Modish Spring Millinery.

"More interesting than that of any other season is the millinery of Spring," says The Delineator for April. "While some of the shapes are of the picture type, the preference is perhaps for the small toque or turban and the Continental in its various modifications. Ovarand square crowns are both in favor, and quite the newest idea is the oblong crown having a deep crease from the front to the back. The brim of this hat is rolled at the sides and is melon or oval shaped. This design is pleasingly carried out in the new pliable straws, while it is seen even in tulle and lace with a long plume sweeping around the crown and fastened near the front with an ornament or

"Smooth straw braids are extensively used in the smart Spring hats, and chip and Milan are perhaps in highest favor. Lace Milan braids are seen in dressy headgear, and they are adapted to the artistic shapes in vogue. Among the modish colors are blue, brown, butter ecra, champagne and green. Brown and green are associated in some of the most attractive examples of the milliner's art.

"Plumes of coq feathers are much used, and they are in all the fashionable colors, as well as in shaded effects and in white. Quills are in favor, too, and frequently two will be attached to the rolled edge of a hat brim by a knot of ribbon, or fastened by a cockade or buckle. Shaded effects are most popular. Breasts are a modish trimming on hats for ordinary wear, and when associated-with the new soft and beautifully colored ribbons, they are most effective."
