**MARION CAFE**

**TRUCK PRICES LOW;  
CO-OPERATION URGED**

In an effort to get some information of truck farming and marketing, W. B. Harrill, principal of the Glenwood school and booster of co-operative farming, made a trip recently to the eastern part of this State and South Carolina. He reported early truck selling at the lowest prices in many years, due, he says, to increased acreage and very favorable weather conditions making for larger yields.

Having in mind a big increase in the Irish potato acreage in McDowell county, Mr. Harrill was especially interested in the marketing of that crop. He found that in sections where the farmers had no organization and sold anywhere in small quantities, potatoes were selling for fifty cents a bushel and even lower at times. On the other hand, he learned that in communities where co-operative plans for marketing in large shipments had been made the price received was from seventy-five cents to a dollar a bushel. These car shipment farmers were always sure of a market and a profit, though small, on this year's big crop.

Having assisted in starting intensive growing of potatoes at Glenwood, Mr. Harrill is keenly interested in the outcome, and hopes that co-operative methods of marketing will be the means of getting a fair price on carload shipments. Eighteen young men of Glenwood agriculture class have planted some acreage. The crop looks fine at this time, Mr. Harrill said, all fields being worked out nicely and almost ready to "lay by". Every effort will be made to realize a substantial profit from Glenwood potatoes.

There has just been started a movement to build a potato curing house at Glenwood, which is a further step toward controlling the market price.

**GROWING SWEET POTATOES**

(By W. L. Smarr)

In McDowell county, the growing of sweet potatoes offers an opportunity to try something different with a reasonable expectation of securing satisfactory results. This something different has special reference to the kind and amount of fertilizer, the distance of the plants in the rows, and the distance of the rows. In a sweet potato growing contest which was held in South Carolina during the past year, T. L. Gramling, of Orangeburg, made a yield of 449 bushels of No. 1's, at a profit of \$265.00. His rows were 30 inches apart, and the "slips" were set seven inches in the drill. He used 1350 pounds of an 8-3-16 fertilizer. As a general practice it is believed that many of our farmers make their rows 3 1/2 or more feet wide, and set the "slips" some 18 to 20 inches in the drill, and apply 300 to 600 pounds of an 8-4-4 or 7-5-5 fertilizer. A practice that is recommended by our experiment station is to put the rows 3 to 3 1/2 feet apart and set the plants 12 inches in the drill. From 600 to 1,000 pounds of a 10-4-8 fertilizer is recommended.

It may be that one will not be able to buy such a fertilizer on the local market, but such can be made by using nitrate of soda and muriate of potash with some of the fertilizer which can be purchased in Marion. I will be glad to help any farmer to figure out the amount of each to add to his fertilizer to give the desired analysis.

**SUMMER BUSINESS SCHOOL**

**BEGINS ON JUNE 22**  
The fourth annual Summer Business School will open its sessions Monday, June 22, at 8:30 o'clock in the Commercial rooms of the Marion High School. Courses in bookkeeping, shorthand, typewriting, word study, salesmanship, etc., will be offered. The work in these subjects will be intensive in nature so that the maximum amount of ground may be covered in them. Up-to-the-minute instructional methods will be used. Those interested should send their names to Mr. E. C. Klontz as early as possible so that he may know how many textbooks to order. It will be desirable to have the books on hand on the opening day. Remember the date, Monday, June 22, at 8:30 A. M.

**BAPTIST FORCES WORKING**

During the last two weeks several meetings have been held looking to a closer organization of work in the First Baptist church prior to the coming of the new pastor, Dr. B. F. Bray, and Mrs. Bray, who will be here next week. Enlistment committees were appointed to visit the members in efforts to secure the fullest co-operation of everyone in all phases of church work to the end that the congregation may be united beforehand in the laudable purpose of Making Dr. Bray's pastorate, an unqualified success. Their reports have been very encouraging, and the deacons feel that the church is entering a new era of moral and spiritual growth.

**ATTENTION!  
Ford Owners**

Do you know that 80 per cent of all Automobile troubles are due to improper lubrication?

Why take a chance with hit or miss grease job when we will have it done by a MECHANIC who is trained to do this work on Ford cars exclusively and is interested in your car giving you satisfactory service.

We use AUTOLINE greases and know the special kind of grease each bearing requires.

Our prices are no higher than the ordinary filling station and you are assured that your car is properly greased and inspected.

**WE--**

Grease your car, inspect transmission and differential, inspect air pressure in tires, put water in battery—all for

**\$1.00**

We are in business to take care of your car and see that you are getting the service you should expect and when we sell you a new car we hope it is the beginning of the transaction and not the end.
