It is very gratifying to note the growth of cotton manufactories in the South and especially in North Carolina A few years age as soon as our cotton was marketed it was forthwith forwarded to Maswhere it was converted into fabries, which fabries were then shipped to the people who pro daced the cotton and soll at a tremendous per cent. Some o our progressive, far-seeing men legan to see that upon this plan of doing business "those level headed Yankees" were living in clover at our expense, and so they determined to stem the tide and begin the man ufacting of our own cotton here at our own homes. Then the first cotton factory in the South-Atlan tic States was built on Haw river in Alamance county. Another followed and still another, and the rattle of the looms begon in caraest. In Alamance and Randoph counties alone there are more than a score of factories." Richmond. Cumberland, Meck'enburg and Wake have several factories each. No institution in the State has grown so rapidly in the past two years as has the University. The growth and expansion of this institution is a matter for State pride and rejoicing. The election of Geo. T. Winsten as President two vears ago marked a new era in the history of the college. The student roll last year unmbered 316, the largest number of boys that has been at Chopel Hill at one time in thirty years. \$20,000 worth of repairs is being made on he buildings this summer; wa er works, baths, etc., are supplied. The scholrship of the institution is being recognized everywhere as equal to that of the leading Uni wersities, and soon we shall have in North Carolina the great South orn University.
