WE

"German Syrup"

Those who have not used Boschee's German Syrup for some severe and chronic trouble of the Throat and Lungs can hardly appreciate what a truly wonderful medicine it is. The delicious sensations of healing, easing, clearing, strengthening and recovering are unknown joys. For German Syrup we do not ask easy cases. Sugar and water may smooth a throat or stop a tickling—for a while. This is as far as the ordinary cough medicine goes. Boschee's German Syrup is a discovery, a great Throat and Lung Specialty. Where for years there have been sensitiveness, pain, coughing, spitting, hemorrhage, voice failure, weakness, slipping down hill, where doctors and medicine and advice have been swallowed and followed to the gulf of despair, where there is the sickening conviction that all is over and the end is inevitable, there we place German Syrup. It cures. You are a live man yet if you take it.

A Remarkable Induction.
Shortly after twelve o'clock on Saturday night a party of gentlemen were taking lunch at a resort on Wabash street, when their attention was attracted to a peculiar clicking of the carbons in one of the electric light globes overhead. The sound was exactly akin to that of a telegraph instrument and was kept up incessantly for fully fifteen minutes.

Comments were passed on the unusual phenomena, but at last the novelty wore off and the party proceeded to the discussion of chicken sandwiches. A few moments later a new customer entered; he was an operator from the Western Union office, and as he sat waiting for his order to be filled the clicking of the carbons was renewed. The telegrapher started, looked all around him and then at the electric lights above. After listening intently for a moment to the sounds he drew a tab of paper and a pencil from his pocket and began to write. The others were watching him closely. He wrote for a few minutes, when the clicking again ceased.

"Well," he said, drawing a long breath, "that beats all the induction I ever heard of in my life."
"What is it?" asked every one in chorus.
"What is it? Why, it's a message of the Associated Press. Look here," and the operator exhibited the paper on which he had been writing. It read:
"Were traced to the train on the North Pennsylvania branch and the thefts located as taking place in Bucks County from trains between New York and Philadelphia. On Monday evening Lewis Hunsell, William Coyle and Abraham Kulp, brakemen, were arrested and taken to Doyleston, given a preliminary hearing and bound over for a further hearing. The value of the goods taken will amount to many thousands of dollars." The only explanation that can be offered of the phenomena is that there was a contact at some point between a telegraph and electric light wire.—St. Paul Pioneer-Press.

An interesting experiment is about to be tried in St. Petersburg in the founding of a factory for the weaving of silk. In the Caucasus, and especially in Central Asia, the keeping of silkworms is becoming more and more an industry of the people, and it is proposed to manufacture the raw material so obtained.

It's sometimes said patent medicines are for the ignorant. The doctors foster this idea.

"The people," we're told, "are mostly ignorant when it comes to medical science."

Suppose they are! What a sick man needs is not knowledge, but a cure, and the medicine that cures is the medicine for the sick.

Dr. Pierce's Golden Medical Discovery cures the "do believes" and the "don't believes." There's no hesitation about it, no "if" nor "possibly."

It says—"I can cure you, only do as I direct."

Perhaps it fails occasionally. The makers hear of it when it does, because they never keep the money when the medicine fails to do good.

Suppose the doctors went on that principle. (We beg the doctors' pardon. It wouldn't do!)

Choking, sneezing and every other form of catarrh in the head, is radically cured by Dr. Sage's Catarrh Remedy. Fifty cents. By druggists.

A Florida Crocodile.
A genuine crocodile, the fifth ever known to have been captured in Florida, was taken recently near Punta Gorda. It was nine feet ten inches long. The animal resembles the alligator very much, with the exception of the head, which is much narrower, and the upper jaw works instead of the lower; two of the front teeth project through the upper jaw, and all of the upper teeth resemble pearls.—Chicago Times.
