

Improved Hog Prices Forecast By April

Because of the limited holdings of pork in cold storage and the low receipts of hogs at the leading central markets, there is every prospect that prices for pork will increase by April first.

W. W. Shay, swine extension specialist at State College, says the receipts of hogs at the seven leading markets during the five months of October to February, inclusive, were 7,972,748 head as compared with 11,649,308 head during the corresponding period in 1931 and 1932.

"In addition to this," says Shay, "the cold storage of pork, including frozen, dry salt, pickled, and in process of cure on hand March 1, 1933, was 24.89 per cent less than was the case on March 1, 1932, and 28.75 per cent less than the average March 1 for the past five years."

In Shay's opinion, this means that hog prices must increase by April 1 to where they will equal or exceed prices paid one year ago. He looks for the prices to improve to the point where they will exceed the actual cost of production. This prediction is made in spite of the fact that the average price for the week ending March 11 was only \$3.84 a hundred pounds.

Since most North Carolina hog growers are finishing their animals to take advantage of the high markets of April and August, these growers should prepare to market animals co-operatively next month.

EXCAVATOR FOUND RIFLE MADE IN 1852

Oregon City, Ore., March 18.—Harry M. Smith was watching operations of a rock crusher. He spied an object he believed was a barrel of a gun sticking from the excavation.

He dug down and found a gun made in 1852 a .50-caliber rifle. The stock was rotted away and the barrel was very rusty, indicating it had been buried for some time.

Palo Alto, Cal., March 21.—Herbert Hoover, smiling and buoyant, returned home today to resume his life as philanthropist, man of private affairs, and esteemed resident of a small western town.

When Pastures Fail, Have Emergency Crop

Past experience has proven that it does not pay for the North Carolina dairyman to depend on his permanent pasture for roughage during the months of July and August.

"Prolonged droughts for the past two or three years indicate the necessity for the dairyman to have an insurance crop to furnish grazing during this part of the summer. To depend on pastures will mean that the cows will lack feed," says A. C. Kimrey, dairy extension specialist at State College. "It is not too early now to make plans for the proper feeding of dairy cows in July and August. Pasturing a crop that will furnish continuous growth during this period is a good practice and there is no better crop for this purpose than Sudan grass."

Mr. Kimrey says various methods have been resorted to by dairymen to have the necessary succulent roughage during the late summer. Summer silage has been used and is satisfactory when available in sufficient quantities. Soiling crops have been used but the labor necessary to cut and haul these crops to the barns make this practice burdensome. It is better to have a crop which may be pastured.

Therefore, every dairyman who is in doubt about his pasture should prepare some land for seeding about May 1. Sudan grass must have fertile land for best growth. This land should receive an application of stable manure as early as possible and this worked well into the soil. At seeding time or just before make an application of complete fertilizer. The grass should be seeded at the rate of 30 to 40 pounds an acre for best results, Kimrey suggests.

DREAM OF WIFE OF JURIST FULFILLED

Charlotte, March 21.—Sunday Frank N. Littlejohn, chief of detectives, returned to Mrs. John J. Parker, wife of the federal court judge a cameo that had been stolen and that night Mrs. Parker dreamed a diamond ring, stolen at the same time, also would be returned.

Today, Littlejohn made the dream come true.

He returned the ring which he recovered at a filling station in the foothills of the Western North Carolina mountains and said the ring had passed through at least five hands since it was stolen several weeks ago.

The Parker home was broken into while the family was in Florida.

TRUSTEE'S SALE

Under and by virtue of the authority vested in the undersigned trustee by a deed of trust, executed by R. M. Williams and wife, dated December 3, 1930, and recorded in the office of the Register of Deeds of Robeson county in Book 87, page 591, the undersigned trustee will, on April 10, 1933, at 12 o'clock noon, at the court house door in Lumberton, North Carolina, offer for sale to the highest bidder, for cash, certain lands in Maxton township, Robeson county, North Carolina, described and defined as follows:

In the town of Maxton, on the west side of North Patterson

street home Maggie Patters sidewalk Patters said edg northerly corner in a westerly direction northern line son lot 150 in a southerly direction with the westerly line of the street; thence north 150 feet and being 5 which forms M. Williams lot and being the lot located the res. 1930 by C. L. G. HENRY A. 7-10.

TRUSTEE'S SALE

Under and by virtue of the authority vested in the trustee by a deed of ed by Eliza McQuee and others, dated J recorded in the off ter of Deeds of R

"Gentlemen, the price is \$99.50 until material costs go up . . . But there can be no compromise on quality"

Now You Can Buy

KELVINATOR

THIS is not a "built-to-a-price" model. It is a standard 1933 Kelvinator, with over four cubic feet of food capacity.

It is a beautiful quality-built electric refrigerator. It is ice-making, economical—good for a lifetime. Its gleaming porcelain-lined interior has room for all the food the average family needs. Its freezing trays hold a generous supply of ice—or delicious frozen desserts. It carries all the standard Kelvinator guarantees. It represents no compromise in performance or in quality.

To-day's Low Costs Brought This Opportunity

While materials can be bought at present low costs, the price of this Kelvinator to you will be \$99.50 installed in your home. We guarantee this price for 40 days. If, at the end of this period, we have to pay more for materials (and we hope we will, for that will mean better times for you and us and everybody else), we will have to advance

A Word to Prospective Purchasers of Electric Refrigerators. "In the building of this refrigerator there has been no compromise on the Kelvinator standards of the past 19 years. It possesses the same high quality and performance found in every Kelvinator model, whether priced at \$99.50 or \$1,000. It could not be otherwise, for this is a standard Kelvinator." G. W. MASON, President, Kelvinator Corporation.

FULL Power.—The compressor is no experiment that somebody hopes will be all right. It's the same powerful, time-tested and proved power plant used in the higher priced Kelvinators. Having an abundance of power, it runs only about a third of the time. This means longer life, less wear and greater economy. It actually uses less electricity than other compressors having but a third of its capacity. And it is quiet—remarkably quiet—the result of fine engineering and precision manufacturing. No compromise here.

Constant Cold While Defrosting.—Another exclusive feature is the compensating defroster—the unique engineering device which permits refrigeration while defrosting the unit. Ice cubes remain hard, food safe. No compromise here. Many Important Features.—The door is massive and fully insulated. The modern hardware is chromium and the exterior finish of the cabinet is a gleaming "permanent white" lacquer enamel. There is a Temperature Selector with 8 freezing speeds and Kelvinator 3-Zone Cold gives 3 distinct types of refrigeration in the one cabinet. And there are many other features which give this model greater value and utility. No compromise here. Easy Terms.—Here is unquestionably the greatest value on the market today. A full sized, full powered, full quality standard Kelvinator at a price everyone can afford to pay—especially on the easy Monthly Budget Plan where the monthly payments are actually less than the money you save on the saving of foods (otherwise spoiled) and quantity buying. See it now. And get yours before prices go up.
