## JACK FROST'S ABODE!

(Continued from first page)

heat and lowering the temperature to  
any desired point from eight or ten  
above zero up. Cold storage rooms in  
the various hotels of the Pinehurst Sys-  
tem are operated from the plant. The  
Carolina and The Holly Inn each have  
three of these and The Berkshire and  
The Harvard one each. There are also  
three in the meat market. These rooms  
are indispensable for cold storage pur-  
poses, and also far superior to the cold  
storage room produced by the use of ice.

### Its Advantages.

Artificial ice has its advantages over  
natural ice. First of all the cost at Pine-  
hurst, is reduced about three-fourths and  
then again, the manufactured ice is su-  
perior to the natural, not only absolute-  
ly pure, but lasting much longer.

Only pure, sparkling, Pinehurst spring  
water is used and great care is exercised  
not only to have the retainers clean, but  
to keep the ice after freezing, where it is  
not reached by the air.

The ice-making capacity of the plant  
is 2700 pounds a day. Two tanks are  
operated and each freezes eighteen cakes  
of ice at a time, each measuring about  
three feet in length, by eighteen inches  
in width and four inches in thickness.

The equipment of the plant consists  
of a 25-horse power motor which drives  
the ammonia through the compressor,  
and thus it is used over and over again,  
with hardly a perceptible loss.

A. L. Couch is in charge of the plant  
and visitors are always welcome, Mr.  
Couch, never being too busy to show  
callers about, or if they wish it, to take  
them to the freezing room where they  
may have the only opportunity the Vil-  
lage offers, to meet Jack Frost!

The plant is now running from 7 A.  
M. to 8 P. M. daily, but later on, will be  
operated three hours longer each day, or  
until 11 P. M.
