

BAG TAKEN—HE'S TAKEN

Malibu, Calif.—Franklin Wade Rutt, 46, was arrested on suspicion of burglary after Mrs. Thelma Van Ostrum saw a man run from her parked car and found her purse, containing \$76, gone. Later, she picked up a hitchhiker who looked very much like the same man and drove him to the sheriff's substation. Officers found Mrs. Van Ostrum's purse with \$26 in it in a canyon and \$50 on Rutt's person.

SOME CRASH

For a long time the visitor to the great museum stood gazing at the Egyptian mummy swathed in bandages. "Tell me one thing," he ventured.

"What is it, sir?" asked the guide. "Was it a motor or an airplane accident?"

"Don't People Take The Darndest Chances?"

Yes, we do. But oddly, risks taken by the other fellow always look more perilous. That's why the man who fails to insure his property doesn't realize his danger until it's too late. How about you? Do you have proper insurance protection... at lowest possible cost?

APT RETORT

The circuit preacher, making his rounds on horseback through the hill country, found one of the aged parishioners contentedly puffing a pipe on the porch of her shack.

Pointing an accusing finger at the offending pipe, the preacher asked: "Miz Wilkins, do you expect to be saved?"

"Yes, reverend, I do," she answered.

The preacher's voice rose. "Don't you know, woman, that the Bible says nothing unclean shall enter Heaven? How do you expect to go there with your breath smelling of evil tobacco?"

"Well, reverend," Mrs. Wilkins said between puffs, "when I die, I 'spect to leave my bref behind."

Nat'l Farm Safety Week Set July 24-30

North Carolina farmers are asked to join thousands of others throughout the Nation this year in observance of National Farm Safety Week, July 24-30. The theme of the week, according to H. M. Ellis, in charge of extension agricultural engineering at State College, will be the elimination of unsafe practices.

Recent studies, Mr. Ellis says, reveal that unsafe practices continue to be the leading cause of accidents to farm people. A special survey conducted by the National Safety Council shows that about 72 per cent of the accidents involved one or more unsafe acts on the part of the victims. One of every 17 farm residents in the United States will suffer a disabling injury from accidents in 1949 unless they take extra precautions.

A survey of farm work accidents showed that failure to use proper equipment was the commonest unsafe act for farm accidents.

Unsafe practices in dealing with animals was second in importance.

Among other common unsafe acts were knowingly using defective or unguarded equipment, working on or adjusting dangerous moving equipment, handling too heavy loads, and doing work without sufficient instruction.

Special phases of farm safety will be stressed each day of National Farm Safety Week. Sunday will be observed as church day, with the accent on "Thou Shalt Not Kill." Monday will be home safety day, featuring good housekeeping. Tuesday will be livestock safety day, with the accent on the handling animals safely.

Wednesday will emphasize safety from falls. Thursday will be high way safety day. Friday will be machinery safety day. Saturday will be review day, for review of all phases of accident prevention, especially the elimination of unsafe practices.

Dooryard Garden Accents Charm of Small Home

Simple Beds and Borders following the lines of the paths and building are best for front yard flowers.

Small houses, like small gardens, possess charm, a quality which seems to evade larger and more pretentious creations. And nothing will enhance the charm of a small modern home so much as a dooryard garden, gay with flowers.

While all flowers are beautiful, and any combination of nature's colors will be harmonious, really stunning effects can be developed by planting colors which harmonize with the house and its trim. For a house of buff or cream color, for example, blue and white flowers will provide a delightful foreground.

In the illustration white and blue flowers are grown as borders to the path and along the foundation line of the house. No shrubs are used except small evergreens flanking the door, and these should be kept

small by annual shearing. Of the flowers suggested, petunias should be started in a seed box, in the house, or in a hot-bed or cold frame, since ninety to one hundred days are required to produce flowering plants.

Cynoglossum, the Chinese forget-me-not, and single asters will also bloom earlier, if given a start under protection before it is safe to move them to the garden. They can be sown outdoors, however, and will flower in sixty days. Sweet alyssum is easily grown from seed sown direct in the garden. A compact, dwarf variety should be used, and the plants will do better if thinned out to stand at least six inches apart. When plants begin to grow "leggy" and flowers to be fewer, they can be sheared like a hedge.

Interest in the 1949 corn-growing contest between North Carolina and Virginia is growing by leaps and bounds. Farmers from both States are enrolling, anxious to increase their own corn yields and to help their respective States come out on top. The exhibit shown above is being displayed in various localities. In the center appears the trophy which will be presented to the winning State by the Corn Committees of North Carolina and Virginia. It is donated by The National Fertilizer Association.

TARHEEL WILDLIFE SKETCHES

—Buffer Species Are Important Too

SOME PREDATORS ARE NECESSARY AS THEY CONTROL MANY UNDESIRABLE SPECIES—UNCONTROLLED PREDATORS EAT MORE THAN THE BUFFER SPECIES CAN SUPPLY—THEN THEY TURN TO GAME AND POULTRY

THESE BUFFERS ARE EATEN BY PREDATORS BECAUSE THEY ARE NUMEROUS AND EASIER TO CATCH—IF NOT CONTROLLED THEY'D SOON BECOME A MENACE TO MAN

NATURE STRIVES TO MAINTAIN A BALANCE BETWEEN HER VARIOUS POPULATIONS WHICH CANNOT BE DISTURBED WITHOUT SERIOUS EFFECT—THIS IS A BASIC PRINCIPLE IN WILDLIFE MANAGEMENT
