MANY LIKE THIS IN MARION

Similar Cases Being Published in Each Issue.

The following case is but one of many occurring daily in Marion. It is an easy matter to verify it. You cannot ask for better proof.

J. N. Norton, prop. of grocery, Garden St., Marion, says: "Some years ago my back and kidneys bothered me considerably. I had a dull ache across the small of my back, so that it hurt me to straighten up. A friend recommended Doan's Kidney Pills to me, so I used some. They fixed me up in fine shape and I always rely on this remedy."

(Statement given on December 2, 1914.)

On April 24, 1918, Mr. Norton said: "I haven't had to use a kidney remedy since I recommended Doan's Kidney Pills several years ago. I am quite sure they cured me. I advise others to give Doan's a trial."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Norton had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

CALOMEL USERS TAKE AWFUL RISK

Very Next Dose of Treacherous Drug May Start Terrible Salivation.

The next dose of calomel you take may salivate you. It may shock your liver or start bone necrosis. Calomel is dangerous. It is mercury, quicksilver. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel without making you sick, you just go back and get your money.

Don't take calomel! It can not be trusted any more than a leopard or a wild-cat. Take Dodson's Liver Tonic which straightens you right up and makes you feel fine. No salt necessary. Give it to the children because it is perfectly harmless and can not salivate.

ADMINISTRATORS' NOTICE

Having qualified as administrators of Geo. W. Conley, deceased, late of McDowell County, notice is hereby given to all persons having claims against his estate to present the same to the undersigned at Marion, N. C., on or before the 26th day of July, 1923, or this notice will be plead in bar thereof. All persons indebted to said estate will please make payment to the undersigned at once.

This 26th day of July, 1922.

Mrs. Henrietta Conley and J. Clay Conley, administrators of the estate of Geo. W. Conley, deceased.

NOTICE OF SALE OF STROUDTOWN SCHOOL DISTRICT BONDS

North Carolina, McDowell County. Office of Board of Education Marion, N. C., Aug. 8, 1922

Notice is hereby given that the undersigned Board of Education of McDowell County, North Carolina, at 12 o'clock m., on the 18th day of August, 1922, at the court house in Marion, N. C., will sell Ten Thousand (\$10,000.00) Dollars or less of thirty year serial bonds of the Stroudtown School district. The sale of said bonds to be made for the purpose of building and equipping a public school building in said district.

For the benefit of those desiring to purchase said bonds we desire to state that the election on said bond issue was carried by a large majority. The undersigned reserves the right to accept or reject all bids. A certified cashier's check in the sum of Five Hundred (\$500.00) Dollars must accompany each bid before a bid will be considered.

Said bonds will be sold to the highest bidder and will bear 6 per cent interest payable semi-annually, in January and July, and payable at the Chase National Bank, of New York City.

This the 8th day of Aug. 1922. BOARD OF EDUCATION of McDowell County. By T. W. Stacy, Chairman. N. F. Steppe, Secretary.

KNOW NORTH CAROLINA. WEALTH AND WELFARE.

Prof. C. B. Williams, dean of Agriculture at State College, has been impressed with the condition in North Carolina that allows poor-paying farms to affect the homes, the schools, and the churches of the state to the degree that has been displayed in the last few years.

Poor homes, inadequate church and school facilities are more prevalent than we should like to see them in North Carolina, says Professor Williams, because of the fact that so many of our farms are producing such poor yields and net returns for the efforts put into their operations.

During the past few years in our visits to different sections of the state, I have been struck very much with the marked correlation between the productiveness of the soil and the character of the farm homes and their surroundings; schools and churches; with the healthfulness of the families; and with the educational qualifications of the people.

In close proximity to such areas, it is not uncommon to find other areas sparsely settled, with the people living in humble homes without beautification and with their children not permitted to enjoy social, religious, and educational advantages as do the communities established on more productive lands.

The underlying conditions largely causing these differences is not hard to find. My observations are that to a large extent they are fundamentally connected with differences in the productiveness of the soils of these different communities. Does not this, then, unmistakably point to the fact that the greatest and most fundamental necessity of North-Carolina farming is that of securing and applying information that will aid in the economic building up of the productiveness of soils of the state?

No community, state, or nation dependent upon its agriculture, can prosper when its soils are not productive. North Carolina farming, in a general way, therefore, cannot be profitable unless goodly acreage yields are secured and at economic costs per unit. No amount of temporizing along other lines in a broad way can bring prosperity to the masses of our people on the farm.

Year in and year out, where farmers do not get goodly yields of their crops, it is not possible to secure large returns for labor and expenses put into their production, it matters not how favorable prices may ordinarily be.—Dean C. B. Williams, State A. and E. College, in News and Observer.

31,614,269 MEN AND WOMEN INTERESTED IN FARMING

Men and women living on farms and exclusively interested in agriculture for their support number 31,614,429, according to a computation by the census bureau. They comprise 29.9 per cent of the total population of the United States. This includes farm managers and owners and farm laborers with their families. More than 6,000,000 farms are operated by farm residents.

The census count reveals that 11 States are predominantly agricultural in character of the occupations of the majority of their residents. In these States at least 50 per cent of all residents live on and operate farms. The States are the Dakotas, Oklahoma, Arkansas, Kentucky, Tennessee, Mississippi, Alabama, Georgia and the Carolinas. In Mississippi 71 per cent of all residents live on farms.

The new census count gives a picture of the relative importance of agriculture in the nation's entire economic and industrial life that is more accurate than counts made in former years, officials explain. This is the first time the census has counted persons living on farms. Heretofore an enumeration was made of what was known as the rural population. This included, in addition to actual farm residents, all persons in towns of 2,500 or less. The new count supplies exactly the number of persons actually working farms and dependent for their means of support upon the agricultural industry.

SOCIETY SEEKS HOMES FOR SIXTEEN CHILDREN

Greensboro, Aug. 17.—The Children's Home Society of North Carolina, Inc., will have ready for placement during the next 60 days 16 children between the ages of three months and 15 years. The society is looking for good foster homes where these children will receive a parents' care and affection. The motto of the organization is "Homeless boys and girls for childless homes."

Applicants for the children must be recommended by at least three good citizens of their community and also by the superintendent of public welfare and clerk of the court of their county.

There are 105 automobile factories in operation in this country.

THE NORTH CAROLINA SOLDIER IN THE WORLD WAR

Raleigh News and Observer: "The average American of fighting age is five feet-seven inches and forty-nine one hundredths of an inch tall, he weighs 141 pounds and fifty-four one hundredths of a pound. He is tallest if he comes from Texas, shortest if he hails from Rhode Island, most robust if a native of the Dakotas and least robust if Rhode Island is his home. The state with the fewest number of defective males of fighting age is Kansas and the one with the greatest number is Rhode Island," says an article in the New York Times.

It is interesting to compare the North Carolina averages with the averages above quoted. North Carolina's average height was 68.15 inches—considerably over the average of 67.49. Less than half the states averaged over 68.

The figures, which were furnished by Major General Merritt W. Ireland, surgeon general of the United States army, in a paper read before a gathering of medical men, show that "considering the population groups the tallest men came from the mountain area of North Carolina." But while we had tall men from the mountains we also had short men from the other sections, bringing the average below the greatest, that of Texas, which was 68.40 inches.

Coming to weight, it is singular how close the North Carolina fighting man came to the mean weight. The average weight of the North Carolinians in the army was 141.49 pounds, while the average of all the troops was 141.54. Since we had so many tall men of course we could hardly be expected to surpass in width. Indeed, height as a rule is within the limitation of reason preferable to width when considering the human frame.

In defectives per thousand we made a good showing. There were 453 to the thousand in this state. Kansas made a better showing with only 354 per thousand, but our men were in decidedly better shape physically than those of Rhode Island, where there were 640 defectives to the thousand.

In favor the North Carolina soldiers were as good as the best and physically they ranked above the average. Yet physical defects were revealed by the draft inquiries and the motto of the youth of the state in the cultivation of bodily physique must be as in every other sphere "Elcelsior."

HOOVER EXPECTS NO SHORT-AGE OF COAL IN WINTER

Washington, Aug. 17.—Early resumption of coal production in the union fields covered by the Cleveland agreement was looked to today by administration officials to avert fuel troubles throughout the country next winter.

If the miners in those fields return to work within the next few days, Secretary Hoover declared, there should be no serious shortage of coal during the winter, although there may be some miner inconveniences. Production of approximately 10,000,000 tons of coal weekly made up of about four-fifths of the bituminous and one-fifth anthracite will be needed, according to Federal Fuel Distributor Spencer.

Even with adequate production, Mr. Hoover asserted, action by Congress will be necessary to enable federal price control temporarily to facilitate the distribution of anthracite and to supply the needs of the Northwest.

"With the resumption of mining," he said, "the price situation will be quickly over. While there will be some control of distribution and prices necessary temporarily, the matter will quickly adjust itself."

A BURBANK APPLE TREE.

Stanley News-Herald. Mr. J. M. Boyett has an apple tree in his orchard that is somewhat of a marvel in Stanley county. It is one of Luther Burbank's "educated apple trees." It now has some very fine, highly-colored apples, well ripened, while others on the same tree are green. Mr. Boyett says the tree has had ripe apples on it for the past month or more, and that others are growing and ripening all the while. The tree is supposed to bear all summer, and indications are that it is going to live up to its reputation. The fruit has a very tough skin, but the inside is exceedingly mellow and highly flavored.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by Druggists for over 40 Years. E. J. Cheney & Co., Toledo, Ohio.

WHISKEY AND BRANDY ARE SEIZED IN CHURCH

Bristol, Va., Aug. 17.—Twenty gallons of whiskey, and five gallons of blackberry brandy were found today by officers in a Baptist Church near West Jefferson, N. C. It is believed the liquor had been concealed there by bootleggers. Church-goers detected the odor and a search by officers revealed the liquor under the floor.

NOTICE TO SUBSCRIBERS

Look at the printed label on your paper. The date thereon shows when the subscription expires. Forward your money in ample time for renewal. Notice date on label carefully, and if not correct, please notify us at once. Subscribers desiring the address of their paper changed will please state in their communication both the OLD and New address.

NOTICE OF SALE OF EAST MARION SCHOOL DISTRICT BONDS.

North Carolina, McDowell County. Office of Board of Education Marion, N. C., Sept. 4th, 1922.

Notice is hereby given that the undersigned Board of Education of McDowell County, North Carolina, at 12 o'clock m., on the 4th day of September, 1922, at the court house in Marion, N. C., will sell Sixty Thousand (\$60,000.00) Dollars or less of Thirty-year serial bonds of the East Marion school district. The sale of said bonds is made for the purpose of building and equipping a public school building in said district.

For the benefit of those desiring to purchase said bonds we desire to state that the election on said bond issue was carried unanimously, with the exception of one vote.

The undersigned reserves the right to accept or reject all bids. A certified cashier's check in the sum of Five Hundred (\$500.00) Dollars must accompany each bid before a bid will be considered.

Said bonds will be sold to the highest bidder and will bear 6 per cent interest payable semi-annually in January and July—and payable at the Chase National Bank, of New York City.

This the 18th day of August, 1922. BOARD OF EDUCATION OF McDOWELL COUNTY. By T. W. Stacy, Chairman. N. F. Steppe, Secretary.

MILLIONS FOR SCHOOLS

University News Letter. In 1914 it was our job to field-survey the extension activities and reach of the agricultural college of the University of Wisconsin for the State Board of Public Control. The work took us into almost every county and community of that great state. Everywhere we marveled at the schools—city schools, country schools, farm life schools, high schools, vocational schools, continuation schools, the colleges, and the great university—the millions expended for public education of every type and grade—thirteen millions for public elementary schools alone!

At that time North Carolina was spending only a little more than four millions on her elementary public schools.

It looked at that time as though we were hopelessly out-classed and out-distanced. But behold North Carolina in 1921-22, just eight years later! Common school support \$16,000,000; support of institutions of liberal learning and technical training \$1,274,000; new buildings, equipments and repairs for state educational institutions \$4,000,000; local funds voted and expended for school building in nine months from September, 1921, to June, 1922, close to \$12,000,000; local school bonds sold, January to June, 1922, close to \$9,000,000.

Right around \$42,000,000 voted and expended on public education in a single year in North Carolina, and a hard year at that.

He knows little about this state who does not know that the people of North Carolina are bent on building a great commonwealth on public education, public highways, and public health.

Think of \$25,000,000 spent on roads in two years. And close to \$75,000,000 on public education for building and maintenance during the same period.

These are staggering totals. But the plain people of this state are finally and firmly convinced that the more they spend on roads and schools the richer everybody has a chance to be; that roads, schools, and health are the best investment any state can make in itself.

North Carolina is not the richest state in the Union. But she is the richest state in the South, and among the ten or twelve richest states in America.

We are neither poor in purse nor poverty-stricken in spirit as once we were. The Old North State has started at last, and she will be as hard to stop in the nineteen twenties in commonwealth building as she was in the eighteen sixties on the battle fields of Virginia.

THE AUTOMOTIVE INDUSTRY

The automotive industry is now third on the list. First comes packing and then the steel industry.
