course was wet and heavy and the scores
large in consequence.

A women's 18 hole medal play match

FUZZY WUZZIES!

(Continued from first page)

other, romp or bask in the warm, bright
sunshine.

The incubators are kept busy night
and day and as fast as one brood is set
forth another batch of eggs is started,
and one of the most interesting times to
visit the farm is just as the eggs are
hatching out. After the chickens are
hatched they are cared for very carefully
in "brooders" which are no less than ar-
tificial mothers, for a few days, and then
gradually they are allowed more free-
dom. At first they are confined within
the warm building, but as they advance
in age and experience they are allowed
to go out of doors.

The little "Fuzzy Wuzzies" come into
the world with two distinctive charac-
teristics: a superabundance of down and
an uncontrollable desire to "peep."
They seem to know intuitively, that
something in the way of a mother is
lacking, and while the brooders afford a
warmth, shelter and comfort which no
natural mother could give, they still ap-
pear dissatisfied, not knowing why. But
this gradually wears off, and in the
course of a week or so, the little fellows
have forgotten all about it and taken up
life on the old "Live to eat and eat to
live" proposition. Under scientific care
they wax lusty and fat and make re-
markable rapid growth towards that de-
licious size known as the "broiler."
And the completed result is a delicacy
that is a most marked improvement over
the "farm chicken" which gets lank lean
and muscular from too much exercise;
too much gratification of the chickens
inherent desire to romp, and indulge in
gastronomic indiscretions.

Thousands of chickens, from wee
"Fuzzies" up to good-sized broilers, are
now to be found at the Poultry Farm,
and they are a happy and contented lot,
apparently unmindful of the fact that
their life is to be so short that it is hard-
ly worth the living, from a purely chick-
en sociological standpoint of view.

Many practical results have already
been obtained from the Poultry Farm,
but its real influence will be felt when
the hotels are filled and the vast demands
of the visitors for chickens must be sat-
isfied.

The ultimate aim of the Poultry Farm
is to supply the entire needs of the Vil-
lage, with not only broilers, but with
fowls and eggs as well. It is but one
step in the general scheme which is on
foot here; to give visitors the best of
everything and to make Pinehurst as
near complete unto itself as it is possi-
ble to have it. But at the same time, the
Poultry Farm serves another distinct
purpose for it is a decided attraction,
and exceptionally interesting place for
all to visit.
