has taken up
Signor Friscoe's performance, and is now
RE-CREATING it alone. The effect of this
extraordinary magic can rest upon only one
fact: No one can distinguish any difference
between Signor Friscoe's performance and
its RE-CREATION by the New Edison. Signor
Friscoe could not possibly imitate the New

Edison, because the xylophone can not be
made to imitate any other instrument, so as
to deceive its hearers.

Signor Friscoe's act is not an Edison enter-
prise. He has simply been clever enough
to use the New Edison for what it is worth.
Why don't you?

PRICES

The price of the New Edison has increased
less than 15% since 1914. This includes
the War Tax.

Mr. Edison has staved off price advances
by personally absorbing more than half of
the increased cost of manufacture.

Because of the exceptionally high quality
of materials and workmanship demanded
by the Edison Laboratories, and the con-
tinued scarcity of both, it may be necessary
to advance prices. But rest assured that
this will not occur, unless Mr. Edison is
forced to it.

Our Budget Plan—the thrift way of spend-
ing—will help you buy now. Let us tell
you about it.
