

Kidneys Must Work Well-

For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stand in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging back-ache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

Clubwomen Urge Uniform Divorce Laws Be Enacted

Hollywood, Fla., April 26—The General Federation of Women's Clubs today adopted a resolution urging Congress to enact uniform divorce laws.

In the opening business session of the federation's 58th convention, the 2,000 clubwomen attending also adopted resolutions asking the abolition of the electoral college and approved the work of the congressional un-American activities committees.

The divorce law resolution contended that lack of uniform laws often has resulted in illegal divorces. In turn, this causes illegal remarriages and illegitimacy of children with consequent breakdown of moral standards and confusion of property rights, the resolution said.

The resolution seeks a constitutional amendment giving Congress power to enact uniform marriage and divorce legislation.

A constitutional amendment which would abolish the electoral college in presidential and vice presidential elections also was asked. The resolution called for the division of the electoral vote in each state in proportion to the popular vote. Such a change, the resolution said, would more nearly reflect the will of the people.

Earlier, Mrs. J. L. Blair Buck, general federation president, reported that 1,800 women's clubs throughout the country already had entered the federation's "Build a Better Community" contest.

In the last nine years the size of the flax crop in Texas has increased from 18,000 to 220,000 acres.

Tank At Spruce Pine Fire Razes Big Fuel

Spruce Pine—A blaze at the 15,000 gallon Standard Oil Company tank about 350 yards below the town bridge was brought under control early Friday afternoon.

The flames continued burning, however, sending a column of black smoke over the Toe River.

Trouble started when an oil line leak poured fuel out into the river, according to Blaine C. Miller, plant manager. He said the blaze originated about a half mile downstream and ate its way rapidly back up the river and into the fuel tank.

The Standard Oil property here is situated next door to the Spruce Pine Lumber Company plant and observers noted with relief that the wind was blowing steadily from the east—away from the lumberyard.

Origin of the blaze, which started at about 3:15 a. m. Friday was undetermined but officials said they presumed it started when a match or cigarette was tossed into the stream. At 9:30 a. m. an engine from the Marion Fire Department was dispatched to the scene.

NOTICE

NOTICE IS HEREBY GIVEN that the following order relating to the issuance of \$80,000 for the purpose of erecting additions to schoolhouses in McDowell County was adopted by the Board of County Commissioners of McDowell County in regular session on May 2, 1949:

Ordered that bonds of the county shall be issued to the maximum aggregate principal amount of \$80,000 for the purpose of erecting additions to schoolhouses necessary for maintaining the six months' term required by the Constitution. A tax sufficient to pay the principal and interest of the bonds when due shall be annually levied and collected. A statement of the county debt for school purposes has been filed with the clerk and is open to public inspection. This order shall take effect thirty days after the first publication thereof after final passage, unless in the meantime a petition for its submission to the voters is filed under The County Finance Act, and in such event it shall take effect when approved by the voters of the county at an election as provided in the said Act.

The following resolution was unanimously passed:

RESOLVED, that the county accountant is hereby designated as the officer to file with the clerk the statement of debt required to be filed in connection with the bond order this day introduced relating to not exceeding \$80,000 bonds for erecting additions to schoolhouses. The time and day for a public hearing upon the said bond order is hereby fixed as 10 o'clock A. M. on the 17th day of May, 1949.

The foregoing order has been introduced and a sworn statement has been filed under the county finance act showing the assessed valuation of the county to be \$21,894,883.00, and the net debt for school purposes, including the proposed bonds, to be \$189,227.18. A tax will be levied for the payment of the proposed bonds and interest, if the same shall be issued. Any citizen or taxpayer may protest against the issuance of such bonds at a meeting of the Board of County Commissioners to be held at 10 o'clock A. M. May 17, 1949, or an adjournment thereof.

Corn Growers Asked To Increase Yields

North Carolina's 100-Bushel Corn Club members were asked this week by F. L. Albritton, club president and the state's 1948 corn growing champion, to do their part in the "corn war" with Virginia.

"For every member of the 100 Bushel Corn Club there are 160 farmers who have not been reported as growing 100 or more bushels of corn per acre," Albritton said. "As a member of the 100 Bushel Club, are you doing your part?"

The average farm in this state has about nine acres of corn, the Le-Grange farmer pointed out. If every farmer would allow the five steps to increase corn yields on one acre the state average should be raised five bushels for 1949.

The five steps as worked out by specialists of the State College Extension Service and scientists of the Agricultural Experiment Station are: (1) Use seed of an adapted hybrid or a proved local variety; (2) Fertilize according to the soil needs; (3) Space the rows and the plants in the rows the proper distance to get the desired yield; (4) Control weeds early but avoid late and deep cultivation; and (5) use adequate sidedressing.

"We would not be interested in this contest if we did not know, from our own experience that high corn yields are economical yields," Albritton continued. "Every farmer who follows these approved practices over a period of years will profit by his efforts. Will you, as a member, sponsor as many neighbors as possible for membership in this club?"

POTATOES

The total amount paid directly to farmers for 1948 potatoes up to February 28 was \$155,224,000, exclusive of more than \$25,000,000 which the Government had to spend in diverting the surplus into by-product uses.
