

The Pinehurst Outlook

PINEHURST, MOORE COUNTY, NORTH CAROLINA

VOL. XV, NO. 1.

ANNUAL EARLY SEASON NUMBER

FIVE CENTS

SUMMER OF ACCOMPLISHMENT

Everywhere Its Evidences Enhance
Pinehurst's Distinctive Charm

More Complete Unto Itself Than Ever
Before Village Welcomes Old
and New Friends

ALL DEPARTMENTS of the Village have shared in the summer's important work, notably golf course extension, restoration and change, the clearing of additional farm lands, the installation of a more extensive water supply system, and general Village, hotel and cottage improvement and perfection. Manifesting itself everywhere, it greatly enhances the distinctive charm which has always made Pinehurst unique; the ideal which so many have sought and so few have found.

The important golf course work has been the laying out of an additional nine holes, leading up to the establishment of the hitherto unheard-of equipment of four-eighteen hole, six thousand yard courses. The proposed changes on No. 1 and 2 courses, which bring first and home greens in close proximity to the Club house, have been pushed forward to completion, but will not be used until the fair green is thoroughly established. No. 3 course has been brought to a state of perfection beyond the most sanguine expectations. New tees have been added and new greens built. Several important improvements have been made, including the introduction of a wide open brook on No. 10 in place of the marshy lowland.

The new No. 4 course will undoubtedly, be open for play next season, results which were declared impossible by many when this work was begun. On all three of the completed courses Bermuda grass planting and fertilization has been extensively carried out under an improved plan which promises satisfactory resistance against the mighty army which tramps over it from November until May.

On No. 2 course, there will be found a few more traps, three being added on the 11th hole to catch sliced seconds. The 13th will be lengthened at the tee and traps added at the right of the fair green thus forming an elbow which will not bend! Water has been introduced at many of the more central greens and the various rain shelters completed at convenient points. At the Club house a new addition with shower baths and toilets is

greatly appreciated and in line with the improvements begun with the fireproof locker building completed last season. The women's room has been fitted with metal lockers greatly improving its appearance.

The new water supply system anticipates future needs, the work of installation carried forward under the direction of J. L. Ludlow, C. E., M. S., who has done so much as a member of the North Carolina State Board of Health in improving the water supplies of the state. The water will be taken from Rattlesnake Branch, northeast of Pinehurst, the watershed upon which there is no building and

vegetable delicacies in preparation and trust for the use of visitors.

The hotels and cottages have received especial care, a marked improvement at The Carolina, a sun, card and reading room where formerly was the east porch. Private baths have been added at The Inn and Berkshire, while new furnishings, paint and paper beautify the interiors of all hotels. Much the same care has been bestowed upon the cottages. Mr. J. R. McQueen is again in general supervision of the property as the assistant of Mr. Leonard Tufts, the owner, and Miss F. B. Gray returns as the General Office cashier. Elsewhere

THE NEW ROAD TO ABERDEEN

owned by the Village, maintained as a reservation. Electric pumps are being installed and filtration beds built; Mr. Ludlow enthusiastic in his estimation of the equipment and supply as ideal.

One hundred and fifty acres of land have been cleared for farming purposes which are also available for dog training, at the same time greatly improving the section and serving as an object lesson to show just what scientific effort can accomplish in the sand hill region. Important additions have been made in blooded stock to the Dairy and the Piggery herds, and the Market Garden has a wealth of

special articles deal with other departments of the Village; a Village now more "complete unto itself" than ever before.

The Carolina Opening

As marking midseason's commencement, the opening of the magnificent Carolina is always anticipated. Saturday, January 6th, is the date set. The Berkshire opens on the 15th and The Harvard soon after. The Holly Inn opened, as usual, early in November. General Manager Priest and Managers Creamer and Abbe all return.

THE HUB OF GOOD ROADS

Village the Center of Connecting Trunk
Lines to Many Sections

Especially Gratifying Are the New
Routes to Numerous Nearby
Points of Interest

IN ALL TRUTH Pinehurst is now the "Hub" of Moore County good roads which bar and crossbar it in connecting trunk lines, stretching southward to Savannah and northward toward Richmond, for the

summer has been one of great accomplishment. Most important to visitors are the improvements in the immediate vicinity, among them the picturesque road to Pine Bluff and Aberdeen, which swings out past the seventh-hole on the No. 1 golf course and on through the pine grove, charming in its vistas and diversity and soon to be connected with Raeford and Fayetteville and on to Dunn and Raleigh. The road to Carthage running north from the Carolina, is also completed to the township line with plans for its continuation to the county seat. Five miles of road have also been built by the Green Farming Company, west of Pinehurst, connecting with Pinehurst roads and the road from West End to Starr has been completed with plans for early continuation to Greensboro. Connecting Jackson Springs with Hamlet, is a new road and the run from the Springs to Rockingham has been perfected, while the bad stretch between Rockingham and Cheraw, formerly the worst portion on the route to Savannah, is now in excellent condition. Dundee connects with Carthage by way of Black's Mills and the road will be continued from the Mills to Dundee.

Activity has been general in the southern part of the county especially in the vicinity of Aberdeen and Pine Bluff, and from Pinehurst to Manchester and on to Fayetteville, work is progressing rapidly, the road passing through "Pinewild" the estate of Honourable Kent of California, "Congressman K" and Mr. J. F. Jordan of Greensboro, well known to Pinehurst visitors. Sand Hill, Jonesboro and Bensalem townships are all active and McNeals has completed its roads; the result 70 miles of good roads available to Pinehurst guests, opening up not alone the surrounding section, but leading to the
