SUGAR - Once A Drug

Should you hear anyone scoff at the drug store for selling such a variety of merchandise, we hope you may reply that sugar was once a drug; coffee, tea, cocoa and spices were first introduced to the Western world by pharmacists; pharmacists made the first flavoring extracts; were the first candy manufacturers; introduced toilet soap. The list could be extended indefinitely. Surely it is logical that the drug store sell those things to which the world is indebted to pharmacy. And by selling a variety of merchandise, your druggist has kept down prices of prescription drugs.
