Drama, thrills and romance make "THE AIR LEGION" a pleasing picture. At Oasis Theatre next Monday and Tuesday.

the AFTER effects of FLU more dangerous than Flu itself

Physicians advise that the chief danger in this epidemic is AFTER Influenza. Then, more than ever, colds attacking the weakened system may lead to bronchitis, pneumonia, sinus trouble, abscess of the ear, mastoiditis, or even the dread meningitis. This is especially true of children or old folks.

AT FIRST SIGN OF A COLD—Put some Vicks up each nostril and snuff well back. At bedtime, apply hot wet towels over throat and chest until the skin is thoroughly reddened. Then rub vigorously with Vicks. Spread it on thickly and cover with warm flannel.

Vicks acts 2 ways at once (absorbed and inhaled) and often checks a cold overnight. If by morning the cold still lingers, stay in bed and repeat the treatment every 4 hours.

AVOID TOO MUCH DOSING—A peculiarity of influenza is that its toxins leave the digestive system upset. Constant "dosing," especially in the case of children, still further disturbs the digestion and lessens the appetite, just when the body needs nourishment more than ever.

Vicks VapoRub is especially valuable here because it is applied externally, and so can be used freely at the first sign of every cold, without upsetting the most delicate digestion.
