Sarah Ann's Cooking Class

Because of their large amounts of starches and sugars, sweet potatoes yield about 1-3 more energy value than white potatoes. They taste best when baked, keeping the jackets on saves minerals and vitamins. One moderate deep yellow sweet potato will supply the normal person's daily need of vitamin A.

Baked Sweet Potatoes

Select potatoes of uniform size for baking. Wash and trim off ends. Wipe with a slightly greased cloth. Put potatoes in a pan and bake slowly. Turn once during baking. Butter generously when eating.

Sweet Potato Yeast Bread

7 cups enriched flour
2 1-2 cups enriched cornmeal
2 teaspoons salt
1 cup mashed sweet potato
1 yeast cake
Mix 1 cup each of the cornmeal and flour, add enough warm water to make a stiff batter. Add yeast which has been dissolved in lukewarm water. Put mixture in warm place until it becomes light. Scald the remaining meal with 2 1-2 cups boiling water. As soon as it has cooled to lukewarm add it to the sponge. Add remaining flour, potatoes and salt. This dough should be just thick enough to knead without danger of it sticking to the board. Knead well and put in a warm place to rise. When double in size, punch down and form into loaves. Let rise until double in size. Bake in an oven 425 degrees for 15 minutes, then reduce heat to 375 degrees and finish baking.

Sweet Potato Pone

1 quart raw grated sweet potatoes
2 eggs
1 cup cane syrup
1-4 to 1-2 cup melted butter or other fat
1 cup milk
1 cup brown sugar
Few broken pieces of orange peel
1-2 teaspoon nutmeg
1 teaspoon cinnamon
3-4 teaspoon salt

Sift dry ingredients together and combine with remaining ingredients. Pour into baking dish and bake in an oven 300 degrees for 2 1-2 hours. Stir occasionally at first, but during last 30 minutes do not stir.

Sweet Potato in Orange Shells

5 to 6 oranges
6 cups cooked, mashed sweet potatoes
1 1-2 teaspoons salt
3 tablespoons melted margarine
Orange juice to moisten
Add salt, margarine and enough orange juice to moisten. Pack into orange shells. Place in shallow baking dish and bake at 375 degrees for about 25 minutes.

Baked Potato SLICES

Thoroughly scrub the potatoes and rub the skins with margarine. Without peeling, slice them in 1-4 inch slices. Place in a skillet with margarine or other fat, sprinkle with salt and pepper. Cover and bake in an oven 375 degrees until tender.

Fried Sweet Potatoes

Peel large sweet potatoes and cut in 1-4 to 1-2 inch slices. Sprinkle with sugar. Put in medium hot fat, usually use about 1-2 inch fat in iron skillet. Cover and steam until potatoes are tender, then slightly brown on each side in open skillet. When you are cooking a

pork roast, quarter 3 or 4 raw sweet potatoes and put around the roast to bake.

A LOT TO LEARN

An elderly woman was escorting two little girls around the zoo. While they were looking at the stork, she told them the legend of the ungainly bird—how it was instrumental in bringing them to their mothers.

The children looked at each other in astonishment, and presently one whispered to the other: "Don't you think we ought to tell the dear old thing the truth?"

CHANGING COUNTY LINES

Few North Carolina counties have their original boundaries. In some instances, the boundary line has been changed altogether, while in others, slices have been taken from several counties and a new one has been formed.

The old Barringer House near Newton is a striking example of the fickleness of our county lines. The house, built in 1762, has stood in four different counties, yet has never moved a peg. It originally stood in Mecklenburg County, then in Tryon, then in Lincoln and now in Catawba.

50 YEARS AGO

... All that existed of the Duke Power Company was an idea in the mind of a young engineer, battling floods and skepticism. This idea and these problems came to the attention of a man whose lifetime of achievement enabled him to back a young man's dream. Envisioning his native Piedmont made prosperous through plentiful and low-priced power, he joined vision and fortune with engineering genius.

In less than two decades hydro electric power proved inadequate to the demands of the awakened Piedmont. Again, in his last years, the founder of the Duke Power Company set himself a new objective . . . steam generation of power to meet and encourage industrial growth.

TODAY

... Giant steam plants are being added, three in one vast expansion program, to meet the tremendous needs of Piedmont farms, homes, and industries. These mammoth generating and transmission facilities are conceived, created, tested, and proved by farsighted, highly trained engineers working together for **POWER and PROGRESS.**
