**COUNTY SCHOOL CONTEST**

(Continued from first page) Three, which included the school making the third most improvement.

Along with the decision a report was made as follows: "We have visited all the school improvement projects. We are greatly impressed with the amount of improvement that has been made to the grounds of the county schools during the present school year. These improvements not only add to the general attractiveness of the school premises, but enhance the practical use of the school grounds. We found a great amount of improvement on the inside of the school buildings and to equipment. We are proud to report that our school buildings and grounds are in excellent physical condition. The people of the various communities have shown by their cooperation a great interest in the schools. The money value of the various projects would amount to thousands of dollars. We are sure that the interest and enthusiasm that has been aroused among the schools and patrons will continue in the future and will bring further improvement."

This improvement to school grounds has not only aroused favorable comment among patrons of the various schools, but has been the source of recognition on the part of visitors from other sections. A man who is a graduate of school architecture and landscaping upon a recent visit to the schools stated that he had not seen such improvement among schools in any other section in the State.
